Executive Summary

Fund Overview

NRP Green Transition I AS is a closed-end late stage venture capital fund dedicated to building a portfolio of Nordic industrial cleantech investment positions primarily through investments in shares and other equity and equity-like instruments (the "**Fund**"). The Fund is managed by EnvisionTech AS (the "**Manager**").

The investment objective of the Fund is to achieve long term capital appreciation through making sustainable investments within the meaning of SFDR Article 2 (17) and build a diversified portfolio with an attractive risk/return profile, targeting a return on invested capital of 4.0x.

Through investing in capital light companies with moderate technical risk, the Fund aims to deliver positive impact and enhance long-term returns through a robust strategy and approach to active ownership.

Fund Economics & Performance

Capital calls & deployment

- In Q2-26, NOK 20.2 million was called from shareholders to fund follow-on investments in Alva Industries, Heimdall Power and Maritime Robotics, and cover operating expenses.
- Total paid-in-capital stands at NOK 423.0 million, corresponding to 94.7% of total commitments.

Net Asset Value & Multiple on invested capital

- The NAV, adjusted for foreign exchange rates, is set to NOK 492.4 per share (vs. NOK 493.5 in Q1-26), equivalent to NOK 416.6 million and corresponding to a 1.5% discount on the average cost price of the shares.
- The gross multiple of invested capital in portfolio companies is set to 1.09x (vs. 1.09x in Q1-26).

Market Comment & Deal Pipeline

Key highlights on relevant deal flow and transactions in Q2 2026:

- Based on the briefing from Cleantech for Europe, EU cleantech venture/growth investment rebounded to €3.2bn in Q2 2026, nearly doubling Q1's €1.7bn. H1 2026 total stands at c. €4.9bn, 8% above H1 2025.[1]
- Deal volume falls despite value rebound — 75 equity deals this quarter (vs. 90 in Q1). Early-stage (seed/Series A) fell 39% YoY to 56 deals; with late-stage down 21% YoY.
- Sector mix shifted to focus on Materials & Chemicals, followed by Energy & Power and Resources & Environmental Management, accounting for >80% of capital raised.
- Notable acquisition this quarter NORBIT's acquisition of Water Linked, Norwegian subsea navigation and acoustics company in a 100% cash acquisition.

Regulatory / Policy developments

- The European Commission published the ETS revision and Electrification Action Plan together: setting a 46% electrification target for 2040, plus a proposal to align gas/electricity taxation.

Deal flow

The below table exhibits the development of EnvisionTech's deal flow from Q1-2026 to Q2-2026, split on industry, capital phase and country, reaching 1600 companies in total deal flow considered.

[1] Cleantech Q2 Briefing 2026

Key Events in Q2 2026

Maritime Robotics raises NOK 287 million growth capital as autonomous sea drones move into large-scale adoption

Maritime Robotics closed a NOK 287 million growth investment round led by London-based MS+PARTNERS in June, with existing investors EnvisionTech, Nysnø and Umoe doubling down to scale autonomous sea drones across commercial and defense markets globally with fresh capital. The company will further announce details of a new investor joining in Q3-26 report.

Heimdall Power completes an internal bridge round with NOK 79.2m from major shareholders

Heimdall Power completed an internal bridge round of 83.1m, whereby NOK 79.2m was committed from existing major shareholders and the remainder from employees and other shareholders. Proceeds will be used to execute on the business plan and take the company to cash-positive operations.

Alva Industries raises EUR 16.0m from new investors

Alva Industries raised €16m in June, led by Nysnø Climate Investments, Sandwater and Emerald Technology Ventures, with Samsung Ventures' multi-million euro investment from December 2025 converting into the round, to scale manufacturing and international growth across robotics, aerospace, medical and defense applications.

Envision SPV I AS completes second close

Envision SPV I AS completes a second close of NOK 10.50m on 23rd June 2026 to execute on follow-on investments in Maritime Robotics, Alva Industries and Heimdall Power.

On the back of solid commercial traction in these three companies, the SPV has the purpose of investing in the available over-allocation in upcoming funding rounds of these three companies from NRP Green Transition I AS.

The target fund size is NOK 100m.

Key Events after the Reporting Period

Maritime Robotics closes follow-on investment from a reputable European investor

Maritime Robotics closes a follow-on investment from a reputable European investment fund within the dual use space, enabling further growth and validation of their sea drone platforms.

Envision SPV I AS completes third close

Envision SPV I AS completes a third close of NOK 25.0m on 16th July 2026 to execute on follow-on investments in Maritime Robotics, Alva Industries and Heimdall Power.

Current AUM is NOK 74.5m with target fund size of NOK 100m.

Fund Performance

Fund Cash Flows

NOK million	Q2-2026	YTD	Accumulated	% of total commitments

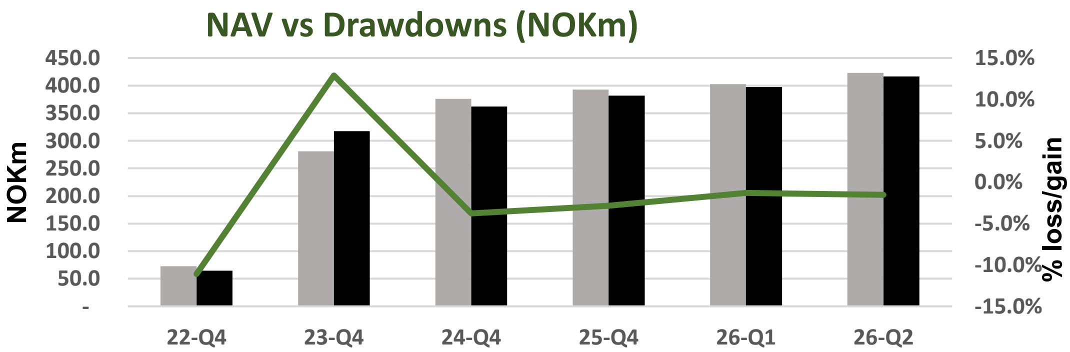
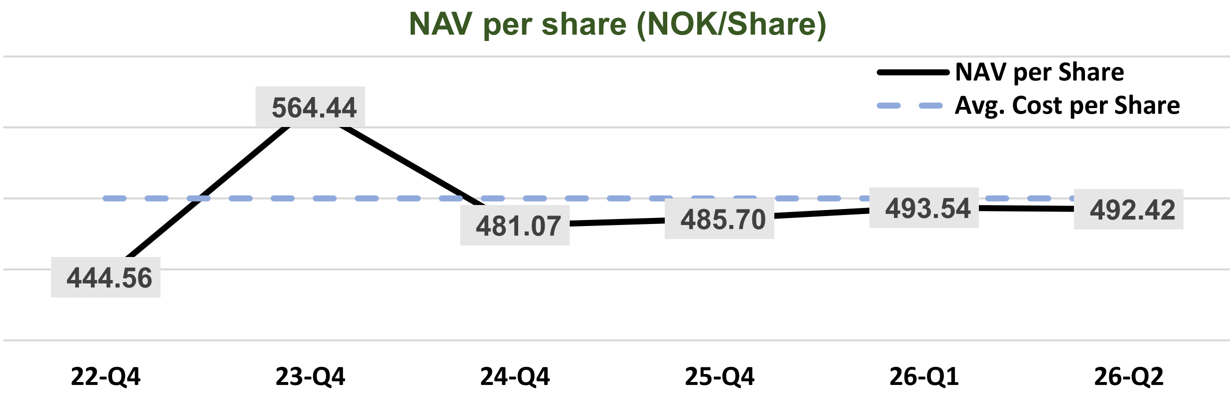
(1) NOK 20.0 million by Founder and NOK 403.0 million by Fund investors.

Fund Net Asset Value (NAV)[1]



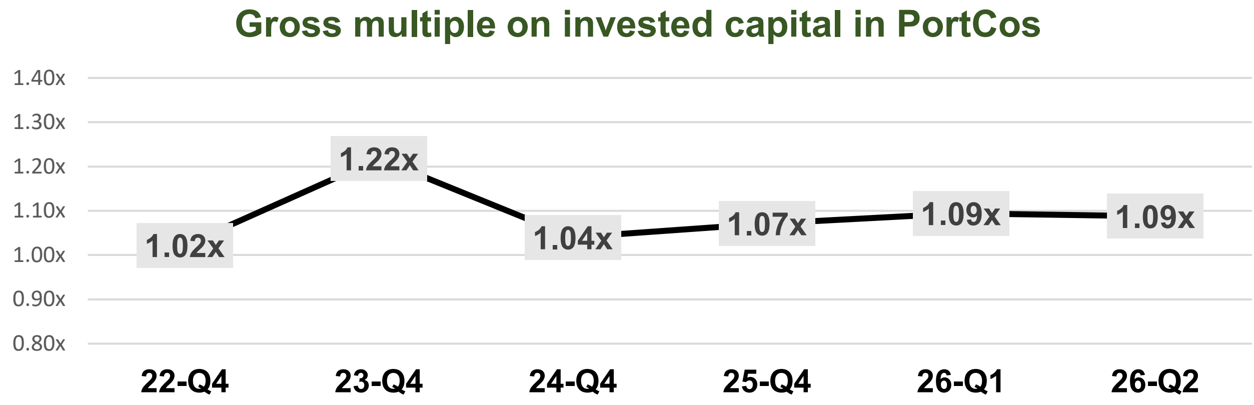


(1) Net Asset Value (NAV) = Fund Assets – Fund Liabilities. The Valuation Committee approved the NAV on 14 August 2026, and agrees that the procedures, principles and methodologies of valuation is in accordance with the Valuation Policy, and thus in-line with acceptable accounting practices and market practice; and the pricing information, the calculation and conclusions related to the valuation were sufficiently documented. Fund Assets = FMV of Investments + Cash & Cash Equivalents. Fund Liabilities = Short-Term Liabilities + Long-Term Liabilities. See section "Periodic reporting obligations" for further details.

Fund Return Multiples

	Q1-2026 (reference)		Q2-2026	
	NOK-denominated	Local Currency	NOK-denominated	Local Currency
DPI (Distribution to Paid-in Capital)	0.00x	0.00x	0.00x	0.00x
RVPI (Residual Value[1] to Paid-in Capital)	0.99x	0.99x	0.98x	0.99x
TVPI[2] (Total Value to Paid-in Capital)	**0.99x**	**0.99x**	**0.98x**	**0.99x**

(1) Residual value or NAV (= Fund assets - Fund liabilities) is the fair market value of the Fund's investment positions plus other fund assets (e.g. cash) less fund liabilities (e.g. account payables).
(2) TVPI = DPI + RVPI



(1) Considers the FX-adjusted value of each portfolio investment, i.e. "NOK-denominated"

Sum			**377.2**	**411.6**	**413.7**				

(1) Ownership includes all equity instruments held by the Fund, i.e. ordinary shares, preference shares and convertible debt instruments (excl. however compensation warrants held to protect against breach of representation & warranties).

Portfolio Companies

Alva Industries (“Alva”)

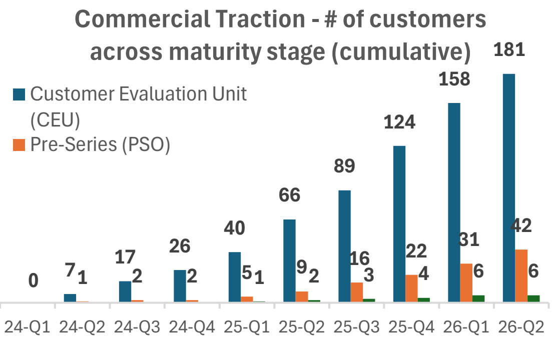
Alva was founded with a vision of electrifying the world through a unique production technology for electric motors. Alva designs and manufactures high-performance electric frameless motors for industrial & defense applications, using its patented stator production technology (FiberPrinting™).

The unique production technology revolutionizes the way electric motors can be designed & produced, introducing a new benchmark for custom motor development & time-to-market in small & high lot sizes alike. As an added benefit, the FiberPrinting™ production process also allows Alva to pack more power into ironless motors than any current alternatives, enabling the company to offer its clients electric drive systems with competitive technical performance & energy efficiency characteristics, without compromising longevity or reliability.

The Fund has in total invested NOK 66.3m, corresponding to an ownership stake of 15.13% (non-diluted) / 12.74% (fully-diluted).

Quarter in brief

- Strong commercial results with the company exceeding quarterly targets in new customer evaluation units acquisition. 181x customers are part of Alva’s qualification program having bought customer evaluation units (up from 158x in Q1-26). 42x customers have proceeded to pre-series stage (up from 31x in Q1-26). 6x customers have proceeded to first commercial production order stage (vs 6x in Q1-26).



- Concluded EUR 16 million equity raise, bringing in a strong consortium of investors and fresh capital to fuel the company’s next phase of growth.

Key milestones to be achieved in the next quarter(s)

- Reach the FY26 budget of clients in qualification funnel and continue to advance existing leads.
- Delivery of products to customers in accordance with PO and specs.
- Scale production capacity to meet growth targets.

ESG drivers and impact

Alva’s iron-less frameless motors helps industrial customers improve its energy efficiency and energy & material use

SDGs alignment: 9 and 12

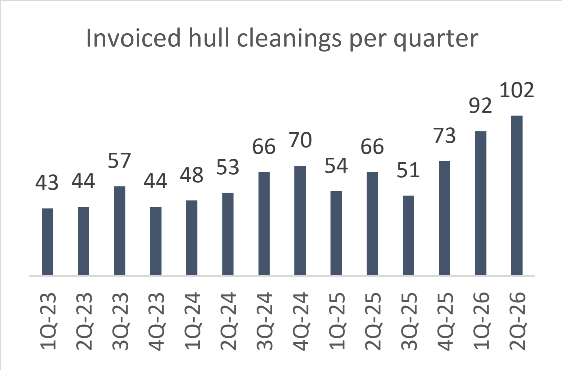
C-Leanship ("CLS")

CLS is a leading provider of underwater vessel inspection and cleaning services using state of the art remotely operating vehicles ("ROV's"). The company is headquartered in Køge, Denmark, with two operating hubs in Singapore and Busan. The game plan is focused on expansion by scaling existing services, diversifying the revenue base and targeting new customer segments.

The Fund has in total invested NOK 73.3m (USD 7.09m) in CLS, corresponding to an ownership stake of 11.16% (non-diluted) / 11.16% (fully-diluted).

Quarter in brief

- In Q2 2026, CLS completed 102 hull cleanings, a 11% growth from Q1 2026 and another record high quarter for the company.
- Propellor cleanings also reached an all-time high with 61 completed during the quarter, up from 41 in Q1 2026.
- The quarter was defined by continued strong operational excellence and commercial breakthroughs.



Key milestone to be achieved in the next quarter(s)

- Upgrade existing hull cleaning units to handle higher currents to increase operational envelope.
- Initiate partnership with supplier and call off first orders for next generation ShipShiner ROVs.
- Digital transformation: Launch online customer portal to enable fleet-wide visibility, automated documentation and AI insights to elevate customer experience in order to enable new revenue stream and drive customer loyalty.
- Remote operations pilot test.
- Initiate partnership agreements with major port services suppliers.

Company information

Website:	https://c-leanship.com/
HQ:	Køge, Denmark
No. of employees (EOY-25):	62
Sector:	Ocean Space
Phase:	Venture (Series A+)
Audited Revenues (2025)	NOK 56.4 million[2]
Audited EBITDA (2025)	NOK (39.9) million[5]

About CLS

Business model	**Game plan**	**Market size**
Tech-enabled service	*Global roll-out*	*2022: $550M → 2025: $1.1B (~2-3x)*

Product portfolio

ROV hull cleaner | *ROV propellor cleaner* | *Inspection services*

Key customers

MAERSK, MOL, CMA CGM, NYK LINE, MSC, ONE

Technology and differentiation

- Based on ROV technology from SAAB, CLS has developed a 2nd generation ROV hull cleaner with a closed loop filtration system
- Superior in terms of speed, reliability and accuracy, the ability to clean during port operation/bunkering and meet future environmental requirements, makes CLS's solution a game changer in biofouling management

ESG drivers and impact

CLS's state of the art ROVs reduce air and water pollution in the shipping sector. Effective cleaning of the hull also reduces a vessel's fuel consumption by ~5%

SDGs alignment: 13 and 14

[2] FX rate (USD/NOK) as of 31. Dec. 2025.

Umoe Advanced Composites ("UAC")

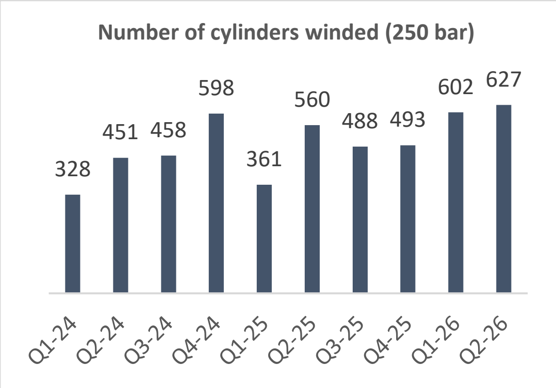
UAC develops and manufactures advanced type IV glass fibre pressure vessels, offering lightweight and cost-efficient solutions for containment, storage and distribution of large volumes of industrial gases such as hydrogen and methane (CBG/CNG).

Glass fibre is significantly less costly than for example carbon fibre. Moreover, due to its weight advantage, glass fibre can transport 2-3 times more hydrogen compared to similar-sized tanks in steel, representing major cost and environmental benefits. The game plan encompasses production scale-up in Norway, geographical expansion through the Chinese JV facility, technological innovation and assessing vertical/ horizontal growth avenues.

The Fund has in total invested NOK 77.5m, corresponding to an ownership stake of 10.83% (non-diluted) / 10.48% (fully-diluted).

Quarter in brief

- New CCO in place, and ongoing recruitment for new CFO.
- In 2Q-26, UAC Norway produced 627 cylinders (250-bar equivalent) vs 602 in 1Q 26, which is somewhat below the production plan for the quarter.



- Secured type approvals for E8 250b and 450b cylinders.
- Secured export certification for the Chinese J/V plant to serve APAC markets, with commercial production commencing this quarter.
- Secured first order for the Chinese factory.
- Delivery on certain orders anticipated for 4Q which were pushed out due to delayed certification approvals.

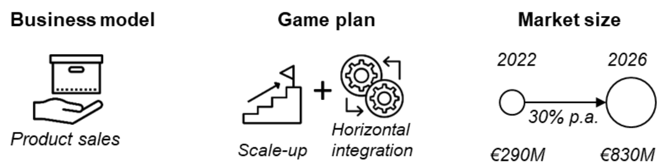
Key milestone to be achieved in the next quarter(s)

- Continue expansion of global market position in target geographies, diversification of compressed gas applications beyond H2 (incl. biogas, CNG) and entry into the maritime segment.
- Strengthening and reorganisation of the sales division.
- Continue organisational build-up in the J/V factory in China for operational, technical and sales excellence.
- Secure domestic license for delivery to the Chinese market.

Company information

Website:	https://www.uac.no/
HQ:	Kristiansand, Norway
No. of employees (EOY-25)	69 (excl. UAC China JV)
Sector:	Transition Acceleration
Phase:	Early Growth
Audited Revenues (2025)	NOK 294 million (excl. UAC China JV)
Audited EBITDA (2025)	NOK 24 million (excl. UAC China JV)

About UAC



Product portfolio

Storage and transport solutions for hydrogen, CNG, biogas

Key customers

H2energy, Air Liquide, Gasum, Hydrospider, RYSE, Linde, Woikoski, Everfuel

Technology and differentiation

- UAC has since inception in 2006 developed and refined glass fibre weaving to develop cylinders that can hold compressed gases at >425 bar at half the price of competing (carbon fibre) solutions.

ESG drivers and impact

By developing cost effective standardized containers for the transportation of hydrogen, UAC accelerates the adoption to clean hydrogen and enables the energy transition.

SDGs alignment: 7 and 11

7 AFFORDABLE AND CLEAN ENERGY
11 SUSTAINABLE CITIES AND COMMUNITIES

Sikom Connect AS (“Sikom”) (formerly Futurehome)

Sikom Connect is a smart home energy management company focusing on energy efficient solutions in households and cabins. Through the core product, power management application (“Strømkontroll”), a smart hub that connects to and controls a wide range of energy consuming devices, consumers can centralise, automate, and monitor household appliances’ power consumption.

In June 2025, FHSD Connect AS acquired the Futurehome AS bankruptcy estate and in December 2025, the merger between FSHD Connect and Sikom was successfully completed. The game plan is the continued growth of the customer subscription base and expansion into Nordic and European markets.

The Fund has in total invested NOK 69m. Post its bankruptcy, continuation through FHSD and the subsequent merger of FHSD into Sikom, the Fund has an ownership stake of 5.04% (non-diluted) / 4.94% (fully-diluted).

Quarter in brief

- The company reached its revenue target for the quarter, but is behind on EBITDA due to lower margins on hardware sales than budgeted.
- Continued strong driven primarily by the announced shutdown of the 2G network, and inbound sales.

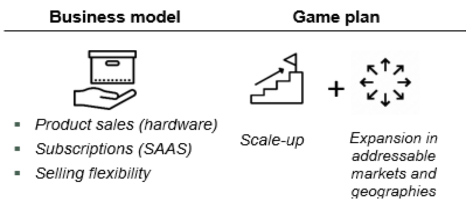
Key milestone to be achieved in the next quarter(s)

- Execute on existing growth strategy in Norway and preparations to enter the Swedish market.
- Conclude on inorganic growth initiatives.

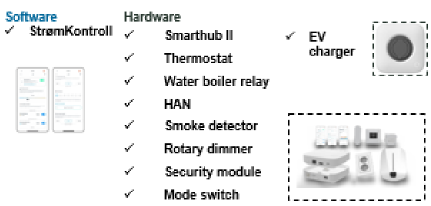
Company information

Website:	https://www.sikom.no
HQ:	Oslo / Trondheim Norway
No. of employees (EOY-25):	17
Sector:	Electrification
Phase:	Venture (Series B)
Unaudited Revenues (2025)[3]	NOK 46 million
Unaudited EBITDA (2025)[3]	NOK 8.5 million

About Sikom



Product portfolio



Key partners/customers

- ***Installers***
- ***Electricians***
- ***Platforms (Google Play)***

Technology and differentiation

- Sikom’s energy management solution is centered around a smart centralized hub that offers household energy management solutions in a safe and secure way
- Unique positioned to sell flexibility to local and national grid owners (with incentives to household)

ESG drivers and impact

By offering substantial energy savings to households through lower energy consumption, Futurehome will enable the transition to sustainable cities and urban communities through building smarter homes.

SDGs alignment: 7, 9 and 11

[3] The figures does not include financials from Futurehome AS

Heimdall Power ("HP")

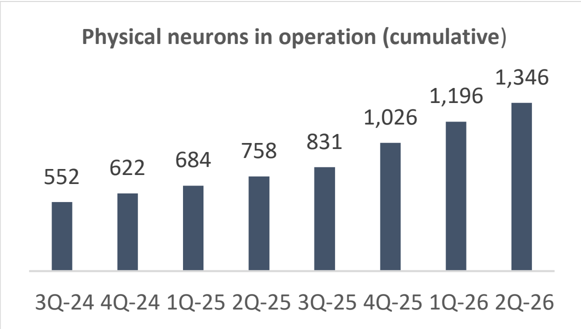
Heimdall Power offers dynamic line rating ("DLR") and ambient adjusted rating services to utilities across the globe. The company has a global customer base across Europe, North America and Asia.

To enable real-time operational insights for grid operators, HP combines hardware and software by delivering sphere-shaped sensors ("neurons") powered by advanced software that collect data and enable increased grid capacity and improved grid operations and planning. The company has also developed a proprietary automated drone installation technique, enabling safe and efficient deployment even in challenging terrains.

The Fund has in total invested NOK 48m, corresponding to an ownership stake of 9.95% (non-diluted) / 9.03% (fully-diluted).

Quarter in brief

- During the quarter, 150 additional neurons were installed on customers' lines (down from 170 in Q1-26).
- The company grew the installed base of physical neurons (sensors) in operation to 1346 (up 13% from Q1-26).



- Recognized revenues during the quarter were NOK 13.1m, while order intake was NOK 12.7m.
- Up-sell to N-ergie and Statnett during the quarter.
- New customers during the quarter include Tenessee Valley (US).

Key milestone to be achieved in the next quarter(s)

- Finalize on-prem software solution for non-cloud customers
- Secure call-offs from major frame agreements won over the past quarters.
- Secure projects with customers in the US eligible for SPARK funding to upgrade power grids using advanced transmission technologies ($1.9b US federal grant)

Company information

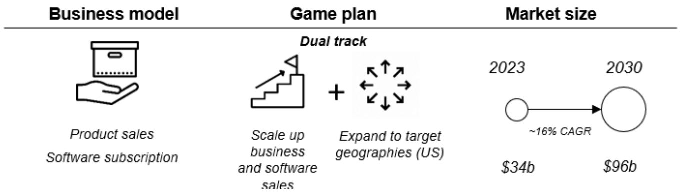
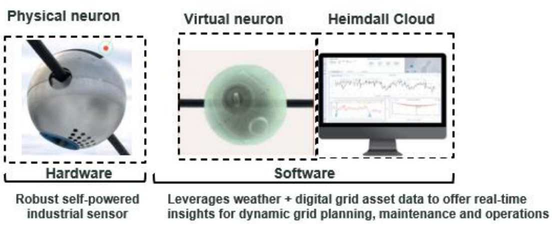
HQ:	Oslo, Norway
No. of employees (EOY-25):	69 (incl. FTE equivalent consultants)
Sector:	Electrification
Phase:	Late Venture (Series B+)
Audited Revenues (2025)	NOK 46.4 million
Audited EBITDA (2025)	NOK (72.9) million

About Heimdall Power



Product portfolio



Key customers

Elvia, Rte, Xcel Energy, Statnett, FINGRID, Great River Energy, Fagne, APG, Tenaga Nasional, enel, swissgrid

Technology and differentiation

- Heimdall uses a combination of hardware sensors and software monitoring by deploying physical and virtual neurons onto customer's grids.
- Accurate sensors that detect temperature, icing, sagging, and faults on the line.
- Autonomous drone installations of neurons without need to turn off the power grid.

ESG drivers and impact

- *Accelerates the energy transition by improving capacity of and optimizing the utilization of power grids.*
- *Enabling safer and more efficient operations with HSE benefits*

SDGs alignment: 9, 11 and 12

Maritime Robotics ("MR")

Maritime Robotics is a global provider of turnkey sea drones and autonomous navigation systems to third party vessels, serving customers across maritime applications in the civil hydrography, defense & security, offshore energy, fishery and transportation & logistics segments.

Maritime Robotics is reshaping the future of maritime operations through an innovative product portfolio and technology that enables remote, onshore control and monitoring of unmanned sea drones. Its solutions deliver significant operational, energy, and cost efficiencies - offering customers improved HSE outcomes, cost savings from increased efficiency, reduced fuel consumption and emissions, and enhanced operational capabilities.

The Fund has in total invested NOK 43m, corresponding to an ownership stake of 8.68% (non-diluted) / 8.21% (fully-diluted).

Quarter in brief

- Closing of NOK 287 million growth equity round led by Mustard Seed + Partners, a UK-based investor, with participation from existing major shareholders to fuel the company's expansion.
- Performance is on track to meet the full-year budget.
- 1H-26 delivering 49% revenue growth compared with 1H-25.

Key milestone to be achieved in the next quarter(s)

- Closing of a follow-on investment from a reputable European investor in the dual use space.
- Positioning manufacturing, product development and sales capabilities to support and enable significant growth.
- Explore adjacent markets and operational domains which the company's core autonomous navigation technology platform can be used.

Company information

Investment Advisory Committee	Adele Christensen Os (Head), Andrew Robbins, Carl Hall, Oscar Spieler
Compliance Committee	Hilde Høksnes (Head), Andreas Marø, Charmaine Lee
Valuation Committee	Jonas Myklebost (Head), Andreas Marø [5]

Investment Strategy

The Fund seeks to build a diverse portfolio of industrial cleantech companies in the Nordics that delivers a positive impact on environmental, social and governance matters and provides the Fund investors with long-term capital appreciation with best-in-class risk-adjusted returns. To achieve this, the Fund is looking for businesses with the following common features:

- Entrepreneurial management team with execution capabilities and track-record;
- Business model that contributes to resource efficiency and/or accelerates the energy transition;
- Proven technology, product or service on the brink of commercialization or having reached the commercialization phase with moderate technical risk;
- Asset-light business model with a clear competitive advantage that enables a scalable growth potential;
- Ownership plan that can be successfully effectuated with limited reliance on government or public institutions (i.e. in relation to subsidies, framework amendments, licenses/permits);
- More than one revenue stream, hereunder the potential of selling multiple products, services or technologies to multiple markets; and
- Businesses that can be positioned for divestment to industrial buyers.

An important part of the Manager's investment philosophy is the "1x/4x" principle: in every investment the Manager makes, we strive to protect the invested capital (1x) and at the same time achieve 4x on invested capital. Through privately negotiated transactions, the Manager seeks to ensure the execution of rigorous and detail-oriented due diligence processes, agreement with existing shareholders and management on an ownership plan, and regulation of material terms and conditions in the shareholders' agreement and subscription/investment agreement that provides the Fund with stronger control and economic rights relative to the shareholding in the company. Throughout the ownership period, the Manager aims to actively accelerate the growth potential of the business through board representation (directly or indirectly), participation in shareholder meetings and strategy meetings, and informal interaction with the management.

Sustainable Finance Disclosure Regulation (SFDR)

As the law "Offentliggjøringsforordningen", the SFDR in Norwegian and the taxonomy ("taksonomien") entered into force in Norway on 1 January 2023, the Board of EnvisionTech AS in the Board meeting on 22 March 2023 officially approved of the Manager's operation of NRP Green Transition I as an "Article 9" fund, pursuant to (EU) 2019/2088 (SFDR) Article 9.

The Board thereby confirms the Fund's commitment to making sustainable investments as its objective pursuant cf. SFDR Article 2 (17), designating that the investments of the Fund, as set forth in the SFDR, shall follow good governance practices, contribute to an environmental objective, and/or social objective, and not significantly harm other environmental objective or social objectives.

Based on the above, the Board approved relevant amendments made to the Fund's SFDR disclosure documents and marketing materials, so that they are in coherence with the regulatory changes as of 1 January 2023.

This information is not, and does not purport to be, complete. Please refer to the Fund's Shareholder Agreement.

[5] Valuation Committee changes effective as of 31 December 2025. The Manager thereafter amended the Valuation Policy to better reflect the valuation conduct and principles applied to maintain independence and integrity in accordance with the Fund's size, nature, and complexity and applicable international guidelines, approved by the Manager's Board on 12 March 2026.

Periodic Reporting Obligations

Annual Audited Accounts: The 2025 annual audited accounts of NRP Green Transition I AS (Fund) and VIOS 224 AS (100% owned by the Fund) have been delivered to the shareholders in the Fund on 20 April 2026.

Tax Share Value: When calculating the taxable net wealth for the shareholders in the Fund, please use NOK 127.466 as the taxable value per share as of 31.12.2025. Please note that the tax share value of an investment has not been audited, and there may be changes if we receive new information from the portfolio companies.

Annual ESG report: In accordance with regulatory requirements, the report has been delivered to the Fund investors on 30 June 2026.

Assets subject to special arrangements due to illiquidity (*AIF § 4-3(1.a)*): None of the Fund's assets are subject to special arrangements arising from their illiquid nature.

Liquidity Management (*AIF § 4-3(1.b)*): The Fund is an unleveraged closed-ended AIF and thus this disclosure is not applicable.

Risk Management (*AIF § 4-3(1.c)*):

Risk profile: An investment in the Fund carries a high degree of risk. For more information on risk factors, please see section 5.3, 8 and 10.2.3 in the information memorandum of the Fund.

The assessment of risk will be an integral part of the due diligence process carried out in conjunction with each investment in the portfolio. The Manager has the overall responsibility for risk management following duties pursuant to the AIFM Act and as further described in the Fund Shareholder Agreement, the Fund Management Agreement and the Information Memorandum. The Manager seeks to identify and mitigate risk factors to reduce risk, increase value, and lower transaction costs. Further, the Manager has integrated sustainability risks into the investment decision-making process as further described in section 10.2.3 of the IM.

Risk Management Systems: In the Alternative Investment Funds Act (AIFM Act) § 3-7 it is stated that the AIF manager shall have a risk management function that is functionally and hierarchically separated from the manager's operational activities, including portfolio management. In EnvisionTech this is, among other things, carried out by having separate leaders for the Portfolio Management and the Risk Management functions. The Risk Management function shall not perform any tasks that may be in conflict with the operational activities. The Board of EnvisionTech has also adopted instructions and a routine collection in accordance with AIF act of 20 June 2014 no. 28, regulations to the AIFM act of 26 June 2014 no. 877, EU directive 2011/61/EU on AIFMD and AIFMD's associated regulation 231/2013.

The Risk management function's main task is to identify, manage and monitor all relevant and potential risks associated with the portfolio management of the funds that the Company manages. Central to this work is to facilitate, follow up and control the manager's due diligence process in the implementation of new investments. With due diligence means review, evaluation and control of the investment object's legal, technical, financial and other essential elements before the investment decision.

The Risk Management function's aim is also to support the management team in the identification and reduction of risk.

The Board of EnvisionTech has established a Risk Policy for the Fund. Central to the Risk Policy is the AIF's investment mandate, and in addition the Risk Policy contains other qualitative and quantitative management frameworks (as presented in the disclosed investor material).

Given the entry of force of the SFDR into Norway, the risk management function ensures that the Company considers sustainability risks when complying with the general requirements of the duties it performs under AIFMD Article 57.

It will work with the Company's management to integrate sustainability risks into its activities and investment strategies, and ensure that the necessary procedures and processes are in place to enable the Company to effectively manage the exposure of sustainability risks for each of the funds managed.

The Fund has its own depositary who will check the Fund's cash flows, that payments from investors in connection with subscriptions for shares have been received and that all liquid funds are booked in accounts opened in the Fund's name, amongst others.

Reporting: Ongoing reporting to the responsible functions is a key part of the Risk Management function. The purpose of these reports is to document compliance to the relevant commitments and mandates, to document non-compliance and to establish reporting lines for handling exceptions. The Risk Management function reports as follows (non-exhaustive list):

- To the compliance function of the Manager (monthly)
- To the portfolio manager of the Manager (monthly)
- To investors in the AIF (quarterly through this report)
- To the Board of the AIF (quarterly through this report and otherwise semi-annually)

- To the Board of the Manager (quarterly through this report and otherwise semi-annually)
- To the depositary (quarterly through this report and otherwise semi-annually)
- To the Financial Supervisory Authority (quarterly)

In addition, the Risk Management function is reporting continuously to the management team of the Manager and to the Depositary. The routines contain rules for escalation of the issues that the Risk Management function may uncover, including breach of an AIF's investment mandate and risk policy. The risk policy is reviewed on an annual basis.

Conflicts of Interest: AIF management entails several potential conflicts of interest that require transparency and information according to the AIF framework. The Fund shareholder agreement, adherence agreement, fund management agreement and information memorandum describe such conflicts of interest and the management of these. All entities in the NRP Group have guidelines for managing conflicts of interest in their rules and procedures. All agreements involving the Fund and agreements between entities in the NRP Group are entered into on an arm's length principle.

Given the Company's investment mandate as an Article 9 Fund manager, the Risk Management function does not currently anticipate any conflicts of interest that may arise as a result of the integration of sustainability risks into the risk management processes, systems, and internal controls.

Borrowings and guarantees (*AIF § 4-3(2)*): In accordance with clause 7.4.1 in the Fund SHA, the Fund shall not borrow monies or in other ways deploy financial gearing. However, the Fund may establish short-term credit lines and other short-term loan facilities or bridging facilities to, among other things, cover ongoing operating cost and make investments between drawdowns, subject to any drawdown or utilisation of such credit lines, short-term loan facilities and bridging facilities being repaid within twelve (12) months after each relevant drawdown and utilisation. As of the end of the reporting period, the Fund has not established such short-term debt facilities.

Valuation / NAV Q2-26:

See section "*Fund Performance*" in this report for financial details.

The Valuation Committee approved the NAV on 14 August 2026 and agreed that the procedures, principles and methodologies of valuation are in accordance with the Valuation Policy, and thus in-line with acceptable accounting practices and market practice; and the pricing information, the calculation and conclusions related to the valuation were sufficiently documented.

The equity value of each investment position is determined on a stand-alone basis by using and combining latest share issue pricing levels and generally accepted valuation methods (incl. DCF, peer review, etc) without applying any discount for lack of liquidity, lack of control, size, the existence of any shareholders agreement or similar circumstances nor any premium for potential synergies from a combination with another business.

Equity values are based on the fully diluted approach, where ordinary shares, preferred shares, convertible debt, options/warrants and other equity instruments are considered on an as-converted basis to determine the NAV or FMV per share. The NAV per share and NAV considers the FX adjusted value of each portfolio investment.

Fund Assets

Cash & Cash Eq. (incl. current assets) is valued in accordance with Norwegian GAAP and as presented through the quarterly financial statements prepared by the Fund's Business Manager (NRP Business Management AS).

The fair market value (FMV) of the Fund's ownership in:

- Alva Industries AS: Set based on latest share issue price in the Series A2 round concluded in June-26.
- C-Leanship A/S: Set based on latest share issue price, adjusted for assessment on LTM performance and NTM plans and USD/NOK FX impact.
- Umoe Advanced Composites AS: Set based on a valuation framework recommended by a third-party valuation advisor and considering UAC's LTM performance and YTD order book.
- Sikom Connect AS (formerly Futurehome AS): Set based on the completed merger of FHSD Connect AS into Sikom Connect AS through a share swap transaction, based on the average of two third-party valuation assessments prepared in connection with the merger.
- Heimdall Power AS: Set based on latest share issue pricing in connection with the completed internal bridge round funded by existing shareholders and employees.
- Maritime Robotics AS: Set based on latest share issue pricing in connection with the Series B issue concluded in June-26.

Fund liabilities:

Short-term liabilities are valued in accordance with Norwegian GAAP and as presented through the quarterly financial statements prepared by the Fund’s Business Manager (NRP Business Management AS). The Fund (incl. affiliated entities) does not have any long-term liabilities.
