

NRP Green Transition I AS

Investor Report 1Q-2025

Date of report: 21 May 2025

Disclaimer

This fund update has been prepared by NRP Zero AS (the "Manager"). The update solely aims to provide guidance and information. Under no circumstances is this update meant to be considered as a tool in financial or investment advising, hereunder recommendations of purchase or sale, with or without compensation, of financial instruments or other forms of financial assets.

The information contained herein has been obtained from sources believed to be reliable and in good faith. Manager can however not guarantee or be held financially or legally responsible for the accuracy, completeness or correctness of the information contained in this fund update. We underline that investing in venture companies in the cleantech space are associated with high risk. All investors must be prepared that such investments might result in monetary losses. Anyone who uses this update as a basis for purchasing shares at a later time must make sure that all relevant and updated information is obtained. The information in this fund update is only valid per date of preparation.

Investors are encouraged to seek advice in any type of financial investments made in private or as a corporation. Investors must comply that any statements or comments on future predictions made in this update might not occur. Hereunder, investors must understand and accept that present gains is not a guarantee for future gains. Any investment described or mentioned in this update is risk sensitive with the possibility of losses occurring.

Confidential and privileged information

Please note that the information in this document, including any information regarding our portfolio companies and their financial status, is strictly confidential. The information may not be copied or circulated to anyone but the addressed recipients without the prior written consent of the Manager. You are also reminded of the duty of confidentiality you have undertaken by signing the Fund Shareholder Agreement.

Executive Summary

Fund Overview

NRP Green Transition I AS is a closed-end late stage venture capital fund dedicated to building a portfolio of Nordic industrial cleantech investment positions primarily through investments in shares and other equity and equity-like instruments (the "**Fund**"). The Fund is managed by EnvisionTech AS (the "**Manager**").

The investment objective of the Fund is to achieve long term capital appreciation through making sustainable investments within the meaning of SFDR Article 2 (17) and build a diversified portfolio with an attractive risk/return profile, targeting a return on invested capital of 4.0x.

Through investing in capital light companies with moderate technical risk, the Fund aims to deliver positive impact and enhance long-term returns through a robust strategy and approach to active ownership.

Fund Economics & Performance

Capital calls & deployment

- In Q1-25, no capital calls was made.
- Total paid-in-capital stands at NOK 376.1 million, corresponding to 84.2% of total commitments.

Net Asset Value & Multiple on invested capital

- The NAV, adjusted for foreign exchange rates, is set to NOK 448.8 per share (vs. NOK 481.1 in Q4-24), equivalent to NOK 337.57 million and corresponding to a 10.2% discount on the average cost price of the shares.
- The gross multiple of invested capital in portfolio companies is set to 0.98x (vs. 1.04x in Q4-24).

Market Comment & Deal Pipeline

Key highlights on cleantech deal flow and relevant transactions in Q1 2025

- Based on the briefing from Cleantech for Europe, European cleantech venture and growth capital investments had a slow start in Q1 2025, with €1.8 billion invested in the quarter, down 18% from Q4 2024.¹
- Late-stage activity was down sharply in terms of deal volume: Series B and growth capital deals fell from 40 to 23 (down 43%). Overall, total deal volume in the EU fell from 182 to 153. Average deal size in the EU fell from €13m to €12m.
- Notable growth equity transactions this quarter include XOcean, Irish turnkey sea drone player (raised \$115m), Quantum Systems, German

advanced aerial drones and intelligence systems company (raised \$108m).

- No notable exits of relevance this quarter.

Regulatory / Policy developments

- The ongoing macroeconomic volatility as a result of US tariffs have provoked united responses from the EU and member states.
- European Commission ("EC") selected 47 Strategic Projects to secure and diversify access to raw materials, while launching a State Aid Framework for the Clean Industrial Deal.
- The EC launched Strategic Dialogues (co-chaired by President von der Leyen) on the automotive and steel and metals industries to establish blueprints for sectoral decarbonization and competitiveness.

Deal flow

The below table exhibits the development of EnvisionTech's deal flow from Q4-2024 to Q1-2025, split on industry, capital phase and country.

Key Events in Q1 2025

Reconstruction of Futurehome AS

As communicated via written notice to the Fund shareholders on March 4th 2025, EnvisionTech is participating with a capital commitment of NOK 3.3m to support Futurehome through its Reconstruction and to assist in attracting new equity. The commitment will be structured in two tranches in the form of i) a NOK 2.0m participation in a super senior loan of NOK 8.0m; and ii) a NOK 1.3m participation of a total NOK 13.0m equity issue, subject to a successful Reconstruction - whereof NOK 8.0m of the Equity Issue proceeds can be used to repay the Super Senior or be converted into ordinary shares.

Please see separate investor update on Futurehome enclosed.

Ongoing portfolio value enhancing initiatives

The EnvisionTech team is working on several portfolio value-enhancing initiatives and seek to be able to announce these developments in the near term.

Key Events after the Reporting Period

Planned execution of Tranche II commitment into Heimdall Power AS

The Fund committed NOK 40m into Heimdall Power AS in July 2024, the Norwegian company delivering dynamic line rating products and services to power utilities globally, enabling real-time operational insights and analysis to optimize grid capacity.

Following the Fund's execution of the first tranche (NOK 30m), the Fund will proceed with executing the second tranche of its remaining commitments (NOK 10m) during 2Q 25. This will increase the Fund's fully-diluted ownership stake from 7.8% to 8.9% and non-diluted ownership stake from 8.8% to 10.0%.

Fund Manager Developments

The Manager conducted a rebranding from NRP Zero AS to EnvisionTech AS ('Envision') in Q1-25 to reflect our underlying investment vision of building tomorrow's sustainable energy system today.

The updated website and vision statement to EnvisionTech can be found here: <https://www.enviontech.no/>

Launch of Envision Green Transition II AS

EnvisionTech, in parallel with the rebranding, launched Envision Green Transition II ('Fund II') to continue investing in disruptive energy efficiency technologies in the 'early growth' phase, partnering up with entrepreneurial management teams to scale the companies globally.

The target fund size is NOK 1,000m.

Fund Performance

Fund Cash Flows

(1) NOK 20.0 million by Founder and NOK 356.1 million by Fund investors.

Fund Net Asset Value (NAV)¹

(1) Net Asset Value (NAV) = Fund Assets – Fund Liabilities. The Valuation Committee approved the NAV on 13. May 2025, and agrees that the procedures, principles and methodologies of valuation is in accordance with the Valuation Policy, and thus in-line with acceptable accounting practices and market practice; and the pricing information, the calculation and conclusions related to the valuation were sufficiently documented. Fund Assets = FMV of Investments + Cash & Cash Equivalents. Fund Liabilities = Short-Term Liabilities + Long-Term Liabilities. See section "Periodic reporting obligations" for further details.

Fund Return Multiples

	Q4-2024 (reference)		Q1-2025	
	NOK-denominated	Local Currency	NOK-denominated	Local Currency
DPI (Distribution to Paid-in Capital)	0.00x	0.00x	0.00x	0.00x
RVPI (Residual Value ¹ to Paid-in Capital)	0.95x	0.95x	0.90x	0.89x
TVPI ² (Total Value to Paid-in Capital)	0.95x	0.95x	0.90x	0.89x

(1) Residual value or NAV (= Fund assets - Fund liabilities) is the fair market value of the Fund's investment positions plus other fund assets (e.g. cash) less fund liabilities (e.g. account payables).

(2) TVPI = DPI + RVPI

Gross multiple on invested capital in PortCos

(1) Considers the FX-adjusted value of each portfolio investment, i.e. "NOK-denominated"

(1) Ownership includes all equity instruments held by the Fund, i.e. ordinary shares, preference shares and convertible debt instruments (excl. however compensation warrants held to protect against breach of representation & warranties). (2) The fund committed to a NOK 40 million investment in Heimdall Power, whereby the first closing (NOK 30 million) was completed as of 30 June 2024. The remaining (NOK 10 million) will be executed during June 2025.

Portfolio Companies

Alva Industries ("Alva")

Alva was founded with a vision of electrifying the world through a unique production technology for electric motors. Alva designs and manufactures high-performance electric frameless motors for industrial & defense applications, using its patented stator production technology (FiberPrinting™).

The unique production technology revolutionizes the way electric motors can be designed & produced, introducing a new benchmark for custom motor development & time-to-market in small & high lot sizes alike. As an added benefit, the FiberPrinting™ production process also allows Alva to pack more power into ironless motors than any current alternatives, enabling the company to offer its clients electric drive systems with competitive technical performance & energy efficiency characteristics, without compromising longevity or reliability.

The Fund has in total invested NOK 60.3m since the initial investment of NOK 10 million² that was concluded in April-2022.

Quarter in brief

- 40x customers are part of Alva's qualification program having bought customer evaluation units (up from 26x in Q4-24). 5x customers have proceeded to pre-series stage (up from 2x in Q4-24). 1x customer has proceeded to first commercial production order stage (up from 0x in Q4-24).

Customer Evaluation Units Sold (cumulative)

Key milestones to be achieved in the next quarter(s)

- Increase total number of clients in qualification funnel and advance existing leads.
- Delivery of products to customers in accordance with PO and specs.

Alva's iron-less frameless motors helps industrial customers improve its energy efficiency and energy & material use

SDGs alignment: 9 and 12

² In accordance with the Fund Shareholder Agreement, Alva was transferred to the Fund at cost price plus 8% p.a. interest from the date it was acquired until it was transferred.

C-Leanship (“CLS”)

CLS is a leading provider of underwater vessel inspection and cleaning services using state of the art remotely operating vehicles (“ROV’s”). The company is headquartered in Køge, Denmark, with two operating hubs in Singapore and Busan. The game plan is focused on expansion by scaling existing products, diversifying the product portfolio and targeting new customer segments.

The Fund has in total invested NOK 73.3m (USD 7.03m) in CLS since the initial investment of NOK 50.75m (USD 5m)³ was concluded in July 2022.

Quarter in brief

- In Q1 2025, CLS completed 54 hull cleanings, a 23% decrease from Q4 2024.
- Lower Q1 volumes stemmed from a slow commercial start, coupled with operational and technical challenges that resulted in numerous partial cleanings.
- By late Q1, most operational and technical issues were resolved, and commercial volumes regained the positive trajectory seen in Q4 2024.

- The shipshiner unit moved from Antwerp is now operational, increasing capacity in Singapore by 100%.
- New CEO Sanjay Vasudevan (ex-Maersk) successfully onboarded.

Propeller cleaning volume picked up during the quarter with six cleanings completed in March. The underlying market for ROV hull cleaning remains strong as a key enabler for shipping decarbonization. The implementation of EU’s ETS scheme will further accelerate the demand for decarbonization solutions in shipping. Operational efficiency and scale will increase share of ROV hull cleaning market as % of the total hull cleaning market with ROV hull cleaning gaining competitiveness against diver alternatives.

The IMO announced in April’s Marine Environment Protection Committee meeting its intention to develop a legally binding instrument for biofouling management, moving beyond the voluntary guidelines introduced in 2023.

Key milestone to be achieved in the next quarter(s)

- Reach EBITDA break-even.
- Broaden customer base within container liners, opportunistic approach to bulk/tank.
- Secure approval for simultaneous operations in Singapore to reduce partial cleanings due to short port calls.
- Improve technical and operational excellence to reduce # of partial cleanings.
- Launch online customer portal.
- Initiate 2025-2026 strategy plan.
- Initiate partnership agreements with major port services suppliers.

Technology and differentiation	
▪ Based on ROV technology from SAAB, CLS has developed a 2nd generation ROV hull cleaner with a closed loop filtration system ▪ Superior in terms of speed, reliability and accuracy, the ability to clean during port operation/bunkering and meet future environmental requirements, makes CLS’s solution a game changer in biofouling management	

ESG drivers and impact	
CLS’s state of the art ROVs reduce air and water pollution in the shipping sector. Effective cleaning of the hull also reduces a vessel’s fuel consumption by ~5%	SDGs alignment: 13 and 14  13 CLIMATE ACTION  14 LIFE BELOW WATER

³ In accordance with the Fund Shareholder Agreement, CLS was transferred to the Fund at cost price plus 8% p.a. interest from the date it was acquired until it was transferred.

⁴ FX rate (USD/NOK) as of 31. Dec. 2024.

Umoe Advanced Composites (“UAC”)

UAC develops and manufactures advanced type IV glass fibre pressure vessels, offering lightweight and cost-efficient solutions for containment, storage and distribution of large volumes of industrial gases such as hydrogen and methane (CBG/CNG).

Glass fibre is significantly less costly than for example carbon fibre. Moreover, due to its weight advantage, glass fibre can transport 2-3 times more hydrogen compared to similar-sized tanks in steel, representing major cost and environmental benefits. The game plan is catered around production scale-up in Norway, geographical expansion through the Chinese JV facility, technological innovation and considering vertical/horizontal growth avenues.

The Fund has in total invested NOK 77.5m since the initial investment was concluded in January 2023.

Quarter in brief

- The company delivered revenues and EBITDA in line with the budget.
- Secured record high order intake of NOK 126m (vs NOK 40m during the same period last year) and above budget.
- In 1Q-25, UAC Norway produced 493 cylinders (250-bar equivalent), a 18% decrease in cylinders winded from last quarter (Q4-24), abut an increase of 165 cylinders compared to same period last year.

Key milestone to be achieved in the next quarter(s)

- Secure KIWA certification for E8 cylinders.
- Secure export certification for the Chinese J/V plant's cylinder production.
- Continue expansion of global market position in target geographies, diversification of compressed gas applications beyond H2 (incl. biogas, CNG) and entry into the maritime segment.

- Continue Deep Purple™ development for subsea storage of H2 together with project consortium.
- Continue organisational build-up in the J/V factory in China for operational and sales excellence.

Product portfolio

Storage and transport solutions for hydrogen, CNG, biogas

Key customers

Technology and differentiation

- UAC has since inception in 2006 developed and refined glass fibre weaving to develop cylinders that can hold compressed gases at >425 bar at half the price of competing (carbon fibre) solutions.

ESG drivers and impact

By developing cost effective standardized containers for the transportation of hydrogen, UAC accelerates the adoption to clean hydrogen and enables the energy transition.

SDGs alignment: 7 and 11

Futurehome (“FH”)

Futurehome is a hardware enabled SAAS company offering smart energy management systems that help consumers centralise, automate, and monitor household appliances’ power consumption, offering greater flexibility and visibility in energy consumption and costs.

The company’s core product is a smart hub (“Smarthub II”) that allows users to connect and control a wide range of energy consuming devices in their homes, including thermostats, water boiler relays, rotary dimmers, smart plugs, and EV chargers. The hub can connect to both Futurehome products and third-party devices. The game plan is to introduce a subscription-based revenue model, expand into Nordic and European markets, and position Futurehome for the flexibility market.

The Fund has in total invested NOK 67.8m since the initial investment of NOK 50.0m was concluded in May 2023.

Quarter in brief

- The company filed for judicial reconstruction to seek a solution with its stakeholders to form the basis for a going concern.
- Changes to the C-level management with new CFO onboard.
- Implement OKRs throughout the organization.
- Prepared the company ready to convert its customer base into a subscription model.

Key milestone to be achieved in the next quarter(s)

- Implementation of revised strategy, hereunder partnership volume distribution and implementation of recurring revenue model.
- Conclude on additional changes to the organisation.
- Revise strategy for entering international markets.
- Conclude on sale of non-core assets.
- Reach positive EBITDA.

Company information

Product portfolio

Key customers

Technology and differentiation

- Futurehome’s energy management solution is centered around a smart centralized hub that offers household energy management solutions in a safe and secure way
- Unique ability to sell flexibility to local and national grid owners (with incentives to household)

ESG drivers and impact

By offering substantial energy savings to households through lower energy consumption, Futurehome will enable the transition to sustainable cities and urban communities through building smarter homes.	SDGs alignment: 7, 9 and 11   
--	---

Heimdall Power (“HP”)

Heimdall Power offers dynamic line rating (“DLR”) and ambient adjusted rating services to utilities across the globe. The company has a global customer base across Europe, North America and Asia.

To enable real-time operational insights for grid operators, HP combines hardware and software by delivering sphere-shared sensors powered by advanced software that collect data and enable increased grid capacity and improved grid operations and planning. The company has also developed a proprietary automated drone installation technique, enabling a seamless experience for its customers even in challenging terrains.

In June 2024, the Fund concluded a NOK 40m investment in Heimdall Power (conducted across two tranches NOK 30m + 10m)⁵, corresponding to a fully-diluted ownership stake of ca. 9% in the company.

Quarter in brief

- During this quarter, 62 neurons were installed on customers' lines (down from 70 in Q4-24), 44% of the installations via drone.
- Growing base of total number of neurons installed, with 684 physical neurons in operations to date (10% growth from Q4-24).
- Won an upsell contract with Bayernwerk for 75 neurons, the third consecutive PO from this customer.
- Strong development of # of tenders for DLR in Europe and the US.
- Signed new Chief Product Officer (CPO) from competitor (Ampacimon), to start in August.

Key milestone to be achieved in the next quarter(s)

- Adding satellite connectivity to v4 neuron.
- Launch facility rating software module integrating high-voltage components such as transformers
- Adapting DLR solution for the US market, including conductor size, temperature capabilities, and on-premise software.
- Respond to and win major RFPs for DLR contracts in the European and North American markets to be awarded in 2025.

About Heimdall Power

Product portfolio

Key customers

Technology and differentiation

- Heimdall uses a combination of hardware sensors and software monitoring by deploying physical and virtual neurons onto customer's grids.
- Accurate sensors that detect temperature, icing, sagging, and faults on the line.
- Autonomous drone installations of sensors (neurons) without need to turn off the power grid.

ESG drivers and impact

- Accelerates the energy transition by improving capacity of and optimizing the utilization of power grids.
- Enabling safer and more efficient operations with HSE benefits

SDGs alignment: 9, 11 and 12

⁵ The Fund committed to a NOK 40 million investment, whereby the first tranche (NOK 30 million) was completed as of 30 June 2024. The remaining (NOK 10 million) will be executed in 1H 2025.

Maritime Robotics (“MR”)

Maritime Robotics is a global provider of turnkey sea drones and autonomous navigation systems to third party vessels, serving customers across maritime applications in the civil hydrography, defense & security, offshore energy, fishery and transportation & logistics segments.

Maritime Robotics is reshaping the future of maritime operations through an innovative product portfolio and technology that enables remote, onshore control and monitoring of unmanned sea drones. Its solutions deliver significant operational, energy, and cost efficiencies—offering customers improved HSE outcomes, cost savings from increased efficiency, reduced fuel consumption and emissions, and enhanced operational capabilities.

In August 2024, the Fund concluded a NOK 35m investment in Maritime Robotics.

Quarter in brief

- Continued strong order intake in Q1-25, with record high order backlog, derisking the 2025 growth target.
- Approx. 65-70% of the full-year sales budget is already secured - through completed deliveries in Q1 and orders scheduled for delivery in Q2-Q4-25.

Key milestone to be achieved in the next quarter(s)

- Execution on secured order backlog, e.g. delivery of turn-key sea drones and autonomous navigation system projects to third-party vessels.
- Positioning manufacturing, product development and sales capabilities to support and enable significant growth.

Investment Committee	Adele Christensen Os (Head), Andrew Robbins, Carl Hall, Oscar Spieler
Compliance Committee	Hilde Høksnes (Head), Andreas Marø, Charmaine Lee
Valuation Committee	Jonas Myklebost (Head), Emil Sebastian Harberg, Andreas Marø

Investment Strategy

The Fund seeks to build a diverse portfolio of industrial cleantech companies in the Nordics that delivers a positive impact on environmental, social and governance matters and provides the Fund investors with long-term capital appreciation with best-in-class risk-adjusted returns. To achieve this, the Fund is looking for businesses with the following common features:

- Entrepreneurial management team with execution capabilities and track-record;
- Business model that contributes to resource efficiency and/or accelerates the energy transition;
- Proven technology, product or service on the brink of commercialization or having reached the commercialization phase with moderate technical risk;
- Asset-light business model with a clear competitive advantage that enables a scalable growth potential;
- Ownership plan that can be successfully effectuated with limited reliance on government or public institutions (i.e. in relation to subsidies, framework amendments, licenses/permits);
- More than one revenue stream, hereunder the potential of selling multiple products, services or technologies to multiple markets; and
- Businesses that can be positioned for divestment to industrial buyers.

An important part of the Manager's investment philosophy is the "1x/4x" principle: in every investment the Manager makes, we strive to protect the invested capital (1x) and at the same time achieve 4x on invested capital. Through privately negotiated transactions, the Manager seeks to ensure the execution of rigorous and detail-oriented due diligence processes, agreement with existing shareholders and management on an ownership plan, and regulation of material terms and conditions in the shareholders' agreement and subscription/investment agreement that provides the Fund with stronger control and economic rights relative to the shareholding in the company. Throughout the ownership period, the Manager aims to actively accelerate the growth potential of the business through board representation (directly or indirectly), participation in shareholder meetings and strategy meetings, and informal interaction with the management.

Sustainable Finance Disclosure Regulation (SFDR)

As the law "Offentliggjøringsforordningen", the SFDR in Norwegian and the taxonomy ("taksonomien") entered into force in Norway on 1 January 2023, the Board of EnvisionTech AS in the Board meeting on 22 March 2023 officially approved of the Manager's operation of NRP Green Transition I as an "Article 9" fund, pursuant to (EU) 2019/2088 (SFDR) Article 9.

The Board thereby confirms the Fund's commitment to making sustainable investments as its objective pursuant cf. SFDR Article 2 (17), designating that the investments of the Fund, as set forth in the SFDR, shall follow good governance practices, contribute to an environmental objective, and/or social objective, and not significantly harm other environmental objective or social objectives.

Based on the above, the Board approved relevant amendments made to the Fund's SFDR disclosure documents and marketing materials, so that they are in coherence with the regulatory changes as of 1 January 2023.

This information is not, and does not purport to be, complete. Please refer to the Fund's Shareholder Agreement.

Periodic Reporting Obligations

Annual Audited Accounts: The 2024 annual audited accounts of NRP Green Transition I AS (Fund) and VIOS 224 AS (100% owned by the Fund) were disclosed to the shareholders in the Fund on 30th April 2025.

Tax Share Value: The taxable value per share will be disclosed to the shareholders in the Fund during May 2025.

Annual ESG report: In accordance with regulatory requirements, the report will be delivered to the Fund investors by 30 June 2025.

Drawdown #9: Please note that Drawdown #9 – that was sent out to the shareholders on 26th November 2024 – was registered in Brønnøysund during January 2025. Thus, the shares subscribed for will be considered in the 2025 shareholder register, due by 31st January 2026.

Assets subject to special arrangements due to illiquidity (AIF § 4-3(1.a)): None of the Fund's assets are subject to special arrangements arising from their illiquid nature.

Liquidity Management (AIF § 4-3(1.b)): The Fund is an unleveraged closed-ended AIF and thus this disclosure is not applicable.

Risk Management (AIF § 4-3(1.c)):

Risk profile: An investment in the Fund carries a high degree of risk. For more information on risk factors, please see section 5.3, 8 and 10.2.3 in the information memorandum of the Fund.

The assessment of risk will be an integral part of the due diligence process carried out in conjunction with each investment in the portfolio. The Manager has the overall responsibility for risk management following duties pursuant to the AIFM Act and as further described in the Fund Shareholder Agreement, the Fund Management Agreement and the Information Memorandum. The Manager seeks to identify and mitigate risk factors to reduce risk, increase value, and lower transaction costs. Further, the Manager has integrated sustainability risks into the investment decision-making process as further described in section 10.2.3 of the IM.

Risk Management Systems: In the Alternative Investment Funds Act (AIFM Act) § 3-7 it is stated that the AIF manager shall have a risk management function that is functionally and hierarchically separated from the manager's operational activities, including portfolio management. In EnvisionTech this is, among other things, carried out by having separate leaders for the Portfolio Management and the Risk Management functions. The Risk Management function shall not perform any tasks that may be in conflict with the operational activities. The Board of EnvisionTech has also adopted instructions and a routine collection in accordance with AIF act of 20 June 2014 no. 28, regulations to the AIFM act of 26 June 2014 no. 877, EU directive 2011/61/EU on AIFMD and AIFMD's associated regulation 231/2013.

The Risk management function's main task is to identify, manage and monitor all relevant and potential risks associated with the portfolio management of the funds that the Company manages. Central to this work is to facilitate, follow up and control the manager's due diligence process in the implementation of new investments. With due diligence means review, evaluation and control of the investment object's legal, technical, financial and other essential elements before the investment decision.

The Risk Management function's aim is also to support the management team in the identification and reduction of risk.

The Board of EnvisionTech has established a Risk Policy for the Fund. Central to the Risk Policy is the AIF's investment mandate, and in addition the Risk Policy contains other qualitative and quantitative management frameworks (as presented in the disclosed investor material).

Given the entry of force of the SFDR into Norway, the risk management function ensures that the Company considers sustainability risks when complying with the general requirements of the duties it performs under AIFMD Article 57.

It will work with the Company's management to integrate sustainability risks into its activities and investment strategies, and ensure that the necessary procedures and processes are in place to enable the Company to effectively manage the exposure of sustainability risks for each of the funds managed.

The Fund has its own depositary who will check the Fund's cash flows, that payments from investors in connection with subscriptions for shares have been received and that all liquid funds are booked in accounts opened in the Fund's name, amongst others.

Reporting: Ongoing reporting to the responsible functions is a key part of the Risk Management function. The purpose of these reports is to document compliance to the relevant commitments and mandates, to document non-compliance and to establish reporting lines for handling exceptions. The Risk Management function reports as follows (non-exhaustive list):

- To the compliance function of the Manager (monthly)
- To the portfolio manager of the Manager (monthly)
- To investors in the AIF (quarterly through this report)
- To the Board of the AIF (quarterly through this report and otherwise semi-annually)
- To the Board of the Manager (quarterly through this report and otherwise semi-annually)
- To the depositary (quarterly through this report and otherwise semi-annually)
- To the Financial Supervisory Authority (quarterly)

In addition, the Risk Management function is reporting continuously to the management team of the Manager and to the Depositary. The routines contain rules for escalation of the issues that the Risk Management

function may uncover, including breach of an AIF's investment mandate and risk policy. The risk policy is reviewed on an annual basis.

Conflicts of Interest: AIF management entails several potential conflicts of interest that require transparency and information according to the AIF framework. The Fund shareholder agreement, adherence agreement, fund management agreement and information memorandum describe such conflicts of interest and the management of these. All entities in the NRP Group have guidelines for managing conflicts of interest in their rules and procedures. All agreements involving the Fund and agreements between entities in the NRP Group are entered into on an arm's length principle.

Given the Company's investment mandate as an Article 9 Fund manager, the Risk Management function does not currently anticipate any conflicts of interest that may arise as a result of the integration of sustainability risks into the risk management processes, systems, and internal controls.

Borrowings and guarantees (AIF § 4-3(2)): In accordance with clause 7.4.1 in the Fund SHA, the Fund shall not borrow monies or in other ways deploy financial gearing. However, the Fund may establish short-term credit lines and other short-term loan facilities or bridging facilities to, among other things, cover ongoing operating cost and make investments between drawdowns, subject to any drawdown or utilisation of such credit lines, short-term loan facilities and bridging facilities being repaid within twelve (12) months after each relevant drawdown and utilisation. As of the end of the reporting period, the Fund has not established such short-term debt facilities.

Valuation / NAV Q1-25:

See section "*Fund Performance*" in this report for financial details.

The Valuation Committee approved the NAV on 13. May 2025, and agreed that the procedures, principles and methodologies of valuation are in accordance with the Valuation Policy, and thus in-line with acceptable accounting practices and market practice; and the pricing information, the calculation and conclusions related to the valuation were sufficiently documented.

The equity value of each investment position is determined on a stand-alone basis by using and combining latest share issue pricing levels and generally accepted valuation methods (incl. DCF, peer review, etc) without applying any discount for lack of liquidity, lack of

control, size, the existence of any shareholders agreement or similar circumstances nor any premium for potential synergies from a combination with another business.

Equity values are based on the fully diluted approach, where ordinary shares, preferred shares, convertible debt, options/warrants and other equity instruments are considered on an as-converted basis to determine the NAV or FMV per share. The NAV per share and NAV considers the FX adjusted value of each portfolio investment.

Fund Assets

Cash & Cash Eq. (incl. current assets) is valued in accordance with Norwegian GAAP and as presented through the quarterly financial statements prepared by the Fund's Business Manager (NRP Business Management AS).

The fair market value (FMV) of the Fund's ownership in:

- Alva Industries AS: Set to the Fund's cost price through considering the valuation methodology recent transaction in the company's equity with a qualitative assessment of 2024 performance and 2025 plans.
- C-Leanship A/S: Set to the Fund's cost price, adjusted for USD/NOK FX impact, through considering recent transaction in the company's equity and DCF analysis.
- Umoe Advanced Composites AS: Set based on a valuation framework recommended by a third-party valuation advisor⁶.
- Futurehome AS: Set to the value of the super senior loan commitment, based on transaction concluded in February 2025.
- Heimdall Power AS: Set to the subscription price (per share) in the most recent transaction that was concluded in June 2024.
- Maritime Robotics AS: Set to the subscription price (per share) in the most recent transaction that was concluded in August 2024.

Fund liabilities:

Short-term liabilities are valued in accordance with Norwegian GAAP and as presented through the quarterly financial statements prepared by the Fund's Business Manager (NRP Business Management AS). The Fund (incl. affiliated entities) does not have any long-term liabilities.

⁶ For the avoidance of doubt, the third-party valuation advisor was not solely appointed by UAC, but by UAC and an unaffiliated party. The third-party

valuation advisor delivered the valuation report to both parties in December-23.
