NRP Green Transition I AS

Investor Report
1Q-2026

Date of report: 15 May 2026

Disclaimer

This fund update has been prepared by EnvisionTech AS (the “Manager”). The update solely aims to provide guidance and information. Under no circumstances is this update meant to be considered as a tool in financial or investment advising, hereunder recommendations of purchase or sale, with or without compensation, of financial instruments or other forms of financial assets.

The information contained herein has been obtained from sources believed to be reliable and in good faith. Manager can however not guarantee or be held financially or legally responsible for the accuracy, completeness or correctness of the information contained in this fund update. We underline that investing in venture companies in the cleantech space are associated with high risk. All investors must be prepared that such investments might result in monetary losses. Anyone who uses this update as a basis for purchasing shares at a later time must make sure that all relevant and updated information is obtained. The information in this fund update is only valid per date of preparation.

Investors are encouraged to seek advice in any type of financial investments made in private or as a corporation. Investors must comply that any statements or comments on future predictions made in this update might not occur. Hereunder, investors must understand and accept that present gains is not a guarantee for future gains. Any investment described or mentioned in this update is risk sensitive with the possibility of losses occurring.

Confidential and privileged information

Please note that the information in this document, including any information regarding our portfolio companies and their financial status, is strictly confidential. The information may not be copied or circulated to anyone but the addressed recipients without the prior written consent of the Manager. You are also reminded of the duty of confidentiality you have undertaken by signing the Fund Shareholder Agreement.

Table of Contents

Executive Summary

Fund Overview

NRP Green Transition I AS is a closed-end late stage venture capital fund dedicated to building a portfolio of Nordic industrial cleantech investment positions primarily through investments in shares and other equity and equity-like instruments (the "**Fund**"). The Fund is managed by EnvisionTech AS (the "**Manager**").

The investment objective of the Fund is to achieve long term capital appreciation through making sustainable investments within the meaning of SFDR Article 2 (17) and build a diversified portfolio with an attractive risk/return profile, targeting a return on invested capital of 4.0x.

Through investing in capital light companies with moderate technical risk, the Fund aims to deliver positive impact and enhance long-term returns through a robust strategy and approach to active ownership.

Fund Economics & Performance

Capital calls & deployment

- In Q1-26, NOK 10.0 million was called from shareholders to fund management fees payable to EnvisionTech, other operating expenses, and retain liquidity for follow-on investments in the existing portfolio.[1]
- Total paid-in-capital stands at NOK 402.8 million, corresponding to 90.2% of total commitments.

Net Asset Value & Multiple on invested capital

- The NAV, adjusted for foreign exchange rates, is set to NOK 493.5 per share (vs. NOK 485.7 in Q4-25), equivalent to NOK 397.6 million and corresponding to a 1.3% discount on the average cost price of the shares.
- The gross multiple of invested capital in portfolio companies is set to 1.09x (vs. 1.07x in Q4-25).

Market Comment & Deal Pipeline

Key highlights on relevant deal flow and transactions in Q1 2026:

- Based on the briefing from Cleantech for Europe, EU cleantech venture and growth investment fell to €1.3 billion in Q1 2026, down from €2 billion in Q4 2025 and well below the 2024 quarterly average of €2.2 billion.[2]
- Total EU deal volume dropped to 62 deals — the lowest quarterly count since 2017 — with late-stage activity contracting to just 15 Series B and growth equity deals, down from an average of 20 per quarter in 2025. Average deal size fell to €20 million, from €24 million in Q4 2025.
- Energy & Power was a dominant sector, accounting for 62% of all Q1 venture and growth investment, reflecting the prioritisation of electrification and industrial decarbonisation technologies amid energy security concerns.
- Notable capital rounds this quarter include Entrix, a German battery optimization (secured €42m) and Axelera AI, Dutch chip company for energy efficient computing (secured €214m).

Regulatory / Policy developments

- The European Commission unveiled AccelerateEU, a five-pillar energy strategy addressing Europe's exposure of €340 billion in fossil fuel imports in 2025, with electrification at its core - encompassing the Grids Package, Electrification Action Plan, and Geothermal Action Plan.

Deal flow

The below table exhibits the development of EnvisionTech's deal flow from Q4-2025 to Q1-2026, split on industry, capital phase and country.

Key Events in Q1 2026

Envision SPV I AS completes first close

Envision SPV I AS completes a first close of NOK 39m on 13th March 2026 to execute on follow-on investments in Maritime Robotics, Alva Industries and Heimdall Power.

On the back of solid commercial traction in these three companies, EnvisionTech's Fund I has limited available capital to deploy follow-on capital to increase exposure. To capitalize on the over-allocation available to EnvisionTech as lead investor, the Manager is structuring this opportunity through an SPV with the purpose of investing in the available over-allocation in upcoming funding rounds of these three companies, The SPV will be offered to existing and a selected group of new investors.

The Manager is working towards a second close of the SPV. The target fund size is NOK 100m.

Key Events after the Reporting Period

Maritime Robotics raises significant growth capital as autonomous sea drones move into large-scale adoption

Maritime Robotics, a leading provider of autonomous maritime systems, has entered into an agreement to secure significant growth capital from a UK-based growth equity investor, with continued support from the existing shareholder base, including EnvisionTech. The transaction is expected to close prior to summer, with further details to be communicated in due course.

Heimdall Power completes a NOK 80-100m Internal Round with NOK 79.2m from major shareholders

Heimdall Power completed an internal round of NOK 80-100m, whereby NOK 79.2m was committed from existing major shareholders and the remainder from employees and other shareholders. Proceeds will be used to execute on the business plan and take the company to cash-positive operations.

Ongoing portfolio value enhancing initiatives

The EnvisionTech team is finalizing one other separate value enhancing initiative in the portfolio that will strengthen the growth journey of the company and substantiate the values of Fund I portfolio going forward.

We aim to be able to share news on this initiative in the upcoming quarterly report for Q2-26.

Fund Performance

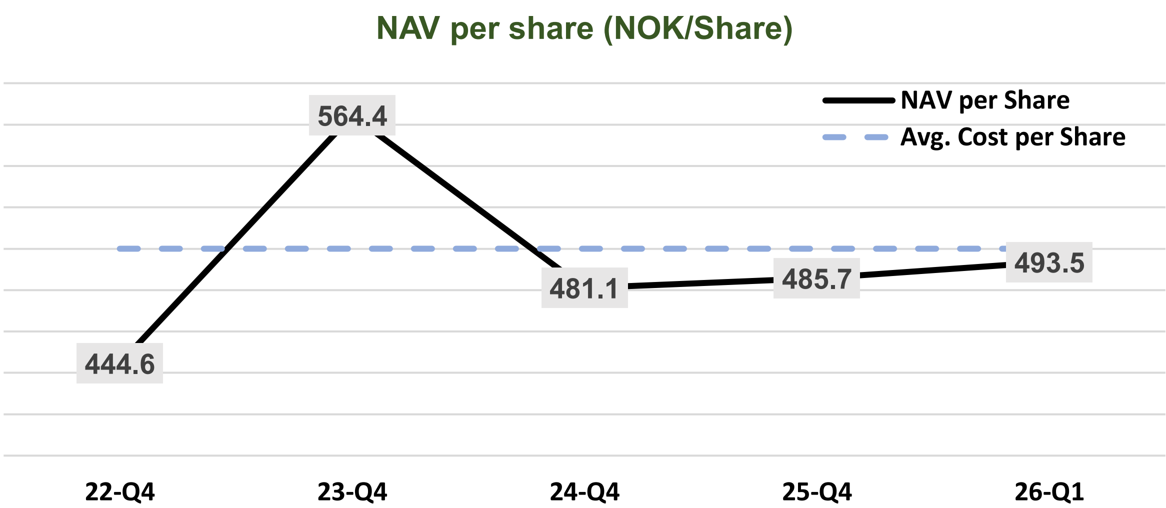
Fund Cash Flows

NOK million	Q1-2026	YTD	Accumulated[2]	% of total commitments
Commitments	-	-	446.7	100.0%
Paid-in capital	10.0	10.0	402.8[1]	90.2%
Recallable distributions	-	-	-	0.0%
Available for drawdown	**-**	**-**	**43.9**	**9.8%**
Invested in portfolio companies	-	-	355.2	79.5%
Additional allocated/committed	-	-	-	0.0%
Total investments	**-**	**-**	**355.2**	**79.5%**
Distributed to fund investors	-	-	-	0.0%
Distributed to founder	-	-	-	0.0%
Total distributions	**-**	**-**	**-**	**0.0%**

(1) NOK 20.0 million by Founder and NOK 372.8 million by Fund investors. (2) The latest drawdown of NOK 14.2m concluded in April-26 shall be reflected in the Q2-26 report together with the Fund's follow-on investments in Maritime Robotics and Heimdall Power, which are formally concluded in Q2-26.

Fund Net Asset Value (NAV)[1]

	22-Q4	23-Q4	24-Q4	25-Q4	26-Q1
Capital Called (cum.) (NOKm)	73.0	281.1	376.1	392.8	402.8
NAV, FX Adj. (NOKm)	64.9	317.3	361.9	381.6	397.6
Absolute return (%)	-11.1%	12.9%	-3.8%	-2.9%	-1.3%



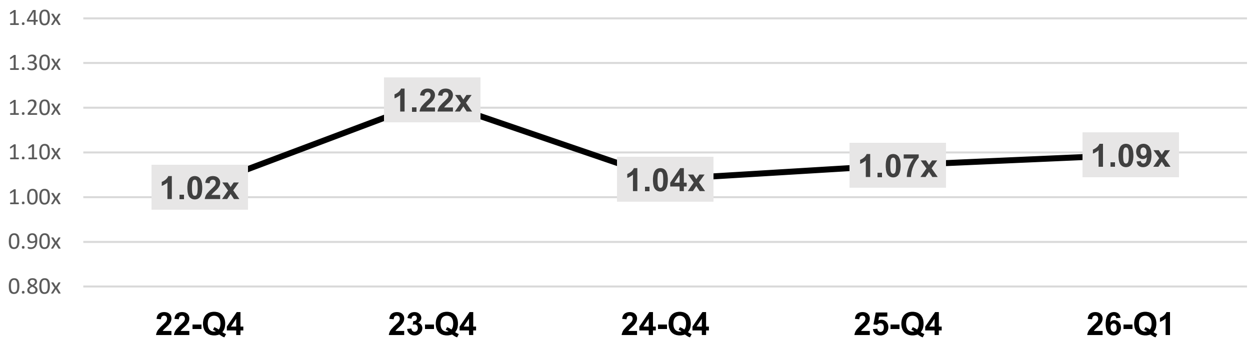
(1) Net Asset Value (NAV) = Fund Assets – Fund Liabilities. The Valuation Committee approved the NAV on 15 May 2026, and agrees that the procedures, principles and methodologies of valuation is in accordance with the Valuation Policy, and thus in-line with acceptable accounting practices and market practice; and the pricing information, the calculation and conclusions related to the valuation were sufficiently documented. Fund Assets = FMV of Investments + Cash & Cash Equivalents. Fund Liabilities = Short-Term Liabilities + Long-Term Liabilities. See section "Periodic reporting obligations" for further details.

Fund Return Multiples

	Q4-2025 (reference)		Q1-2026	
	NOK-denominated	Local Currency	NOK-denominated	Local Currency
DPI (Distribution to Paid-in Capital)	0.00x	0.00x	0.00x	0.00x
RVPI (Residual Value[1] to Paid-in Capital)	0.97x	0. 97x	0.99x	0.99x
TVPI[2] (Total Value to Paid-in Capital)	**0. 97x**	**0. 97x**	**0.99x**	**0.99x**

(1) Residual value or NAV (= Fund assets - Fund liabilities) is the fair market value of the Fund's investment positions plus other fund assets (e.g. cash) less fund liabilities (e.g. account payables).
(2) TVPI = DPI + RVPI

Gross multiple on invested capital in PortCos



(1) Considers the FX-adjusted value of each portfolio investment, i.e. "NOK-denominated"

(1) Ownership includes all equity instruments held by the Fund, i.e. ordinary shares, preference shares and convertible debt instruments (excl. however compensation warrants held to protect against breach of representation & warranties). (2) The latest follow-on investments by the Fund into Maritime Robotics and Heimdall Power were formally concluded in Q2-26. The investment amounts and impact on ownership shall therefore be reflected in the Q2-26 report. (3) Samsung's investment of €3m into Alva Industries was completed in the form of a convertible SAFE instrument and shall be reflected as soon as a qualified financing event takes place where it shall convert into equity ownership.

Portfolio Companies

Alva Industries ("Alva")

Alva was founded with a vision of electrifying the world through a unique production technology for electric motors. Alva designs and manufactures high-performance electric frameless motors for industrial & defense applications, using its patented stator production technology (FiberPrinting™).

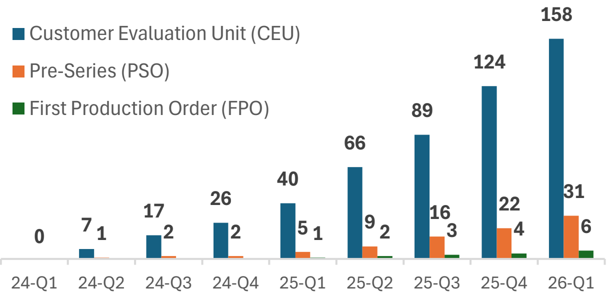
The unique production technology revolutionizes the way electric motors can be designed & produced, introducing a new benchmark for custom motor development & time-to-market in small & high lot sizes alike. As an added benefit, the FiberPrinting™ production process also allows Alva to pack more power into ironless motors than any current alternatives, enabling the company to offer its clients electric drive systems with competitive technical performance & energy efficiency characteristics, without compromising longevity or reliability.

The Fund has in total invested NOK 60.3m since the initial investment of NOK 10 million[3] that was concluded in April-2022.

Quarter in brief

- Strong commercial results with the company exceeding quarterly targets in new customer evaluation units acquisition. 158x customers are part of Alva's qualification program having bought customer evaluation units (up from 124x in Q4-25). 31x customers have proceeded to pre-series stage (up from 22x in Q4-25). 6x customers have proceeded to first commercial production order stage (up from 4x in Q3-25).

Commercial Traction - # of customers across maturity stage (cumulative)



Key milestones to be achieved in the next quarter(s)

- Reach the FY26 budget of clients in qualification funnel and advance existing leads.
- Delivery of products to customers in accordance with PO and specs.
- Scale production capacity to meet growth targets.
- Finalize capital raise

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

[3] In accordance with the Fund Shareholder Agreement, Alva was transferred to the Fund at cost price plus 8% p.a. interest from the date it was acquired until it was transferred.

C-Leanship ("CLS")

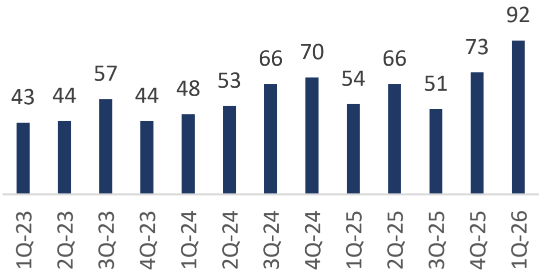
CLS is a leading provider of underwater vessel inspection and cleaning services using state of the art remotely operating vehicles ("ROV's"). The company is headquartered in Køge, Denmark, with two operating hubs in Singapore and Busan. The game plan is focused on expansion by scaling existing services, diversifying the revenue base and targeting new customer segments.

The Fund has in total invested NOK 73.3m (USD 7.09m) in CLS since the initial investment of NOK 50.75m (USD 5m)[4] was concluded in July 2022.

Quarter in brief

- In Q1 2026, CLS completed 92 hull cleanings, a 25% growth from Q4 2025 and a record quarter for the company.
- Propellor cleanings also reached an all-time high with 41 completed during the quarter, up from 33 in Q4 2025.
- The quarter was defined by continued strong operational excellence and commercial breakthroughs with March being the first month of positive EBITDA for the company since inception.
- The operational excellence level established in the previous quarter continued in Q1, with only two partial cleanings in Korea, while Singapore had its fifth consecutive month of 100% completions
- Onboarded new CPIO (Chief Product Innovation Officer) during the quarter

Invoiced hull cleanings per quarter



Key milestone to be achieved in the next quarter(s)

- Upgrade existing hull cleaning units to handle higher currents to increase operational envelope.
- Initiate partnership with supplier and call off first orders for next generation ShipShiner ROVs
- Digital transformation: Launch online customer portal to enable fleet-wide visibility, automated documentation and AI insights to elevate customer experience in order to enable new revenue stream and drive customer loyalty.
- Remote operations pilot test.
- Initiate partnership agreements with major port services suppliers.

Company information

HQ:	Køge, Denmark
No. of employees (EOY-25):	62
Sector:	Ocean Space
Phase:	Venture (Series A+)
Unaudited Revenues (2025)	NOK 56.4 million[5]
Unaudited EBITDA (2025)	NOK (39.9) million[5]

About CLS

Product portfolio

Key customers

MAERSK, MOL, CMA CGM, NYK LINE, MSC, ONE

Technology and differentiation

- Based on ROV technology from SAAB, CLS has developed a 2nd generation ROV hull cleaner with a closed loop filtration system
- Superior in terms of speed, reliability and accuracy, the ability to clean during port operation/bunkering and meet future environmental requirements, makes CLS's solution a game changer in biofouling management

ESG drivers and impact

CLS's state of the art ROVs reduce air and water pollution in the shipping sector. Effective cleaning of the hull also reduces a vessel's fuel consumption by ~5%

SDGs alignment: 13 and 14

[4] In accordance with the Fund Shareholder Agreement, CLS was transferred to the Fund at cost price plus 8% p.a. interest from the date it was acquired until it was transferred.

[5] FX rate (USD/NOK) as of 31. Dec. 2025.

Umoe Advanced Composites ("UAC")

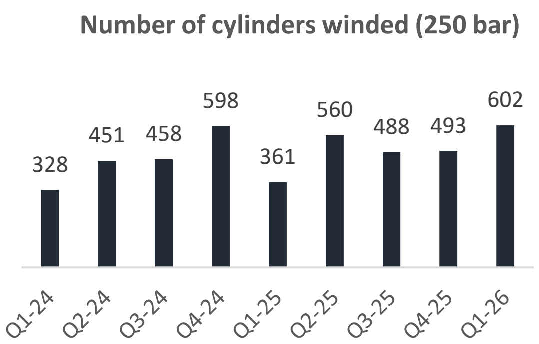
UAC develops and manufactures advanced type IV glass fibre pressure vessels, offering lightweight and cost-efficient solutions for containment, storage and distribution of large volumes of industrial gases such as hydrogen and methane (CBG/CNG).

Glass fibre is significantly less costly than for example carbon fibre. Moreover, due to its weight advantage, glass fibre can transport 2-3 times more hydrogen compared to similar-sized tanks in steel, representing major cost and environmental benefits. The game plan encompasses production scale-up in Norway, geographical expansion through the Chinese JV facility, technological innovation and assessing vertical/ horizontal growth avenues.

The Fund has in total invested NOK 77.5m since the initial investment was concluded in January 2023.

Quarter in brief

- New CEO - Lars Erik Lundøe in place.
- In 1Q-26, UAC Norway produced 602 cylinders (250-bar equivalent) vs 493 in 4Q 25', which is somewhat below the production plan for the quarter.



- Secured type approvals for E8 250b and 450b cylinders.
- Secured export certification for the Chinese J/V plant to serve APAC markets, with commercial production commencing this quarter.
- Secured first order for the Chinese factory.
- Delivery on certain orders anticipated for 4Q which were pushed out due to delayed certification approvals.

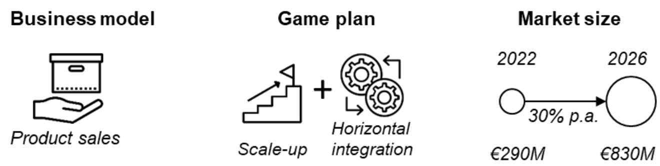
Key milestone to be achieved in the next quarter(s)

- Continue expansion of global market position in target geographies, diversification of compressed gas applications beyond H2 (incl. biogas, CNG) and entry into the maritime segment.
- Strengthening and reorganisation of the sales division.
- Continue organisational build-up in the J/V factory in China for operational, technical and sales excellence.
- Secure domestic license for delivery to the Chinese market.

Company information

Website:	https://www.uac.no/
HQ:	Kristiansand, Norway
No. of employees (EOY-25)	67 (excl. UAC China JV)
Sector:	Transition Acceleration
Phase:	Early Growth
Unaudited Revenues (2025)	NOK 296.5million (excl. UAC China JV)
Unaudited EBITDA (2025)	NOK 24.6 million (excl. UAC China JV)

About UAC



Product portfolio

Storage and transport solutions for hydrogen, CNG, biogas

Key customers

Technology and differentiation

- UAC has since inception in 2006 developed and refined glass fibre weaving to develop cylinders that can hold compressed gases at >425 bar at half the price of competing (carbon fibre) solutions.

ESG drivers and impact

By developing cost effective standardized containers for the transportation of hydrogen, UAC accelerates the adoption to clean hydrogen and enables the energy transition.

SDGs alignment: 7 and 11

Sikom Connect AS (“Sikom”) (formerly Futurehome)

Sikom Connect is a smart home energy management company focusing on energy efficient solutions in households and cabins. Through the core product, power management application (“Strømkontroll”), a smart hub that connects to and controls a wide range of energy consuming devices, consumers can centralise, automate, and monitor household appliances’ power consumption.

In June 2025, FHSD Connect AS acquired the Futurehome AS bankruptcy estate and in December 2025, the merger between FSHD Connect and Sikom was successfully completed. The game plan is the continued growth of the customer subscription base and expansion into Nordic and European markets.

The Fund invested NOK 69m in Futurehome. Post its bankruptcy and the successful merger of FHSD into Sikom, the Fund has a stake of 5.04% in Sikom.

Quarter in brief

- With the merger completed, the Company has now more than 50,000 subscribers.
- The quarter was characterized by high commercial activity and strong financial performance above budget for both revenue and EBITDA.
- Strong demand has been driven primarily by the announced shutdown of the 2G network, and inbound sales.
- Sold former Futurehome MDU activity (defined as non-core).

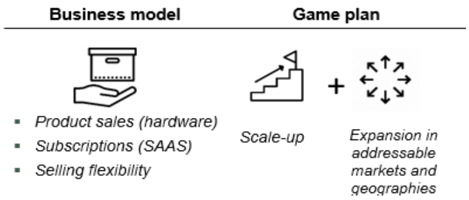
Key milestone to be achieved in the next quarter(s)

- Execute on existing growth strategy in Norway and preparations to enter the Swedish market.
- Continue calibrating and strengthening the merged organisation .

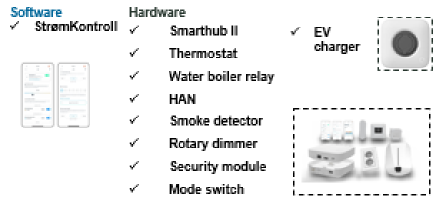
Company information

Website:	https://www.sikom.no
HQ:	Oslo / Trondheim Norway
No. of employees (EOY-25):	17
Sector:	Electrification
Phase:	Venture (Series B)
Unaudited Revenues (2025)	NOK 59 million
Unaudited EBITDA (2025)	NOK (2.3) million

About Sikom



Product portfolio



Key partners/customers

- ***Installers***
- ***Electricians***
- ***Platforms (Google Play)***

Technology and differentiation

- Sikom’s energy management solution is centered around a smart centralized hub that offers household energy management solutions in a safe and secure way
- Unique positioned to sell flexibility to local and national grid owners (with incentives to household)

ESG drivers and impact

By offering substantial energy savings to households through lower energy consumption, Futurehome will enable the transition to sustainable cities and urban communities through building smarter homes.

SDGs alignment: 7, 9 and 11

Heimdall Power (“HP”)

Heimdall Power offers dynamic line rating (“DLR”) and ambient adjusted rating services to utilities across the globe. The company has a global customer base across Europe, North America and Asia.

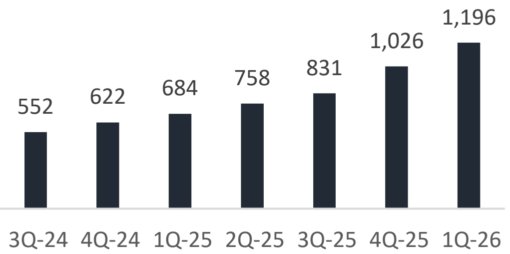
To enable real-time operational insights for grid operators, HP combines hardware and software by delivering sphere-shaped sensors (“neurons”) powered by advanced software that collect data and enable increased grid capacity and improved grid operations and planning. The company has also developed a proprietary automated drone installation technique, enabling safe and efficient deployment even in challenging terrains.

In June 2024, the Fund concluded a NOK 40m investment in Heimdall Power[6], corresponding to a fully-diluted ownership stake of ca. 9% in the company.[7]

Quarter in brief

- During the quarter, 170 additional neurons were installed on customers’ lines (down from 195 in Q4-25).
- The company grew the installed base of physical neurons (sensors) in operation to 1196 (up 17% from Q4-25).

Physical neurons in operation (cumulative)



- Recognized revenues during the quarter were NOK 12.6m, while order intake was NOK 30m.
- Significant up-sell to Bayernwerk and Swissgrid during the quarter.
- Facilties Rating Module launched.
- Won tender for Statnett (NO) with total frame agreement value of NOK ~30M (subject to call-offs)

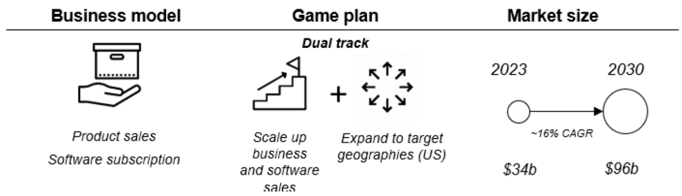
Key milestone to be achieved in the next quarter(s)

- Finalize on-prem software solution for non-cloud customers
- Secure call-offs from major frame agreements won over the past quarters.
- Secure projects with customers in the US eligible for SPARK funding to upgrade power grids using advanced transmission technologies ($1.9b US federal grant)

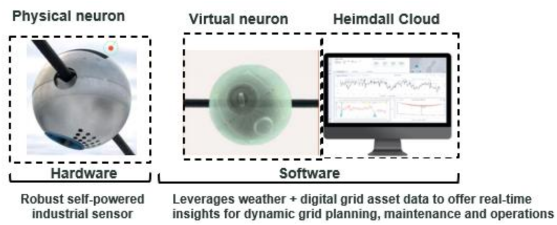
Company information

Website:	https://heimdallpower.com/
HQ:	Oslo, Norway
No. of employees (EOY-25):	69 (incl. FTE equivalent consultants)
Sector:	Electrification
Phase:	Late Venture (Series B+)
Unaudited Revenues (2025)	NOK 53.4 million
Unaudited EBITDA (2025)	NOK (86.0) million

About Heimdall Power



Product portfolio



Key customers

Technology and differentiation

- Heimdall uses a combination of hardware sensors and software monitoring by deploying physical and virtual neurons onto customer’s grids.
- Accurate sensors that detect temperature, icing, sagging, and faults on the line.
- Autonomous drone installations of neurons without need to turn off the power grid.

ESG drivers and impact

- *Accelerates the energy transition by improving capacity of and optimizing the utilization of power grids.*
- *Enabling safer and more efficient operations with HSE benefits*

SDGs alignment: 9, 11 and 12

[6] The Fund committed to a NOK 40 million investment, whereby the first tranche (NOK 30 million) was completed in June 2024. The remaining tranche (NOK 10 million) was executed in June 2025.

[7] As the internal round was completed in May-26, the Fund’s participation and ownership stake will be reflected in Q2-26 report.

Maritime Robotics ("MR")

Maritime Robotics is a global provider of turnkey sea drones and autonomous navigation systems to third party vessels, serving customers across maritime applications in the civil hydrography, defense & security, offshore energy, fishery and transportation & logistics segments.

Maritime Robotics is reshaping the future of maritime operations through an innovative product portfolio and technology that enables remote, onshore control and monitoring of unmanned sea drones. Its solutions deliver significant operational, energy, and cost efficiencies - offering customers improved HSE outcomes, cost savings from increased efficiency, reduced fuel consumption and emissions, and enhanced operational capabilities.

In August 2024, the Fund made its initial NOK 35m investment in Maritime Robotics, corresponding to a fully diluted ownership stake of 9.5%.[8]

Quarter in brief

- Maritime Robotics and Eelume are collaborating on a next-generation mine countermeasures solution, using an autonomous surface sea drone as a carrier and command platform for a swarm of autonomous underwater vehicles.
- MR's Mariner sea drone carried out multiple autonomous missions in cooperation with the Norwegian Coast Guard vessel KV Olav Tryggvason, as part of the Heimdall Artic Trials, hosted by NATO Centre of Excellence Cold Weather Operations (COE-CWO) in Norway.

Key milestone to be achieved in the next quarter(s)

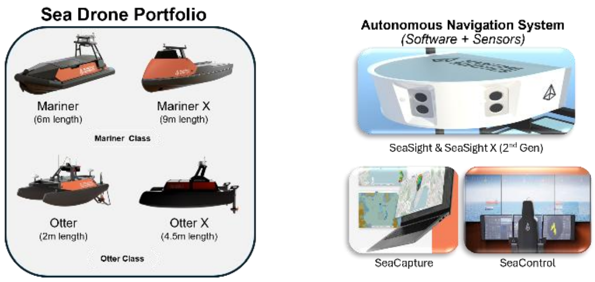
- Closing of growth capital round led by a UK-based growth equity investor.
- Positioning manufacturing, product development and sales capabilities to support and enable significant growth.
- Explore adjacent markets and operational domains which the company's core autonomous navigation technology platform can be used.

Company information

Website:	https://www.maritimerobotics.com/
HQ:	Trondheim, Norway
No. of employees (EOY-25):	125
Sector:	Ocean Space
Phase:	Early Growth
Unaudited Revenues (2025)	NOK 258.8 million
Unaudited EBITDA (2025)	NOK 24.0 million

About Maritime Robotics

Product portfolio



Select customers

Offshore (Energy) | Defense & Security | Mapping & Science

Technology and differentiation

- Market leading autonomous navigation capabilities, sought after by industrial companies and customers buying turn-key sea drones.
- Proven track-record, recognized for high reliability and customer satisfaction.
- Unique market positioning in Europe through strong partner/customer network.

ESG drivers and impact

- *Enables maritime data collection, monitoring and maintenance with lower capex, opex, fuel costs and HSE risks*

SDGs alignment: 8, 9, 13, 14

[8] The growth equity issue is expected to close in May-26. The Fund's participation and ownership stake shall therefore be reflected in Q2-26 report.

Compliance Committee	Hilde Høksnes (Head), Andreas Marø, Charmaine Lee
Valuation Committee	Jonas Myklebost (Head), Andreas Marø [10]

Investment Strategy

The Fund seeks to build a diverse portfolio of industrial cleantech companies in the Nordics that delivers a positive impact on environmental, social and governance matters and provides the Fund investors with long-term capital appreciation with best-in-class risk-adjusted returns. To achieve this, the Fund is looking for businesses with the following common features:

- Entrepreneurial management team with execution capabilities and track-record;
- Business model that contributes to resource efficiency and/or accelerates the energy transition;
- Proven technology, product or service on the brink of commercialization or having reached the commercialization phase with moderate technical risk;
- Asset-light business model with a clear competitive advantage that enables a scalable growth potential;
- Ownership plan that can be successfully effectuated with limited reliance on government or public institutions (i.e. in relation to subsidies, framework amendments, licenses/permits);
- More than one revenue stream, hereunder the potential of selling multiple products, services or technologies to multiple markets; and
- Businesses that can be positioned for divestment to industrial buyers.

An important part of the Manager's investment philosophy is the "1x/4x" principle: in every investment the Manager makes, we strive to protect the invested capital (1x) and at the same time achieve 4x on invested capital. Through privately negotiated transactions, the Manager seeks to ensure the execution of rigorous and detail-oriented due diligence processes, agreement with existing shareholders and management on an ownership plan, and regulation of material terms and conditions in the shareholders' agreement and subscription/investment agreement that provides the Fund with stronger control and economic rights relative to the shareholding in the company. Throughout the ownership period, the Manager aims to actively accelerate the growth potential of the business through board representation (directly or indirectly), participation in shareholder meetings and strategy meetings, and informal interaction with the management.

Sustainable Finance Disclosure Regulation (SFDR)

As the law "Offentliggjøringsforordningen", the SFDR in Norwegian and the taxonomy ("taksonomien") entered into force in Norway on 1 January 2023, the Board of EnvisionTech AS in the Board meeting on 22 March 2023 officially approved of the Manager's operation of NRP Green Transition I as an "Article 9" fund, pursuant to (EU) 2019/2088 (SFDR) Article 9.

The Board thereby confirms the Fund's commitment to making sustainable investments as its objective pursuant cf. SFDR Article 2 (17), designating that the investments of the Fund, as set forth in the SFDR, shall follow good governance practices, contribute to an environmental objective, and/or social objective, and not significantly harm other environmental objective or social objectives.

Based on the above, the Board approved relevant amendments made to the Fund's SFDR disclosure documents and marketing materials, so that they are in coherence with the regulatory changes as of 1 January 2023.

This information is not, and does not purport to be, complete. Please refer to the Fund's Shareholder Agreement.

[10] Valuation Committee changes effective as of 31 December 2025. The Manager thereafter amended the Valuation Policy to better reflect the valuation conduct and principles applied to maintain independence and integrity in accordance with the Fund's size, nature, and complexity and applicable international guidelines, approved by the Manager's Board on 12 March 2026.

Periodic Reporting Obligations

Annual Audited Accounts: The 2025 annual audited accounts of NRP Green Transition I AS (Fund) and VIOS 224 AS (100% owned by the Fund) has been delivered to the shareholders in the Fund on 20 April 2026.

Tax Share Value: When calculating the taxable net wealth for the shareholders in the Fund, please use NOK 127.466 as the taxable value per share as of 31.12.2025. Please note that the tax share value of an investment has not been audited, and there may be changes if we receive new information from the portfolio companies.

Annual ESG report: In accordance with regulatory requirements, the report will be delivered to the Fund investors by 30 June 2026.

Assets subject to special arrangements due to illiquidity (*AIF § 4-3(1.a)*): <u>None</u> of the Fund's assets are subject to special arrangements arising from their illiquid nature.

Liquidity Management (*AIF § 4-3(1.b)*): The Fund is an unleveraged closed-ended AIF and thus this disclosure is <u>not</u> applicable.

Risk Management (*AIF § 4-3(1.c)*):

<u>Risk profile</u>: An investment in the Fund carries a high degree of risk. For more information on risk factors, please see section 5.3, 8 and 10.2.3 in the information memorandum of the Fund.

The assessment of risk will be an integral part of the due diligence process carried out in conjunction with each investment in the portfolio. The Manager has the overall responsibility for risk management following duties pursuant to the AIFM Act and as further described in the Fund Shareholder Agreement, the Fund Management Agreement and the Information Memorandum. The Manager seeks to identify and mitigate risk factors to reduce risk, increase value, and lower transaction costs. Further, the Manager has integrated sustainability risks into the investment decision-making process as further described in section 10.2.3 of the IM.

<u>Risk Management Systems</u>: In the Alternative Investment Funds Act (AIFM Act) § 3-7 it is stated that the AIF manager shall have a risk management function that is functionally and hierarchically separated from the manager's operational activities, including portfolio management. In EnvisionTech this is, among other things, carried out by having separate leaders for the Portfolio Management and the Risk Management functions. The Risk Management function shall not perform any tasks that may be in conflict with the operational activities. The Board of EnvisionTech has also adopted instructions and a routine collection in accordance with AIF act of 20 June 2014 no. 28, regulations to the AIFM act of 26 June 2014 no. 877, EU directive 2011/61/EU on AIFMD and AIFMD's associated regulation 231/2013.

The Risk management function's main task is to identify, manage and monitor all relevant and potential risks associated with the portfolio management of the funds that the Company manages. Central to this work is to facilitate, follow up and control the manager's due diligence process in the implementation of new investments. With due diligence means review, evaluation and control of the investment object's legal, technical, financial and other essential elements before the investment decision.

The Risk Management function's aim is also to support the management team in the identification and reduction of risk.

The Board of EnvisionTech has established a Risk Policy for the Fund. Central to the Risk Policy is the AIF's investment mandate, and in addition the Risk Policy contains other qualitative and quantitative management frameworks (as presented in the disclosed investor material).

Given the entry of force of the SFDR into Norway, the risk management function ensures that the Company considers sustainability risks when complying with the general requirements of the duties it performs under AIFMD Article 57.

It will work with the Company's management to integrate sustainability risks into its activities and investment strategies, and ensure that the necessary procedures and processes are in place to enable the Company to effectively manage the exposure of sustainability risks for each of the funds managed.

The Fund has its own depositary who will check the Fund's cash flows, that payments from investors in connection with subscriptions for shares have been received and that all liquid funds are booked in accounts opened in the Fund's name, amongst others.

<u>Reporting</u>: Ongoing reporting to the responsible functions is a key part of the Risk Management function. The purpose of these reports is to document compliance to the relevant commitments and mandates, to document non-compliance and to establish reporting lines for handling exceptions. The Risk Management function reports as follows (non-exhaustive list):

- To the compliance function of the Manager (monthly)
- To the portfolio manager of the Manager (monthly)
- To investors in the AIF (quarterly through this report)
- To the Board of the AIF (quarterly through this report and otherwise semi-annually)

- To the Board of the Manager (quarterly through this report and otherwise semi-annually)
- To the depositary (quarterly through this report and otherwise semi-annually)
- To the Financial Supervisory Authority (quarterly)

In addition, the Risk Management function is reporting continuously to the management team of the Manager and to the Depositary. The routines contain rules for escalation of the issues that the Risk Management function may uncover, including breach of an AIF's investment mandate and risk policy. The risk policy is reviewed on an annual basis.

Conflicts of Interest: AIF management entails several potential conflicts of interest that require transparency and information according to the AIF framework. The Fund shareholder agreement, adherence agreement, fund management agreement and information memorandum describe such conflicts of interest and the management of these. All entities in the NRP Group have guidelines for managing conflicts of interest in their rules and procedures. All agreements involving the Fund and agreements between entities in the NRP Group are entered into on an arm's length principle.

Given the Company's investment mandate as an Article 9 Fund manager, the Risk Management function does not currently anticipate any conflicts of interest that may arise as a result of the integration of sustainability risks into the risk management processes, systems, and internal controls.

Borrowings and guarantees (*AIF § 4-3(2)*): In accordance with clause 7.4.1 in the Fund SHA, the Fund shall not borrow monies or in other ways deploy financial gearing. However, the Fund may establish short-term credit lines and other short-term loan facilities or bridging facilities to, among other things, cover ongoing operating cost and make investments between drawdowns, subject to any drawdown or utilisation of such credit lines, short-term loan facilities and bridging facilities being repaid within twelve (12) months after each relevant drawdown and utilisation. As of the end of the reporting period, the Fund has not established such short-term debt facilities.

Valuation / NAV Q1-26:

See section "*Fund Performance*" in this report for financial details.

The Valuation Committee approved the NAV on 15 May 2026, and agreed that the procedures, principles and methodologies of valuation are in accordance with the Valuation Policy, and thus in-line with acceptable accounting practices and market practice; and the pricing information, the calculation and conclusions related to the valuation were sufficiently documented.

The equity value of each investment position is determined on a stand-alone basis by using and combining latest share issue pricing levels and generally accepted valuation methods (incl. DCF, peer review, etc) without applying any discount for lack of liquidity, lack of control, size, the existence of any shareholders agreement or similar circumstances nor any premium for potential synergies from a combination with another business.

Equity values are based on the fully diluted approach, where ordinary shares, preferred shares, convertible debt, options/warrants and other equity instruments are considered on an as-converted basis to determine the NAV or FMV per share. The NAV per share and NAV considers the FX adjusted value of each portfolio investment.

Fund Assets

Cash & Cash Eq. (incl. current assets) is valued in accordance with Norwegian GAAP and as presented through the quarterly financial statements prepared by the Fund's Business Manager (NRP Business Management AS).

The fair market value (FMV) of the Fund's ownership in:

- Alva Industries AS: Set based on head of terms received from external investors, adjusted for a discount to reflect transaction risk.
- C-Leanship A/S: Set based on latest share issue price, adjusted for assessment on LTM performance and NTM plans and USD/NOK FX impact.
- Umoe Advanced Composites AS: Set based on a valuation framework recommended by a third-party valuation advisor and considering UAC's LTM performance and YTD order book.
- Sikom Connect AS (formerly Futurehome AS): Set based on the completed merger of FHSD Connect AS into Sikom Connect AS through a share swap transaction, based on the average of two third-party valuation assessments prepared in connection with the merger.
- Heimdall Power AS: Set based on latest share issue pricing in connection with an internal bridge round concluded in Q2-26.
- Maritime Robotics AS: Set based on latest share issue pricing in connection with the equity issue concluded in Q2-26.

<u>Fund liabilities</u>:

Short-term liabilities are valued in accordance with Norwegian GAAP and as presented through the quarterly financial statements prepared by the Fund's Business Manager (NRP Business Management AS). The Fund (incl. affiliated entities) does not have any long-term liabilities.
