Investor Report 3Q-2024

Date of report: 15 November 2024

Disclaimer

This fund update has been prepared by NRP Zero AS (the "Manager"). The update solely aims to provide guidance and information. Under no circumstances is this update meant to be considered as a tool in financial or investment advising, hereunder recommendations of purchase or sale, with or without compensation, of financial instruments or other forms of financial assets.

The information contained herein has been obtained from sources believed to be reliable and in good faith. Manager can however not guarantee or be held financially or legally responsible for the accuracy, completeness or correctness of the information contained in this fund update. We underline that investing in venture companies in the cleantech space are associated with high risk. All investors must be prepared that such investments might result in monetary losses. Anyone who uses this update as a basis for purchasing shares at a later time must make sure that all relevant and updated information is obtained. The information in this fund update is only valid per date of preparation.

Investors are encouraged to seek advice in any type of financial investments made in private or as a corporation. Investors must comply that any statements or comments on future predictions made in this update might not occur. Hereunder, investors must understand and accept that present gains is not a guarantee for future gains. Any investment described or mentioned in this update is risk sensitive with the possibility of losses occurring.

Confidential and privileged information

Please note that the information in this document, including any information regarding our portfolio companies and their financial status, is strictly confidential. The information may not be copied or circulated to anyone but the addressed recipients without the prior written consent of the Manager. You are also reminded of the duty of confidentiality you have undertaken by signing the Fund Shareholder Agreement.

Executive Summary

Fund Overview

NRP Green Transition I AS is a closed-end venture capital fund dedicated to building a portfolio of Nordic industrial cleantech investment positions primarily through investments in shares and other equity and equity-like instruments (the "**Fund**"). The Fund is managed by NRP Zero AS (the "**Manager**").

The investment objective of the Fund is to achieve long term capital appreciation through making sustainable investments within the meaning of SFDR Article 2 (17) and build a diversified portfolio with an attractive risk/return profile, targeting a return on invested capital of 4.0x.

Through investing in capital light companies with moderate technical risk, the Fund aims to deliver positive impact and enhance long-term returns through a robust strategy and approach to active ownership.

Fund Economics & Performance

Capital calls & deployment

- In Q3-24, NOK 39.5 million capital called from shareholders to fund, amongst others, the investment in Maritime Robotics (35m) and Futurehome (4.7m).
- Total paid-in-capital reached NOK 365.4 million, corresponding to 81.8% of total commitments.

Net Asset Value & Multiple on invested capital

- No significant change on a per share basis in Q3-24 vs. Q2-24.
- The NAV, adjusted for foreign exchange, is set to NOK 475.1 per share (vs. NOK 477.0 in Q2-24), equivalent to NOK 347.2 million and corresponding to a 5.0% discount on the average cost price of the shares.
- The gross multiple of invested capital in portfolio companies is set to 1.02x (vs. 1.03x in Q2-24).

Market Comment & Deal Pipeline

Key highlights on cleantech deal flow and relevant exits in Q3 2024

- Based on the briefing from Cleantech for Europe, Q3 recorded €1.4b inflow of venture and growth capital into cleantech companies in Europe, a weaker quarter compared to Q2 (€2.5b). With 129 recorded deals, early-stage (seed and Series A round) deal count fell, while later-stage (series B and growth equity) deals rose by 19% compared to the last quarter. In terms of the most funded segment, Energy & Power sector-related

deals received the largest share at 41% of total investment, followed by agri-tech/food at 17% of total funding.¹

- In the Nordics, €653m of cleantech funding was recorded (26% decrease from Q2), whereby ~400m was equity and the rest split between grants and debt. In this quarter, Energy Efficiency-related transactions received the most funding, with Heimdall Power featured as one of the top 10 investments in the Cleantech for Nordics briefing by transaction size.²
- Overall, this quarter continues to exemplify the funding gap and 'scaling' challenges that the founders and companies in the cleantech ecosystem face.
- Relevant exits this quarter include Siemens Energy's acquisition of a 76% stake in Gridpulse d.o.o., a Slovenian company specializing in transmission line monitoring through sensors and remote connectivity for dynamic insights for operators, and Iberdrola's 100% acquisition of Balantia, a Spanish company offering decarbonization roadmaps and energy management system automation for homes and corporates.

Regulatory / Policy developments

- The Draghi report authored by the former European Central Bank Chief Mario Draghi lays out a new industrial strategy for Europe accelerate technological advancement and innovation to ensure European competitiveness. Draghi's findings are used by EU energy ministers to inform the bloc's energy sector preparedness and resilience going forward.
- The European Commission invests €4.8 billion of grants in net-zero projects from the ETS Innovation Fund to put in place cutting-edge technology to reduce 476m tonnes of CO2 emissions by 2040.
- UN Climate Change Conference (COP 29) is convening global leaders in Baku, Azerbaijan in November 2024 to continue the discussions on global efforts and funding required to accelerate the 'transition away from fossil fuels.

Deal flow

Key Events in Q3 2024

Conversion of convertible loan and investment of NOK 4.7m into Futurehome AS

As indicated in the portfolio update shared with fund investors on 16 July 2024, the board of directors in strong support from the Manager initiated a restructuring process with the company to reduce debt, raise new equity and implement necessary organisational changes and cost cuts. The Manager thereby converted an outstanding convertible loan of NOK 7.82m (incl. accrued interest) into ordinary shares in Futurehome; and subscribed for ordinary shares amounting to NOK 4.7m in an equity issue of c. NOK 20m. Proceeds will be channelled towards reducing vendor debt, supporting operational cash flows and enabling the company to capitalize on growth opportunities. Following the restructuring, the fund will have a fully-diluted ownership stake of ca. 20% in the company.

Investment of NOK 35 million into Maritime Robotics AS

The Fund completed an investment of NOK 35m into the Norwegian company Maritime Robotics, a leading provider of uncrewed surface vessels and autonomous navigation systems, serving commercial and defense customers across maritime applications such as mapping & surveying, defense & security, energy and transportation & logistics.

NRP Zero co-led the growth funding round of c. NOK 130 million alongside Nysnø Climate Investments, Umoe and Holta Invest, with meaningful participation from existing investors, chairman and employees.

Key Events after the Reporting Period

(1) NOK 20.0 million by Founder and NOK 345.9 million by Fund investors.

Fund Net Asset Value (NAV)¹

NAV per share (NOK/Share)

(1) Net Asset Value (NAV) = Fund Assets – Fund Liabilities. The Valuation Committee approved the NAV on 4. November 2024, and agrees that the procedures, principles and methodologies of valuation is in accordance with the Valuation Policy, and thus in-line with acceptable accounting practices and market practice; and the pricing information, the calculation and conclusions related to the valuation were sufficiently documented. Fund Assets = FMV of Investments + Cash & Cash Equivalents. Fund Liabilities = Short-Term Liabilities + Long-Term Liabilities. See section "Periodic reporting obligations" for further details.

Fund Return Multiples

	Q2-2024 (reference)		Q3-2024	
	NOK-denominated	Local Currency	NOK-denominated	Local Currency
DPI (Distribution to Paid-in Capital)	0.00x	0.00x	0.00x	0.00x
RVPI (Residual Value ¹ to Paid-in Capital)	0.95x	0.95x	0.95x	0.95x
TVPI ² (Total Value to Paid-in Capital)	0.95x	0.95x	0.95x	0.95x

(1) Residual value or NAV (= Fund assets - Fund liabilities) is the fair market value of the Fund's investment positions plus other fund assets (e.g. cash) less fund liabilities (e.g. account payables).

(2) TVPI = DPI + RVPI

Gross multiple on invested capital in PortCos¹

(1) Considers the FX-adjusted value of each portfolio investment, i.e. "NOK-denominated"

(1) Ownership includes all equity instruments held by the Fund, i.e. ordinary shares, preference shares and convertible debt instruments (excl. however compensation warrants held to protect against breach of representation & warranties). (2) The fund committed to a NOK 40 million investment in Heimdall Power, whereby the first closing (NOK 30 million) was completed as of 30 June 2024. The remaining (NOK 10 million) will be executed during 1H 2025.

Portfolio Companies

Alva Industries (“Alva”)

Alva was founded with a vision of electrifying the world through a unique production technology for electric motors. Alva designs and manufactures high-performance electric frameless motors for industrial & defense applications, using its own patented stator production technology (FiberPrinting™).

The unique production technology revolutionizes the way electric motors can be designed & produced, introducing a new benchmark for custom motor development & time-to-market in small & high lot sizes alike. As an added benefit, the FiberPrinting™ production process also allows Alva to pack more power into ironless motors than any current alternatives, enabling the company to offer its clients electric drive systems with competitive technical performance & energy efficiency characteristics, without compromising longevity or reliability.

The Fund has in total invested NOK 60.3m since the initial investment of NOK 10 million³ that was concluded in April-2022.

Quarter in brief

- Launched SlimTorq™ motor series that are the thinnest & lightest on the market, setting a new standard in precision and torque-density while providing customers greater freedom in motor design with lower weight and volume.
- 17x customers (up from 8x in Q2-24) are part of Alva's qualification program having bought customer evaluation units (CEU) within various industrial segments: gimbals (9x), marine & subsea (2x), UAV propulsion (2x), medical (1x) and other applications (3x).
- 2x customers within gimbal (1x) and marine & subsea (1x) have advanced from CEU-stage to pre-series volumes.
- Sikorsky (Lockheed Martin) project secured and kicked off (c. USD 1.85m).
- Second phase of Aurora Flight Sciences (Boeing) project formally approved (c. USD 0.4m).

Key milestones to be achieved in the next quarter(s)

- Increase the total number of clients in qualification.
- Advance existing clients in the qualification funnel.
- Delivery of products to customers in accordance with PO and specs.
- Scaling sales & operational resources to facilitate stronger positioning.

³ In accordance with the Fund Shareholder Agreement, Alva was transferred to the Fund at cost price plus 8% p.a. interest from the date it was acquired until it was transferred.

C-Leanship ("CLS")

CLS is a leading provider of underwater vessel inspection and cleaning services using state of the art remotely operating vehicles ("ROV's"). The company is headquartered in Køge, Denmark, with two operating hubs in Singapore and Busan. The game plan is focused on geographical expansion through rolling out existing product offering, expanding the product offering and entering into new customer segments.

The Fund has in total invested NOK 68.5m (USD 6.64m) in CLS since the initial investment of NOK 50.75m (USD 5m)⁴ was concluded in July 2022.

Quarter in brief

- During Q3-24, CLS conducted 66 hull cleanings, equivalent to a 25% increase compared to Q2-24 and an all-time-high record.

invoiced hull cleanings per quarter

- First commercial prop cleaning completed in Singapore.
- CEO Morten Pilnov has resigned, replacement in place and will start in Q1 2025.
- Growth strategy and ambition for 2025-2026 concluded. Decision to shut down Antwerp due to low commercial traction and move unit to Singapore where demand is exceeding supply.
- Re-org of technical dept. from DK to Singapore
- The underlying market for ROV hull cleaning remains strong as a key driver for shipping decarbonization. The implementation of the EU ETS scheme will further accelerate the demand for decarbonization solutions in shipping. Operational efficiency and scale will increase share of ROV hull cleaning market as % of the total hull cleaning market with ROV hull cleaning is gaining competitiveness against diver alternatives.

Key milestone to be achieved in the next quarter(s)

- Secure new workboat for shipshiner unit moving to Singapore, to be operational starting Q1-25.

- Increasing operational envelope for prop cleaner by receiving approval for additional terminals and trialling workboat solution.
- Launch online customer portal.
- Initiate 2025-2026 strategy plan.
- Initiate partnership agreements with major port services suppliers.

About CLS

Product portfolio

Key customers

Technology and differentiation

- Based on ROV technology from SAAB, CLS has developed a 2nd generation ROV hull cleaner with a closed loop filtration system
- Superior in terms of speed, reliability and accuracy, the ability to clean during port operation/bunkering and meet future environmental requirements, makes CLS's solution a game changer in biofouling management

ESG drivers and impact

CLS's state of the art ROVs reduce air and water pollution in the shipping sector. Effective cleaning of the hull also reduces a vessel's fuel consumption by ~5%

SDGs alignment: 13 and 14

⁴ In accordance with the Fund Shareholder Agreement, CLS was transferred to the Fund at cost price plus 8% p.a. interest from the date it was acquired until it was transferred.

Umoe Advanced Composites (“UAC”)

UAC develops and manufactures advanced type IV glass fibre pressure vessels, offering lightweight and cost-efficient solutions for containment, storage and distribution of large volumes industrial gases such as hydrogen and methane (CBG/CNG)

Glass fibre is significantly less costly than for example carbon fibre. Moreover, glass fibre can because of its weight advantage transport 2-3 times more hydrogen compared to similar-sized tanks in steel, representing major cost and environmental benefits. The game plan is catered around production scale-up in Norway, geographical expansion through JV production, technological innovation and considering vertical/horizontal growth avenues.

The Fund has in total invested NOK 77.5m since the initial investment was concluded in January 2023.

Quarter in brief

- YTD order intake continues to be above forecast
- Ongoing cylinder production with J/V factory in China, pending export approval.
- During this quarter, UAC Norway produced 458 cylinders (250-bar equivalent), somewhat below budget given a delayed commencement of the production of new lighter and higher pressurised E8 cylinders

Key milestone to be achieved in the next quarter(s)

- KIWA certification in place for E8 cylinders
- Secure export certification for Chinese production
- Conduct cylinder testing to comply with new EU type standards
- Continue product development to reach higher cylinder and lower weight cylinders
- Continue organisational build up in the J/V factory in China for operational excellence

- Increase sales efforts for expansion to North America and conclude on hiring of sales personnel for the Asian-Pacific markets.

Business model

Game plan

Market size

Product portfolio

Storage and transport solutions for hydrogen, CNG, biogas

Key customers

Technology and differentiation

- UAC has since inception in 2006 developed and refined glass fibre weaving to develop cylinders that can hold compressed gases at >425 bar at half the price of competing (carbon fibre) solutions.

ESG drivers and impact

By developing cost effective standardized containers for the transportation of hydrogen, UAC accelerates the adoption to clean hydrogen and enables the energy transition.

SDGs alignment: 7 and 11

Futurehome (“FH”)

Futurehome is a hardware enabled SAAS company offering smart energy management systems that help consumers centralise, automate, and monitor household appliances’ power consumption, offering greater flexibility and visibility in energy consumption and costs.

The company’s core product is a smart hub (“Smarthub II”) that allows users to connect and control a wide range of energy consuming devices in their homes, including thermostats, water boiler relays, rotary dimmers, smart plugs, Home Area Network devices (“HAN”), mode switches, EV chargers, smoke detectors, motion cameras and locks. The hub can connect to both Futurehome products and third-party devices. The game plan is catered around geographical expansion to Nordic and European markets, commercialization of the EV charger, introduction of the AI-enabled optimization service and positioning for the flexibility market in the long term.

The Fund has in total invested NOK 62.2m since the initial investment of NOK 50.0m was concluded in May 2023.

Quarter in brief

- Completed a financial restructuring of the company, inter alia management and organisational changes, additional costs cuts and strengthening of the balance sheet.
- Changes to the c-level management with new CEO in place (Eivind Helgaker), replacement of CCO and recruitment of new CFO.
- Revision of sales initiatives to partners and installers, including establishment of direct sales capabilities.

Key milestone to be achieved in the next quarter(s)

- Implementation of revised strategy
- Conclude on additional changes to the organisation
- Revise strategy for entering international markets
- Implement OKRs throughout the organization
- Conclude on sale of non-core assets
- Reach positive EBITDA
- Implement recurring revenue stream

Key customers

Technology and differentiation

- Futurehome’s energy management solution is centered around a smart centralized hub that offers household energy management solutions in a safe and secure way
- Unique ability to sell flexibility to local and national grid owners (with incentives to household)

ESG drivers and impact

By offering substantial energy savings to households through lower energy consumption, Futurehome will enable the transition to sustainable cities and urban communities through building smarter homes.	SDGs alignment: 7, 9 and 11 
---	--

Heimdall Power (“HP”)

Heimdall Power offers dynamic line rating (“DLR”) and ambient adjusted rating services to utilities across the globe. The company has a global customer base across Europe, North America and Asia.

To enable real-time operational insights for grid operators, HP combines hardware and software by delivering to customers sphere-shared neurons powered by advanced software that collects data and enables safer, and more efficient grid operations and planning. The company has also developed a proprietary drone installation technique on high voltage lines, enabling a seamless experience for its customers even in remote landscapes.

In June 2024, the Fund concluded a NOK 40m investment in Heimdall Power (conducted across two tranches NOK 30m + 10m)⁵, corresponding to a fully-diluted ownership stake of ca. 9% in the company.

Quarter in brief

- During this quarter, 102 neurons installed on customers’ lines (up from 70 in Q2-24), 90% of the installations via drone tool.
- Growing base of total number of neurons installed, with 552 physical neurons in operations to date (15% growth from Q2-24)
- Won SH Netz (Germany) DLR pilot contract for deployment of physical neurons
- Upselling of existing customer contracts for Bayernwerk and ESB.
- Continued strengthening of US organization, with hiring of US Operations Manager
- US Federal Energy Regulatory Commission (FERC) announced the advanced notice of proposed order to introduce DLR requirement for grid operators, strengthening utilities interest.

Key milestone to be achieved in the next quarter(s)

- Continued improvement of neuron reliability
- De-installation of neurons with drone tool
- Adding satellite connectivity to v4 neuron
- Adapting DLR solution for the US market, including conductor size, temperature capabilities, and on-premise software).
- Respond to and win major RFPs for DLR contracts in European markets to be awarded in 2025.

Company information

Audited Revenues (2023)	NOK 24.1m
Audited EBITDA (2023)	NOK (36.5)m

About Heimdall Power

Product portfolio

Key customers

Technology and differentiation

- Heimdall uses a combination of hardware sensors and software monitoring by deploying physical and virtual neurons onto customer’s grids.
- Accurate sensors that detect temperature, icing, sagging, and faults on the line.
- Autonomous drone installations of sensors (neurons) without need to turn off the power grid.

ESG drivers and impact

- Accelerates the energy transition by improving capacity of and optimizing the utilization of power grids.
- Enabling safer and more efficient operations with HSE benefits

SDGs alignment: 9, 11 and 12

⁵ The fund committed to a NOK 40 million investment, whereby the first tranche (NOK 30 million) was completed as of 30 June 2024. The remaining (NOK 10 million) will be executed in 1H 2025.

Maritime Robotics (“MR”)

Maritime Robotics is a global provider of uncrewed surface vessels (USVs) and autonomous navigation systems (ANS), serving commercial and defense customers across maritime applications such as mapping & surveying, defense & security, energy and transportation & logistics.

By leveraging an innovative product portfolio and technology that enable remote onshore control and monitoring of USVs and integrated third-party vessels, Maritime Robotics delivers substantial value for customers in the form of HSE advantages for its workforce, cost-savings from increased operational efficiency, reduced fuel consumption and lower emissions, as well as enhanced operational capabilities.

Game plan focuses on becoming a leading global supplier of (i) USV platforms with payloads for marine data acquisition; and (ii) autonomous navigation systems to third-party civilian and defence vessels.

In August 2024, the Fund concluded a NOK 35m investment in Maritime Robotics.

Quarter in brief

- Closing growth funding round of c. NOK 130m from Nysnø, Umoe, Holta and NRP Zero, as well as chairperson, key management and employees.
- Hanne Marit Bjørk, with 10+ years in executive leadership roles at the Norwegian Defense Research Establishment, appointed as a board member.
- Re-organization of C-level and commercial team.
- Merger of parent (Maritime Robotics AS) and wholly owned manufacturing subsidiary (Maritime Robotics Vanvikan AS).
- Sales to industrial and defence customer in accordance with plan.

Key milestone to be achieved in the next quarter(s)

- Successful execution on secured back-log, i.e. delivery of multiple USV products and ANS projects to third-party.
- Finalising expansion plan into the US and defence space.
- Outsourcing of non-core manufacturing.
- Recruitment of new CCO.
- Implementation of NRP Zero's governance package.

Investment Committee	Adele Christensen Os (Head), Andrew Robbins, Carl Hall, Oscar Spieler
Compliance Committee	Hilde Høksnes (Head), Andreas Marø, Charmaine Lee
Valuation Committee	Jonas Myklebost (Head), Emil Sebastian Harberg, Andreas Marø

Investment Strategy

The Fund seeks to build a diverse portfolio of industrial cleantech companies in the Nordics that delivers a positive impact on environmental, social and governance matters and provides the Fund investors with long-term capital appreciation with best-in-class risk-adjusted returns. To achieve this, the Fund is looking for businesses with the following common features:

- Entrepreneurial management team with execution capabilities and track-record;
- Business model that contributes to resource efficiency and/or accelerates the energy transition;
- Proven technology, product or service on the brink of commercialization or having reached the commercialization phase with moderate technical risk;
- Asset-light business model with a clear competitive advantage that enables a scalable growth potential;
- Ownership plan that can be successfully effectuated with limited reliance on government or public institutions (i.e. in relation to subsidies, framework amendments, licenses/permits);
- More than one revenue stream, hereunder the potential of selling multiple products, services or technologies to multiple markets; and
- Businesses that can be positioned for divestment to industrial buyers.

An important part of the Manager's investment philosophy is the "1x/4x" principle: in every investment the Manager makes, we strive to protect the invested capital (1x) and at the same time achieve 4x on invested capital. Through privately negotiated transactions, the Manager seeks to ensure the execution of rigorous and detail-oriented due diligence processes, agreement with existing shareholders and management on an ownership plan, and regulation of material terms and conditions in the shareholders' agreement and subscription/investment agreement that provides the Fund with stronger control and economic rights relative to the shareholding in the company. Throughout the ownership period, the Manager aims to actively accelerate the growth potential of the business through board representation (directly or indirectly), participation in shareholder meetings and strategy meetings, and informal interaction with the management.

Sustainable Finance Disclosure Regulation (SFDR)

As the law "Offentliggjøringsforordningen", the SFDR in Norwegian and the taxonomy ("taksonomien") entered into force in Norway on 1 January 2023, the Board of NRP Zero AS in the Board meeting on 22 March 2023 officially approved of the Manager's operation of NRP Green Transition I as an "Article 9" fund, pursuant to (EU) 2019/2088 (SFDR) Article 9.

The Board thereby confirms the Fund's commitment to making sustainable investments as its objective pursuant cf. SFDR Article 2 (17), designating that the investments of the Fund, as set forth in the SFDR, shall follow good governance practices, contribute to an environmental objective, and/or social objective, and not significantly harm other environmental objective or social objectives.

Based on the above, the Board approved relevant amendments made to the Fund's SFDR disclosure documents and marketing materials, so that they are in coherence with the regulatory changes as of 1 January 2023.

This information is not, and does not purport to be, complete. Please refer to the Fund's Shareholder Agreement.

Periodic Reporting Obligations

Assets subject to special arrangements due to illiquidity (AIF § 4-3(1.a)): None of the Fund's assets are subject to special arrangements arising from their illiquid nature.

Liquidity Management (AIF § 4-3(1.b)): The Fund is an unleveraged closed-ended AIF and thus this disclosure is not applicable.

Risk Management (AIF § 4-3(1.c)):

Risk profile: An investment in the Fund carries a high degree of risk. For more information on risk factors, please see section 5.3, 8 and 10.2.3 in the information memorandum of the Fund.

The assessment of risk will be an integral part of the due diligence process carried out in conjunction with each investment in the portfolio. The Manager has the overall responsibility for risk management following duties pursuant to the AIFM Act and as further described in the Fund Shareholder Agreement, the Fund Management Agreement and the Information Memorandum. The Manager seeks to identify and mitigate risk factors to reduce risk, increase value, and lower transaction costs. Further, the Manager has integrated sustainability risks into the investment decision-making process as further described in section 10.2.3 of the IM.

Risk Management Systems: In the Alternative Investment Funds Act (AIFM Act) § 3-7 it is stated that the AIF manager shall have a risk management function that is functionally and hierarchically separated from the manager's operational activities, including portfolio management. In NRP Zero this is, among other things, carried out by having separate leaders for the Portfolio Management and the Risk Management functions. The Risk Management function shall not perform any tasks that may be in conflict with the operational activities. The Board of NRP Zero has also adopted instructions and a routine collection in accordance with AIF act of 20 June 2014 no. 28, regulations to the AIFM act of 26 June 2014 no. 877, EU directive 2011/61/EU on AIFMD and AIFMD's associated regulation 231/2013.

The Risk management function's main task is to identify, manage and monitor all relevant and potential risks associated with the portfolio management of the funds that the Company manages. Central to this work is to facilitate, follow up and control the manager's due diligence process in the implementation of new investments. With due diligence means review, evaluation and control of the investment object's legal, technical, financial and other essential elements before the investment decision.

The Risk Management function's aim is also to support the management team in the identification and reduction of risk.

The Board of NRP Zero has established a Risk Policy for the Fund. Central to the Risk Policy is the AIF's investment mandate, and in addition the Risk Policy contains other qualitative and quantitative management

frameworks (as presented in the disclosed investor material).

Given the entry of force of the SFDR into Norway, the risk management function ensures that the Company considers sustainability risks when complying with the general requirements of the duties it performs under AIFMD Article 57.

It will work with the Company's management to integrate sustainability risks into its activities and investment strategies, and ensure that the necessary procedures and processes are in place to enable the Company to effectively manage the exposure of sustainability risks for each of the funds managed.

The Fund has its own depositary who will check the Fund's cash flows, that payments from investors in connection with subscriptions for shares have been received and that all liquid funds are booked in accounts opened in the Fund's name, amongst others.

Reporting: Ongoing reporting to the responsible functions is a key part of the Risk Management function. The purpose of these reports is to document compliance to the relevant commitments and mandates, to document non-compliance and to establish reporting lines for handling exceptions. The Risk Management function reports as follows (non-exhaustive list):

- To the compliance function of the Manager (monthly)
- To the portfolio manager of the Manager (monthly)
- To investors in the AIF (quarterly through this report)
- To the Board of the AIF (quarterly through this report and otherwise semi-annually)
- To the Board of the Manager (quarterly through this report and otherwise semi-annually)
- To the depositary (quarterly through this report and otherwise semi-annually)
- To the Financial Supervisory Authority (quarterly)

In addition, the Risk Management function is reporting continuously to the management team of the Manager and to the Depositary. The routines contain rules for escalation of the issues that the Risk Management function may uncover, including breach of an AIF's investment mandate and risk policy. The risk policy is reviewed on an annual basis.

Conflicts of Interest: AIF management entails several potential conflicts of interest that require transparency and information according to the AIF framework. The Fund shareholder agreement, adherence agreement, fund management agreement and information memorandum describe such conflicts of interest and the management of these. All entities in the NRP Group have guidelines for managing conflicts of interest in their rules and procedures. All agreements involving the Fund and agreements between entities in the NRP Group are entered into on an arm's length principle.

Given the Company's investment mandate as an Article 9 Fund manager, the Risk Management function does not currently anticipate any conflicts of interest that may

arise as a result of the integration of sustainability risks into the risk management processes, systems, and internal controls.

Borrowings and guarantees (AIF § 4-3(2)): In accordance with clause 7.4.1 in the Fund SHA, the Fund shall not borrow monies or in other ways deploy financial gearing. However, the Fund may establish short-term credit lines and other short-term loan facilities or bridging facilities to, among other things, cover ongoing operating cost and make investments between drawdowns, subject to any drawdown or utilisation of such credit lines, short-term loan facilities and bridging facilities being repaid within twelve (12) months after each relevant drawdown and utilisation. As of the end of the reporting period, the Fund has not established such short-term debt facilities.

Valuation / NAV Q3-24:

See section “Fund Performance” in this report for financial details.

The Valuation Committee approved the NAV on 4. November 2024, and agreed that the procedures, principles and methodologies of valuation are in accordance with the Valuation Policy, and thus in-line with acceptable accounting practices and market practice; and the pricing information, the calculation and conclusions related to the valuation were sufficiently documented.

The equity value of each investment position is determined on a stand-alone basis by using and combining latest share issue pricing levels and generally accepted valuation methods (incl. DCF, peer review, etc) without applying any discount for lack of liquidity, lack of control, size, the existence of any shareholders agreement or similar circumstances nor any premium for potential synergies from a combination with another business.

Equity values are based on the fully diluted approach, where ordinary shares, preferred shares, convertible debt, options/warrants and other equity instruments are considered on an as-converted basis to determine the

NAV or FMV per share. The NAV per share and NAV considers the FX adjusted value of each portfolio investment.

Fund Assets

Cash & Cash Eq. (incl. current assets) is valued in accordance with Norwegian GAAP and as presented through the quarterly financial statements prepared by the Fund's Business Manager (NRP Business Management AS).

The fair market value (FMV) of the Fund's ownership in:

- Alva Industries AS: Set to the Fund's cost price through considering the valuation methodology recent transaction in the company's equity with a qualitative assessment of 2023 performance and 2024 plans.
- C-Leanship A/S: Set to the Fund's cost price, adjusted for USD/NOK FX impact, through considering recent transaction in the company's equity, market approach and DCF analysis.
- Umoe Advanced Composites AS: FMV is set based on a valuation framework recommended by a third-party valuation advisor⁶.
- Futurehome AS: Set to the subscription / conversion share price in the most recent transaction that was concluded in June / July 2024.
- Heimdall Power AS: Set to the subscription price (per share) in the most recent transaction that was concluded in June 2024.
- Maritime Robotics AS: Set to the subscription price (per share) in the most recent transaction that was concluded in August 2024.

Fund liabilities:

Short-term liabilities are valued in accordance with Norwegian GAAP and as presented through the quarterly financial statements prepared by the Fund's Business Manager (NRP Business Management AS). The Fund (incl. affiliated entities) does not have any long-term liabilities.

⁶ For the avoidance of doubt, the third-party valuation advisor was not solely appointed by UAC, but by UAC and an unaffiliated party. The third-party

valuation advisor delivered the valuation report to both parties in December-23.
