Investor Report 2Q-2024

Date of report: 16 August 2024

Disclaimer

This fund update has been prepared by NRP Zero AS (the "Manager"). The update solely aims to provide guidance and information. Under no circumstances is this update meant to be considered as a tool in financial or investment advising, hereunder recommendations of purchase or sale, with or without compensation, of financial instruments or other forms of financial assets.

The information contained herein has been obtained from sources believed to be reliable and in good faith. Manager can however not guarantee or be held financially or legally responsible for the accuracy, completeness or correctness of the information contained in this fund update. We underline that investing in venture companies in the cleantech space are associated with high risk. All investors must be prepared that such investments might result in monetary losses. Anyone who uses this update as a basis for purchasing shares at a later time must make sure that all relevant and updated information is obtained. The information in this fund update is only valid per date of preparation.

Investors are encouraged to seek advice in any type of financial investments made in private or as a corporation. Investors must comply that any statements or comments on future predictions made in this update might not occur. Hereunder, investors must understand and accept that present gains is not a guarantee for future gains. Any investment described or mentioned in this update is risk sensitive with the possibility of losses occurring.

Confidential and privileged information

Please note that the information in this document, including any information regarding our portfolio companies and their financial status, is strictly confidential. The information may not be copied or circulated to anyone but the addressed recipients without the prior written consent of the Manager. You are also reminded of the duty of confidentiality you have undertaken by signing the Fund Shareholder Agreement.

Fund Overview

Introduction

NRP Green Transition I AS is a closed-end venture capital fund dedicated to building a portfolio of Nordic industrial cleantech investment positions primarily through investments in shares and other equity and equity-like instruments (the "Fund").

The investment objective of the Fund is to achieve long term capital appreciation through making sustainable investments within the meaning of SFDR Article 2 (17) and build a diversified portfolio with an attractive risk/return profile, targeting a return on invested capital of 4.0x.

Through investing in capital light companies with moderate technical risk, the Fund aims to deliver positive impact and enhance long-term returns through a robust strategy and approach to active ownership.

General Information

Fund name	NRP Green Transition I AS
Fund manager	NRP Zero AS
Founder	NRP GT I AS
First close date	14 July 2022
Final close date	01 July 2024
First investment date	26 August 2022
Investment Period	Four (4) years from the original final closing date (14 July 2023)
Ordinary fund term	Ten (10) years from the original final closing date (14 July 2023)
Committed capital	NOK 446.6 million incl. founder commitment (as of final close)
Shareholder structure	One Founder and 41 Fund investors (as of final close)
Fund leverage	Not permitted
Fund currency	NOK
Financial year-end	31 December
Legal incorporation	Norwegian limited liability company ("Aksjeselskap")
Accounting principles	Norwegian GAAP
Valuation principles	In accordance with IPEV Valuation Guidelines and Norwegian GAAP guidelines, and otherwise as stipulated in the Fund SHA (see Appendix 4 – Valuation Policy)
ESG principles	In accordance with Article 9 under the Sustainable Finance Disclosure Regulation ("SFDR")
Fund Board	Jonas Myklebost (Chairperson), Emil Sebastian Harberg, Lars Gjørsvad

Investment Mandate

Nature of investments	Long-term capital appreciation through equity and equity-related investments in small to medium sized industrial cleantech companies
Stage	Venture
Sector / Themes	Energy transition and resource efficiency
Geography	Nordic

Key Economic Terms of the Manager and Founder

Management fees	1.75%
Equity profit split	20%, subject to a return of 100% of paid-in capital plus an 8% hurdle. 50% catch-up.
Founder commitment	NOK 20 million (2% of total target commitments of NOK 1,000 million)

Service Providers

Auditor	Deloitte Norge AS
Business Management	NRP Business Management AS
Depository	View Procurator AS
Legal counsel	Wikborg Rein Advokatfirma AS and Advokatfirmaet Selmer AS

Committees

Investor Committee	Ragnvald Risan, Andreas Wold-Olsen, Carl Petter Finne
Investment Committee	Adele Christensen Os (Head), Andrew Robbins, Carl Hall, Oscar Spieler
Compliance Committee	Hilde Høksnes (Head), Andreas Marø, Charmaine Lee
Valuation Committee	Jonas Myklebost (Head), Emil Sebastian Harberg, Andreas Marø

Investment Strategy

The Fund seeks to build a diverse portfolio of industrial cleantech companies in the Nordics that delivers a positive impact on environmental, social and governance matters and provides the Fund investors with long-term capital appreciation with best-in-class risk-adjusted returns. To achieve this, the Fund is looking for businesses with the following common features:

- Entrepreneurial management team with execution capabilities and track-record;
- Business model that contributes to resource efficiency or accelerates the energy transition;
- Proven technology, product or service on the brink of commercialization or having reached the commercialization phase with moderate technical risk;
- Asset-light business model with a clear competitive advantage that enables a scalable growth potential;
- Ownership plan that can be successfully effectuated with limited reliance on government or public institutions (i.e. in relation to subsidies, framework amendments, licenses/permits);
- More than one revenue stream, hereunder the potential of selling multiple products, services or technologies to multiple markets; and
- Businesses that can be positioned for divestment to industrial buyers

An important part of the Manager's investment philosophy is the "1x/4x" principle: in every investment the Manager makes, we strive to protect the invested capital (1x) and at the same time achieve 4x on invested capital. Through privately negotiated transactions, the Manager seeks to ensure the execution of rigorous and detail-oriented due diligence processes, agreement with existing shareholders and management on an ownership plan, and regulation of material terms and conditions in the shareholders' agreement and subscription/investment agreement that provides the Fund with stronger control and economic rights relative to the shareholding in the company. Throughout the ownership period, the Manager aims to actively accelerate the growth potential of the business through board representation (directly or indirectly), participation in shareholder meetings and strategy meetings, and informal interaction with the management.

Sustainable Finance Disclosure Regulation (SFDR)

As the law "Offentliggjøringsforordningen", the SFDR in Norwegian and the taxonomy ("taksonomien") entered into force in Norway on 1 January 2023, the Board of NRP Zero AS in the Board meeting on 22 March 2023 officially approved of the Manager's operation of NRP Green Transition I as an "Article 9" fund, pursuant to (EU) 2019/2088 (SFDR) Article 9.

The Board thereby confirms the Fund's commitment to making sustainable investments as its objective pursuant cf. SFDR Article 2 (17), designating that the investments of the Fund, as set forth in the SFDR, shall follow good governance practices, contribute to an environmental objective, and/or social objective, and not significantly harm other environmental objective or social objectives.

Based on the above, the Board approved relevant amendments made to the Fund's SFDR disclosure documents and marketing materials, so that they are in coherence with the regulatory changes as of 1 January 2023.

This information is not, and does not purport to be, complete. Please refer to the Fund's Shareholder Agreement.

Fund Performance

Fund Cash Flows

NOK million	Q2-2024	YTD	Accumulated	% of total commitments

(1) NOK 20.0 million by Founder and NOK 305.9 million by Fund investors.

Fund Net Asset Value (NAV)¹

NAV per share (NOK/Share)

(1) Net Asset Value (NAV) = Fund Assets – Fund Liabilities. The Valuation Committee approved the NAV on 14. August 2024, and agrees that the procedures, principles and methodologies of valuation is in accordance with the Valuation Policy, and thus in-line with acceptable accounting practices and market practice; and the pricing information, the calculation and conclusions related to the valuation were sufficiently documented. Fund Assets = FMV of Investments + Cash & Cash Equivalents. Fund Liabilities = Short-Term Liabilities + Long-Term Liabilities. See section "Periodic reporting obligations" for further details.

Fund Return Multiples

	Q1-2024 (reference)		Q2-2024	
	NOK-denominated	Local Currency	NOK-denominated	Local Currency
DPI (Distribution to Paid-in Capital)	0.00x	0.00x	0.00x	0.00x
RVPI (Residual Value ¹ to Paid-in Capital)	1.13x	1.12x	0.95x	0.95x
TVPI ² (Total Value to Paid-in Capital)	1.13x	1.12x	0.95x	0.95x

(1) Residual value or NAV (= Fund assets - Fund liabilities) is the fair market value of the Fund's investment positions plus other fund assets (e.g. cash) less fund liabilities (e.g. account payables).

(2) TVPI = DPI + RVPI

Gross multiple on invested capital in PortCos¹

(1) Considers the FX-adjusted value of each portfolio investment, i.e. "NOK-denominated"

(1) Ownership includes all equity instruments held by the Fund, i.e. ordinary shares, preference shares and convertible debt instruments (excl. however compensation warrants held to protect against any breach of representation & warranties). (2) The fund committed to a NOK 40 million investment in Heimdall Power, whereby the first closing (NOK 30 million) was completed as of 30 June 2024. The remaining (NOK 10 million) will be executed in 1H 2025.

Executive Summary

Market Comment & Deal Pipeline

Key highlights on cleantech deal flow and sustainability regulatory updates in Q2 2024

- Based on the briefing from Cleantech for Europe, funding into the European cleantech space in venture and growth capital was recorded at €2.4 billion, a slight drop from €2.8 billion (Q1-24). In the Nordics, the quarter saw €825 million in cleantech investment across 103 deals, an increase compared to both Q2 and Q1 of 2023, at €738m and €623m respectively. Overall, the cleantech environment in Europe and the Nordics continue to perform strongly relative to North America and Asia Pacific regions, where funding stayed flat in 1H-24.¹
- In this quarter, European early-stage investment (seed and Series A) almost doubled, increasing by 94%, while late-stage investment (series B and growth equity) decreased by 45% with a drop in deal volume, compared to Q1-24. Overall, this quarter was characterized by fewer and smaller late-stage deals that exemplify the 'scaling' challenges that the founders and companies in the cleantech ecosystem face.
- Energy and Power continues to be the most well-funded sector (accounting for 27% of deals), followed closely by Transportation and Logistics (25%).

Regulatory / Policy developments

- A Clean Industrial Deal for the first 100 days of the new European Commission focused on lowering energy prices, decarbonising energy and energy-intensive sectors and securing supply to raw materials.
- A European Competitiveness Fund for cleantech and biotech established as part of the new EU Budget (2028 – 2035) to help develop and retain strategic technologies and manufacturing in Europe.
- New policies from Nordic governments to enable the transition: Norway announces a new solar action plan to accelerate development of solar power across the country; Denmark introduced a carbon tax on agriculture; Iceland introduces a new climate action plan.

Deal flow

The below figure exhibits the development of NRP Zero's deal flow from Q1-2024 to Q2-2024, split on industry, capital phase and country. The marginal deal flow development this quarter is a result of the Manager's focus on supporting existing portfolio companies and execution of new investments.

Key Events in Q2 2024

Convertible loan issue to C-Leanship AS

Following the Fund's issuance of a convertible loan note of NOK 3.2m in March 2024, the Fund executed a planned follow-up injection of c. NOK 5.5m (USD 0.5m) into the company to fund operational cash flows. The loan was issued on the same terms as the previous participation with 12 months maturity and 42.9% effective p.a interest rate, divided among participating shareholders (SAAB Ventures, Wallenius Water, and the Fund pro rata).

Investment of NOK 40 million into Heimdall Power AS

The Fund completed an investment of NOK 40m (NOK 30m + 10m) into Heimdall Power, a Norwegian company, a global frontrunner in providing dynamic line rating and ambient adjusted rating services to power utilities, enabling real-time operational insights and analysis of the grid to increase capacity, reduce congestion, and enable safer and more efficient operations.

The Manager co-led the Series B round of c. USD 25m alongside Orlen VC, the Steinsvik Family, with participation from existing investors, Investinor, Lyse, Eviny, Hafslund and Sarsia Seed.

FY 2023 SFDR / Taxonomy Report for the fund released

In accordance with the SFDR and associated regulations, the Manager released the periodic report outlining the Fund's attainment of the sustainable investment objective during FY 2023. The report was shared with fund investors alongside the Principal Adverse Impact statement on 30 June 2024.

FY 2023 Principal Adverse Impact Statement published

In accordance with the SFDR and associated regulations, the Manager published the Principal Adverse Impacts Statement for FY 2023 on NRP Zero's website. The Statement is available at: <https://www.nrp.no/nrp-zero/esg/>

Key Events after the Reporting Period

Converting of convertible loan and investment of NOK 4.7m into Futurehome AS

As indicated in the portfolio update shared with fund investors on 16 July 2024, the board of directors in strong support from the Manager initiated a restructuring process with the company to reduce debt, raise new equity and implement necessary organisational changes and cost cuts. The Manager thereby converted an outstanding convertible loan of NOK 7.82m (incl. accrued interest) into ordinary shares in Futurehome; and subscribed for ordinary shares amounting to NOK 4.7m in an equity issue of c. NOK 20m. Proceeds will be channelled towards reducing vendor debt, supporting operational cash flows and enabling the company to capitalize on growth opportunities. Following the restructuring, the fund will have an ownership stake of ca. 20% in the company.

Finalizing a new investment

The Manager is in the process of concluding an investment of NOK 35 million into a Norwegian company specializing in unmanned surface vehicles (USVs) and autonomous navigation systems to customers operating in the maritime space. The Manager is working closely with co-investors to finalize the investment.

Final close of fund

The Fund achieved its final close on 1 July 2024. The fund will no longer accept further commitments from this point onwards.

Portfolio Companies

Alva Industries AS (“Alva”)

Alva designs and manufactures high-performance electric propulsion systems for industrial, mobility and energy applications, using its own patented production technology (FiberPrinting™) to produce ironless stators, a key component in an electrical motor. The game plan is focused on accelerating Alva's position to become the leading producer of high-end electrical drive systems to the global UAV market and entering into new verticals with their proprietary technology.

The Fund acquired a 7.11% fully-diluted and 8.24% non-diluted ownership stake in Alva through participating with NOK 10 million² in an equity issue of NOK 36.3 million in April 2022. As part of this investment, NRP Zero agreed with Alva's CEO & Founder to take lead in a larger private placement to finance the growth strategy. The Fund co-led a Series A financing round with, inter alia Statkraft Ventures, and participated with NOK 50.0m in a total capital raise of NOK 114m that was concluded in March 2023.

Quarter in brief

- Entry into a supplier agreement with a Norwegian company for marine thrusters following successful testing
- Positive developments on entry into new verticals (e.g thrusters, precision gimbals, industrial applications) on the back of growing customer orders
- Continued cooperation (phase 2) of a strategic UAV development project with Aurora Flight Sciences, a subsidiary of Boeing
- Renewed marketing profile and website to reflect updated product portfolio and strategic changes
- Mark Howard elected as board director and industrial advisor to the company

Key milestones to be achieved in the next quarter(s)

- Continued positioning for entry into new markets through building of customer order book and timely deliveries
- Scaling commercial and sales resources to facilitate stronger positioning
- Delivery of marine thrusters to Norwegian partner in accordance with PO and specs
- Secure offset project with selected counterparties.

² In accordance with the Fund Shareholder Agreement, Alva was transferred to the Fund at cost price plus 8% p.a. interest from the date it was acquired until it was transferred.

Unaudited Revenues (2023)	NOK 7.5 million
Unaudited EBITDA (2023)	NOK (51.4) million

About Alva

Product portfolio

Key customers

Technology and differentiation

ESG drivers and impact

Alva's iron-less motors helps develop the UAV industry to displace fossil driven alternatives by extending the range and longevity of UAVs

SDGs alignment: 9 and 12

C-Leanship A/S (“CLS”)

CLS is a leading provider of underwater services using state of the art remotely operating vehicles (“ROV’s”) to deliver hull cleaning and inspections to marine vessels on a global scale. The company has its headquarters in Køge, Denmark, with three operating hubs in Singapore, Busan, and Antwerp. The game plan is focused on geographical expansion through rolling out existing product offering, expanding the product offering and entering into new customer segments.

The Fund has in total invested NOK 68.5m (USD 6.64m) in CLS since the initial investment of NOK 50.75m (USD 5m)³ was concluded in July 2022.

Quarter in brief

- Signed service agreement with Maersk for annual inspection of 300 container vessels
- New CCO hired, starting 1 September. All additional commercial positions filled
- Propellor cleaner operationally and commercially ready
- During Q2-24, CLS conducted 53 hull cleanings equivalent to a 10% increase compared to Q1-24

- The underlying market for ROV hull cleaning remains strong as a key driver for shipping decarbonization. The implementation of the EU ETS scheme will further accelerate the demand for decarbonization solutions in shipping. Operational efficiency and scale will increase share of ROV hull cleaning market as % of the total hull cleaning market with ROV hull cleaning gaining competitiveness against diver alternatives.

Key milestone to be achieved in the next quarter(s)

- Sign additional inspection service agreements with major tanker and container liners

- Secure frame agreement renewal with major container liner customer
- Initiate partnership agreements with major port services suppliers
- Launch customer portal.
- Achieve operational and technical performance in Antwerp at same level as Singapore and Korea

Company information

Website:	https://c-leanship.com/
HQ:	Køge, Denmark
No. of employees (EOY-23):	64
Sector:	Transportation & Logistics
Phase:	Mid-Venture
Audited Revenues (2023)	NOK 48.9 million
Audited EBITDA (2023)	NOK (62.1) million

About CLS

Product portfolio

Key customers

Technology and differentiation

- Based on ROV technology from SAAB, CLS has developed a 2nd generation ROV hull cleaner with a closed loop filtration system
- Superior in terms of speed, reliability and accuracy, the ability to clean during port operation/bunkering and meet future environmental requirements, makes CLS's solution a game changer in biofouling management

ESG drivers and impact

CLS's state of the art ROVs reduce air and water pollution in the shipping sector. Effective cleaning of the hull also reduces a vessel's fuel consumption by ~5%

SDGs alignment: 13 and 14

³ In accordance with the Fund Shareholder Agreement, CLS was transferred to the Fund at cost price plus 8% p.a. interest from the date it was acquired until it was transferred.

Umoe Advanced Composites (“UAC”)

UAC develops and manufactures advanced lightweight pressure tanks in composite materials, such as glass fibre, and transportation modules for hydrogen, biogas and compressed natural gas, offering optimal solutions for containment, storage and large volume transportations. Glass fibre is significantly less costly than for example carbon fibre. Moreover, glass fibre can because of its weight advantage transport 2-3 times more hydrogen compared to similar-sized tanks in steel, representing major cost and environmental benefits. The game plan is catered around production scale-up in Norway, geographical expansion through JV production, technological innovation and considering vertical/horizontal growth avenues.

In January 2023, the Fund concluded a NOK 77.5 million investment in UAC, out of a total equity issue of NOK 85.0 million, representing a 10.7% fully diluted ownership stake.

Quarter in brief

- YTD order book above forecast and order intake according to plan
- Commenced first cylinder production with J/V factory in China
- During this quarter, UAC Norway produced 451 cylinders (250-bar equivalent)
- Production is on track with budgeted expansion in production capacity in 2H 24 with approval of E8-based products

Key milestone to be achieved in the next quarter(s)

- Secure export certification for Chinese production
- Continue product development to reach higher cylinder and lower weight cylinders
- Continue organisational build up in the J/V factory in China for operational excellence
- Increase sales efforts for expansion to North America

Company information

Website:	https://www.uac.no/
HQ:	Kristiansand, Norway
No. of employees (EOY-23):	59 (excl. UAC China JV)
Sector:	Manufacturing & Industrial
Phase:	Late Venture
Audited Revenues (2023)	NOK 331 million
Audited EBITDA (2023)	NOK 87.4 million

About UAC

Business model

Game plan

Market size

Product portfolio

Storage and transport solutions for hydrogen, CNG, biogas

Key customers

Technology and differentiation

- UAC has since inception in 2006 developed and refined glass fibre weaving to develop cylinders that can hold compressed gases at >425 bar at half the price of competing (carbon fibre) solutions.

ESG drivers and impact

By developing cost effective standardized containers for the transportation of hydrogen, UAC accelerates the adoption to clean hydrogen and enables the energy transition.

SDGs alignment: 7 and 11

Futurehome ("FH")

Futurehome is a hardware enabled SAAS company producing smart energy management systems that help consumers centralise, automate, and monitor household appliances, offering greater flexibility and visibility in energy consumption and costs.

The company's core product is a smart hub ("Smarthub II") that allows users to connect and control a wide range of energy consuming devices in their homes, including thermostats, water boiler relays, rotary dimmers, smart plugs, Home Area Network devices ("HAN"), mode switches, EV chargers, smoke detectors, motion cameras and locks. The hub can connect to both Futurehome products and third-party devices. The game plan is catered around geographical expansion to Nordic and European markets, commercialization of the EV charger, introduction of the AI-enabled optimization service and positioning for the flexibility market in the long term.

In May-23, the Fund concluded an investment in Futurehome of NOK 50m (split across two tranches of NOK 25m each), representing 14.3% fully-diluted ownership stake. In December-23, the Fund participated with NOK 7.5m in a NOK 32m convertible loan note issued by the company to resolve a short-term liquidity shortfall and facilitate the launch of FH Charge in 1Q-24.

Quarter in brief

- Weak sales figures in Sweden and Denmark resulting in constrained cash flow situation
- Restructuring initiatives activated with organisational changes, hereunder recruitment of new CEO, replacing CCO and trimming of the organisation to reduce costs
- Renegotiation and reduction of debt from secured and unsecured lender in combination with injection of additional equity

Key milestone to be achieved in the next quarter(s)

- Conclude and operationalize internal outbound sales initiatives
- Implement the revised strategy and OKRs throughout the organization
- Recruit new CFO and strengthen the sales team
- Implement target sales activities with key partners
- Conclude on sale of non-core assets
- Reach positive EBITDA
- Continue initiatives to increase recurring revenue stream

Company information

Website:	https://www.futurehome.io/en/
HQ:	Oslo, Norway
No. of employees (EOY-23):	58 (incl. FTE-equivalent consultants)
Sector:	Manufacturing & Energy Efficiency
Phase:	Venture
Audited Revenues (2023)	NOK 35.1 million
Audited EBITDA (2023)	NOK (79.4) million

About Futurehome

(1) EV Charger market in Europe, # of units sold. Source: EY

Product portfolio

Key customers

Technology and differentiation

- Futurehome's energy management solution is centered around a smart centralized hub that offers household energy management solutions in a safe and secure way
- Unique ability to sell flexibility to local and national grid owners (with incentives to household)

ESG drivers and impact

By offering substantial energy savings to households through lower energy consumption, Futurehome will enable the transition to sustainable cities and urban communities through building smarter homes.

SDGs alignment: 7, 9 and 11

Heimdall Power (“HP”)

Heimdall Power is a company offering dynamic line rating and ambient adjusted rating services to utilities across the globe. The company has a global customer base across Europe, North America and Asia.

To enable real-time operational insights for grid operators, HP combines hardware and software by delivering to customers sphere-shared neurons powered by advanced software that collects data and enables safer, and more efficient grid operations and planning. The company has also developed a proprietary drone installation technique on high voltage lines, enabling a seamless experience for its customers even in remote landscapes.

In June 2024, the Fund concluded a NOK 40m investment in Heimdall Power (conducted across two closings NOK 30m + 10m), corresponding to a fully-diluted ownership stake of 9% in the company.

Quarter in brief

- Closing Series B funding round of USD 25m
- 70 physical neurons installed during quarter, up from 51 installed in Q1-24
- First US drone installation completed for Great River Energy
- Successful customer onboarding for Salzburg Netz, Netz Niederösterreich and Fagne
- Upselling of existing customers contracts for Skellefteå Kraft and Austrian Power Grid
- Over 50 test installations with v2 drone tool, which is now ready for customer installations
- US Country Manager and US Head of Sales hired
- Heimdall Power mentioned in Wall Street Journal and Forbes as promising new technology to boost power grids⁴
- Announcement of a public-private mobilization from the Biden-Harris Administration to upgrade 100,000 miles of existing power lines in the US with grid-enhancing technologies such as DLR

Key milestone to be achieved in the next quarter(s)

- Continued improvement of neuron reliability
- De-installation of neurons with drone tool
- Adding satellite connectivity to v4 neuron
- Continued testing of SCADA connectors for swift operational integration
- Smooth CEO transition to the US and strengthening of US team

About Heimdall Power

Product portfolio

Key customers

Technology and differentiation

- Heimdall uses a combination of hardware sensors and software monitoring by deploying physical and virtual neurons onto customer's grids.
- Accurate sensors that detect temperature, icing, sagging, and faults on the line.
- Autonomous drone installations of sensors (neurons) without need to turn off the power grid.

ESG drivers and impact

- Accelerates the energy transition by improving capacity of and optimizing the utilization of power grids.
- Enabling safer and more efficient operations with HSE benefits

SDGs alignment: 9, 11 and 12

Periodic Reporting Obligations

Semi-annual unaudited statements: Attached as Appendix 1 and Appendix 2 – the unaudited financial statements of the Fund and VIOS 224 AS (100% owned by the Fund) covering the financial period 1st January 2024 to 30th June 2024.

Tax share value: When calculating the taxable net wealth for the shareholders in the Fund, please use NOK 97.7947 as the taxable value per share as of 01.01.2024. Please note that the tax share value of an investment has not been audited, and there may be changes if we receive new information from the portfolio companies.

Annual ESG report: In accordance with regulatory requirements, the report has been delivered to the Fund investors by 30 June 2024. The next report will be delivered to Fund investors by 30 June 2025.

Assets subject to special arrangements due to illiquidity (AIF § 4-3(1.a)): None of the Fund's assets are subject to special arrangements arising from their illiquid nature.

Liquidity Management (AIF § 4-3(1.b)): The Fund is an unleveraged closed-ended AIF and thus this disclosure is not applicable.

Risk Management (AIF § 4-3(1.c)):

Risk profile: An investment in the Fund carries a high degree of risk. For more information on risk factors, please see section 5.3, 8 and 10.2.3 in the information memorandum of the Fund.

The assessment of risk will be an integral part of the due diligence process carried out in conjunction with each investment in the portfolio. The Manager has the overall responsibility for risk management following duties pursuant to the AIFM Act and as further described in the Fund Shareholder Agreement, the Fund Management Agreement and the Information Memorandum. The Manager seeks to identify and mitigate risk factors to reduce risk, increase value, and lower transaction costs. Further, the Manager has integrated sustainability risks into the investment decision-making process as further described in section 10.2.3 of the IM.

Risk Management Systems: In the Alternative Investment Funds Act (AIFM Act) § 3-7 it is stated that the AIF manager shall have a risk management function that is functionally and hierarchically separated from the manager's operational activities, including portfolio management. In NRP Zero this is, among other things, carried out by having separate leaders for the Portfolio Management and the Risk Management functions. The Risk Management function shall not perform any tasks that may be in conflict with the operational activities. The Board of NRP Zero has also adopted instructions and a routine collection in accordance with AIF act of 20 June 2014 no. 28, regulations to the AIFM act of 26 June 2014 no. 877, EU directive 2011/61/EU on AIFMD and AIFMD's associated regulation 231/2013.

The Risk management function's main task is to identify, manage and monitor all relevant and potential risks

associated with the portfolio management of the funds that the Company manages. Central to this work is to facilitate, follow up and control the manager's due diligence process in the implementation of new investments. With due diligence means review, evaluation and control of the investment object's legal, technical, financial and other essential elements before the investment decision.

The Risk Management function's aim is also to support the management team in the identification and reduction of risk.

The Board of NRP Zero has established a Risk Policy for the Fund. Central to the Risk Policy is the AIF's investment mandate, and in addition the Risk Policy contains other qualitative and quantitative management frameworks (as presented in the disclosed investor material).

Given the entry of force of the SFDR into Norway, the risk management function ensures that the Company considers sustainability risks when complying with the general requirements of the duties it performs under AIFMD Article 57.

It will work with the Company's management to integrate sustainability risks into its activities and investment strategies, and ensure that the necessary procedures and processes are in place to enable the Company to effectively manage the exposure of sustainability risks for each of the funds managed.

The Fund has its own depositary who will check the Fund's cash flows, that payments from investors in connection with subscriptions for shares have been received and that all liquid funds are booked in accounts opened in the Fund's name, amongst others.

Reporting: Ongoing reporting to the responsible functions is a key part of the Risk Management function. The purpose of these reports is to document compliance to the relevant commitments and mandates, to document non-compliance and to establish reporting lines for handling exceptions. The Risk Management function reports as follows (non-exhaustive list):

- To the compliance function of the Manager (monthly)
- To the portfolio manager of the Manager (monthly)
- To investors in the AIF (quarterly through this report)
- To the Board of the AIF (quarterly through this report and otherwise semi-annually)
- To the Board of the Manager (quarterly through this report and otherwise semi-annually)
- To the depositary (quarterly through this report and otherwise semi-annually)
- To the Financial Supervisory Authority (quarterly)

In addition, the Risk Management function is reporting continuously to the management team of the Manager and to the Depositary. The routines contain rules for escalation of the issues that the Risk Management function may uncover, including breach of an AIF's

investment mandate and risk policy. The risk policy is reviewed on an annual basis.

Conflicts of Interest: AIF management entails several potential conflicts of interest that require transparency and information according to the AIF framework. The Fund shareholder agreement, adherence agreement, fund management agreement and information memorandum describe such conflicts of interest and the management of these. All entities in the NRP Group have guidelines for managing conflicts of interest in their rules and procedures. All agreements involving the Fund and agreements between entities in the NRP Group are entered into on an arm's length principle.

Given the Company's investment mandate as an Article 9 Fund manager, the Risk Management function does not currently anticipate any conflicts of interest that may arise as a result of the integration of sustainability risks into the risk management processes, systems, and internal controls.

Borrowings and guarantees (AIF § 4-3(2)): In accordance with clause 7.4.1 in the Fund SHA, the Fund shall not borrow monies or in other ways deploy financial gearing. However, the Fund may establish short-term credit lines and other short-term loan facilities or bridging facilities to, among other things, cover ongoing operating cost and make investments between drawdowns, subject to any drawdown or utilisation of such credit lines, short-term loan facilities and bridging facilities being repaid within twelve (12) months after each relevant drawdown and utilisation. As of the end of the reporting period, the Fund has not established such short-term debt facilities.

Valuation / NAV Q2-24:

See section "*Fund Performance*" in this report for financial details.

The Valuation Committee approved the NAV on 14. August 2024, and agreed that the procedures, principles and methodologies of valuation are in accordance with the Valuation Policy, and thus in-line with acceptable accounting practices and market practice; and the pricing information, the calculation and conclusions related to the valuation were sufficiently documented.

The equity value of each investment position is determined on a stand-alone basis by using and combining latest share issue pricing levels and generally

accepted valuation methods (incl. DCF, peer review, etc) without applying any discount for lack of liquidity, lack of control, size, the existence of any shareholders agreement or similar circumstances nor any premium for potential synergies from a combination with another business.

Equity values are based on the fully diluted approach, where ordinary shares, preferred shares, convertible debt, options/warrants and other equity instruments are considered on an as-converted basis to determine the NAV or FMV per share. The NAV per share and NAV considers the FX adjusted value of each portfolio investment.

Fund Assets

Cash & Cash Eq. (incl. current assets) is valued in accordance with Norwegian GAAP and as presented through the quarterly financial statements prepared by the Fund's Business Manager (NRP Business Management AS).

The fair market value (FMV) of the Fund's ownership in:

- Alva Industries AS: Set to the Fund's cost price through considering the valuation methodology recent transaction in the company's equity with a qualitative assessment of 2023 performance and 2024 plans.
- C-Leanship A/S: Set to the Fund's cost price, adjusted for USD/NOK FX impact, through considering recent transaction in the company's equity, market approach and DCF analysis.
- Umoe Advanced Composites AS: FMV is set based on a valuation framework recommended by a third-party valuation advisor⁵.
- Futurehome AS: Set to the subscription / conversion share price in the most recent transaction that was concluded in June / July 2024.

Fund liabilities:

Short-term liabilities are valued in accordance with Norwegian GAAP and as presented through the quarterly financial statements prepared by the Fund's Business Manager (NRP Business Management AS). The Fund (incl. affiliated entities) does not have any long-term liabilities.

⁵ For the avoidance of doubt, the third-party valuation advisor was not solely appointed by UAC, but by UAC and an unaffiliated party. The third-party

valuation advisor delivered the valuation report to both parties in December-23.
