Investor Report 3Q-2025

Date of report: 14 November 2025

Disclaimer

This fund update has been prepared by EnvisionTech AS (the “Manager”). The update solely aims to provide guidance and information. Under no circumstances is this update meant to be considered as a tool in financial or investment advising, hereunder recommendations of purchase or sale, with or without compensation, of financial instruments or other forms of financial assets.

The information contained herein has been obtained from sources believed to be reliable and in good faith. Manager can however not guarantee or be held financially or legally responsible for the accuracy, completeness or correctness of the information contained in this fund update. We underline that investing in venture companies in the cleantech space are associated with high risk. All investors must be prepared that such investments might result in monetary losses. Anyone who uses this update as a basis for purchasing shares at a later time must make sure that all relevant and updated information is obtained. The information in this fund update is only valid per date of preparation.

Investors are encouraged to seek advice in any type of financial investments made in private or as a corporation. Investors must comply that any statements or comments on future predictions made in this update might not occur. Hereunder, investors must understand and accept that present gains is not a guarantee for future gains. Any investment described or mentioned in this update is risk sensitive with the possibility of losses occurring.

Confidential and privileged information

Please note that the information in this document, including any information regarding our portfolio companies and their financial status, is strictly confidential. The information may not be copied or circulated to anyone but the addressed recipients without the prior written consent of the Manager. You are also reminded of the duty of confidentiality you have undertaken by signing the Fund Shareholder Agreement.

Executive Summary

Fund Overview

NRP Green Transition I AS is a closed-end late stage venture capital fund dedicated to building a portfolio of Nordic industrial cleantech investment positions primarily through investments in shares and other equity and equity-like instruments (the "**Fund**"). The Fund is managed by EnvisionTech AS (the "**Manager**").

The investment objective of the Fund is to achieve long term capital appreciation through making sustainable investments within the meaning of SFDR Article 2 (17) and build a diversified portfolio with an attractive risk/return profile, targeting a return on invested capital of 4.0x.

Through investing in capital light companies with moderate technical risk, the Fund aims to deliver positive impact and enhance long-term returns through a robust strategy and approach to active ownership.

Fund Economics & Performance

Capital calls & deployment

- In Q3-25, no capital calls or capital deployments were made.
- Total paid-in-capital stands at NOK 392.8 million, corresponding to 87.9% of total commitments.

Net Asset Value & Multiple on invested capital

- The NAV, adjusted for foreign exchange rates, is set to NOK 440.2 per share (vs. NOK 444.0 in Q2-25), equivalent to NOK 345.9 million and corresponding to a 12.0% discount on the average cost price of the shares.
- The gross multiple of invested capital in portfolio companies is set to 0.97x (vs. 0.97x in Q2-25).

Market Comment & Deal Pipeline

Key highlights on relevant deal flow and transactions in Q3 2025

- Based on the briefing from Cleantech for Europe, European cleantech venture and growth capital investments this quarter was recorded at €1.4b (down from €2.7b in Q2-25).¹
- Total deal volume fell across early-stage and late-stage (Series B and growth equity), with average deal size decreasing to €17.4m compared to €24m in Q2-25.
- European defence tech VC funding soars with global geopolitical volatility, with c.\$1.5b invested

YTD (Q1-Q3-25) across sizeable transactions, with more cleantech companies expanding into dual use strategies.²

- Notable growth equity transactions this quarter incl. Auterion, US provider of autonomous systems software (raised \$130m), Havoc AI, US maritime autonomy company (raised \$85m), and WSense, Italian/Norwegian company specializing in underwater communications technologies (raised €10m).
- Notable exits this quarter include the acquisition of Blue Ocean, a UK based technology specialist and supplier of autonomous underwater vehicles (AUVs) by Helsing, a German defence technology company.³

Regulatory / Policy developments

- European Commission launched a multi-billion Scaleup Europe Fund to bridge the late-stage equity gap across deep tech and cleantech space to foster European competitiveness.

Deal flow

The below table exhibits the development of EnvisionTech's deal flow from Q2-2025 to Q3-2025, split on industry, capital phase and country. Deal flow activity ramps up as the Manager gears up for Fund II.

INDUSTRY

Key Events in Q3 2025

Ongoing portfolio value enhancing initiatives

The EnvisionTech team is working on four separate value enhancing initiatives in the portfolio that will strengthen the growth journeys and substantiate the values of these companies going forward.

We aim to be able to share more details on these initiatives in the upcoming quarterly report for Q4-25.

Key Events after the Reporting Period

No key events to note.

Fund Manager Developments

The Manager conducted a rebranding from NRP Zero AS to EnvisionTech AS ('Envision') in Q1-25 to reflect our underlying investment vision of building tomorrow's sustainable energy system today.

The updated website and vision statement to EnvisionTech can be found here: <https://www.envisiontech.no/>

Launch of Envision Green Transition II AS

EnvisionTech, in parallel with the rebranding, launched Envision Green Transition II ('Fund II') to continue investing in disruptive energy efficiency technologies in the 'early growth' phase, partnering up with entrepreneurial management teams to scale the companies globally.

The Fund will focus on three core themes, being Electrification, Ocean Space, and Transition Acceleration technologies.

The target fund size is NOK 1,000m with a target hard cap of NOK 1,400m.

Fund Performance

Fund Cash Flows

NOK million	Q3-2025	YTD	Accumulated	% of total commitments
Commitments	-	-	446.7	100.0%

Total investments	-	13.3	355.2	79.5%
Distributed to fund investors	-	-	-	0.0%
Distributed to founder	-	-	-	0.0%
Total distributions	-	-	-	0.0%

(1) NOK 20.0 million by Founder and NOK 372.8 million by Fund investors.

Fund Net Asset Value (NAV)¹

NAV vs Drawdowns (NOKm)

NAV per share (NOK/Share)

(1) Net Asset Value (NAV) = Fund Assets – Fund Liabilities. The Valuation Committee approved the NAV on 12. November 2025, and agrees that the procedures, principles and methodologies of valuation is in accordance with the Valuation Policy, and thus in-line with acceptable accounting practices and market practice; and the pricing information, the calculation and conclusions related to the valuation were sufficiently documented. Fund Assets = FMV of Investments + Cash & Cash Equivalents. Fund Liabilities = Short-Term Liabilities + Long-Term Liabilities. See section "Periodic reporting obligations" for further details.

Fund Return Multiples

	Q2-2025 (reference)		Q3-2025	
	NOK-denominated	Local Currency	NOK-denominated	Local Currency
DPI (Distribution to Paid-in Capital)	0.00x	0.00x	0.00x	0.00x
RVPI (Residual Value ¹ to Paid-in Capital)	0.89x	0.89x	0.88x	0.89x
TVPI² (Total Value to Paid-in Capital)	0.89x	0.89x	0.88x	0.89x

(1) Residual value or NAV (= Fund assets - Fund liabilities) is the fair market value of the Fund's investment positions plus other fund assets (e.g. cash) less fund liabilities (e.g. account payables).

(2) TVPI = DPI + RVPI

Gross multiple on invested capital in PortCos

(1) Considers the FX-adjusted value of each portfolio investment, i.e. "NOK-denominated"

(1) Ownership includes all equity instruments held by the Fund, i.e. ordinary shares, preference shares and convertible debt instruments (excl. however compensation warrants held to protect against breach of representation & warranties). (2) Ownership includes only all ordinary shares held and excludes the ownership impact of an outstanding convertible loan of ca. NOK 2.0m

Portfolio Companies

Alva Industries ("Alva")

Alva was founded with a vision of electrifying the world through a unique production technology for electric motors. Alva designs and manufactures high-performance electric frameless motors for industrial & defense applications, using its patented stator production technology (FiberPrinting™).

The unique production technology revolutionizes the way electric motors can be designed & produced, introducing a new benchmark for custom motor development & time-to-market in small & high lot sizes alike. As an added benefit, the FiberPrinting™ production process also allows Alva to pack more power into ironless motors than any current alternatives, enabling the company to offer its clients electric drive systems with competitive technical performance & energy efficiency characteristics, without compromising longevity or reliability.

The Fund has in total invested NOK 60.3m since the initial investment of NOK 10 million⁴ that was concluded in April-2022.

Quarter in brief

- Supported by strong commercial traction, Alva is attracting significant interest from publicly listed competitors and strategic partners, highlighting the company's position as a leading innovator in high-performance electric motors.
- 89x customers are part of Alva's qualification program having bought customer evaluation units (up from 66x in Q2-25). 16x customers have proceeded to pre-series stage (up from 9x in Q2-25). 3x customers have proceeded to first commercial production order stage (up from 2x in Q2-25).

Key milestones to be achieved in the next quarter(s)

- Increase total number of clients in qualification funnel and advance existing leads.
- Delivery of products to customers in accordance with PO and specs.

⁴ In accordance with the Fund Shareholder Agreement, Alva was transferred to the Fund at cost price plus 8% p.a. interest from the date it was acquired until it was transferred.

- Scale production capacity to meet growth targets.
- Secure expansion capital.
- Recruit Chief Operating Officer (COO).

SDGs alignment: 9 and 12

C-Leanship (“CLS”)

CLS is a leading provider of underwater vessel inspection and cleaning services using state of the art remotely operating vehicles (“ROV’s”). The company is headquartered in Køge, Denmark, with two operating hubs in Singapore and Busan. The game plan is focused on expansion by scaling existing products, diversifying the product portfolio and targeting new customer segments.

The Fund has in total invested NOK 73.3m (USD 7.09m) in CLS since the initial investment of NOK 50.75m (USD 5m)⁵ was concluded in July 2022.

Quarter in brief

- In Q3 2025, CLS completed 51 hull cleanings, a 24% decrease from Q2 2025.
- Low volumes in Q3 stemmed from one of the hull cleaning units and its workboat performing a mid-life overhaul over four weeks in July and August.

- The Propellor cleaner was sent back to the manufacturer in September for repairs after experiencing technical difficulties since July with scheduled return to Singapore in mid-October.

Key milestone to be achieved in the next quarter(s)

- Reach EBITDA break-even.
- Adapt technical set-up of units to service bulk/tanker vessels in the Singapore anchorage market, opening up a 5-6x market size vs. the container liners market.
- Improve technical and operational excellence to reduce # of partial cleanings.
- Launch online customer portal to enable fleet-wide visibility, automated documentation and AI insights to elevate customer experience in

order to enable new revenue stream and drive customer loyalty.

- Initiate partnership agreements with major port services suppliers.

About CLS

Business model	Game plan	Market size
 Tech-enabled service	 Global roll-out	2022 2025 ~2-3x \$550M \$1.1B

Product portfolio

Key customers

Technology and differentiation

- Based on ROV technology from SAAB, CLS has developed a 2nd generation ROV hull cleaner with a closed loop filtration system
- Superior in terms of speed, reliability and accuracy, the ability to clean during port operation/bunkering and meet future environmental requirements, makes CLS's solution a game changer in biofouling management

ESG drivers and impact

CLS's state of the art ROVs reduce air and water pollution in the shipping sector. Effective cleaning of the hull also reduces a vessel's fuel consumption by ~5%

SDGs alignment: 13 and 14

⁵ In accordance with the Fund Shareholder Agreement, CLS was transferred to the Fund at cost price plus 8% p.a. interest from the date it was acquired until it was transferred.

⁶ FX rate (USD/NOK) as of 31. Dec. 2024.

Umoe Advanced Composites (“UAC”)

UAC develops and manufactures advanced type IV glass fibre pressure vessels, offering lightweight and cost-efficient solutions for containment, storage and distribution of large volumes of industrial gases such as hydrogen and methane (CBG/CNG).

Glass fibre is significantly less costly than for example carbon fibre. Moreover, due to its weight advantage, glass fibre can transport 2-3 times more hydrogen compared to similar-sized tanks in steel, representing major cost and environmental benefits. The game plan is catered around production scale-up in Norway, geographical expansion through the Chinese JV facility, technological innovation and considering vertical/horizontal growth avenues.

The Fund has in total invested NOK 77.5m since the initial investment was concluded in January 2023.

Quarter in brief

- Secured order intake (YTD) of NOK 354.7m, exceeding budget by 14% with order book continuing to develop strongly.
- In 3Q-25, UAC Norway produced 488 cylinders (250-bar equivalent), in line with the production plan for the quarter.

Key milestone to be achieved in the next quarter(s)

- Secure KIWA certification for E8 cylinders.
- Secure export certification for the Chinese J/V plant's cylinder production.
- Continue expansion of global market position in target geographies, diversification of compressed gas applications beyond H2 (incl. biogas, CNG) and entry into the maritime segment.
- Continue Deep Purple™ development for subsea storage of H2 together with project consortium.

- Continue organisational build-up in the J/V factory in China for operational and sales excellence.

About UAC

Business model

Game plan

Market size

Product portfolio

Storage and transport solutions for hydrogen, CNG, biogas

Key customers

Technology and differentiation

- UAC has since inception in 2006 developed and refined glass fibre weaving to develop cylinders that can hold compressed gases at >425 bar at half the price of competing (carbon fibre) solutions.

ESG drivers and impact

By developing cost effective standardized containers for the transportation of hydrogen, UAC accelerates the adoption to clean hydrogen and enables the energy transition.

SDGs alignment: 7 and 11

FHSD Connect (“FHSD”) (formerly Futurehome)

FHSD acquired the Futurehome AS bankruptcy estate in June 2025, and is a hardware enabled SAAS company offering smart energy management systems that help consumers centralise, automate, and monitor household appliances’ power consumption, offering greater flexibility and visibility in energy consumption and costs.

The company’s core product is a power management application (“Strømkontroll”) controlling a smart hub that connects to and controls a wide range of energy consuming devices in their homes, including thermostats, water boiler relays, rotary dimmers, smart plugs, and EV chargers. The hub can connect to both FHSD products and third-party devices. The game plan is to execute and grow a subscription-based revenue model, expand into Nordic and European markets, and position FHSD for the flexibility market.

The Fund invested NOK 67.8m in Futurehome and will with the transport of its stake in the convertible super senior loan of NOK 2m and NOK 1.3m in new equity in FHSD, seek to recoup value through a successful merger with Sikom Connect followed by executing an aligned exit.

Quarter in brief

- Successful conversion of customers to subscription model with more than 12,500 new subscribers.
- Transfer of partnership agreements and new partnership agreements signed.
- Merger plan approved.

Key milestone to be achieved in the next quarter(s)

- Formally execute the merger of FHSD and Sikom Connect.
- Revise strategy for entering international markets.
- Reach positive EBITDA.

Company information

Unaudited EBITDA (2024)	NOK (54.2) million

About Futurehome

(1) EV Charger market in Europe, # of units sold. Source: EY

Product portfolio

Key customers

Technology and differentiation

- Futurehome’s energy management solution is centered around a smart centralized hub that offers household energy management solutions in a safe and secure way
- Unique ability to sell flexibility to local and national grid owners (with incentives to household)

ESG drivers and impact

By offering substantial energy savings to households through lower energy consumption, Futurehome will enable the transition to sustainable cities and urban communities through building smarter homes.

SDGs alignment: 7, 9 and 11

Heimdall Power (“HP”)

Heimdall Power offers dynamic line rating (“DLR”) and ambient adjusted rating services to utilities across the globe. The company has a global customer base across Europe, North America and Asia.

To enable real-time operational insights for grid operators, HP combines hardware and software by delivering sphere-shared sensors powered by advanced software that collect data and enable increased grid capacity and improved grid operations and planning. The company has also developed a proprietary automated drone installation technique, enabling safe and efficient deployment even in challenging terrains.

In June 2024, the Fund concluded a NOK 40m investment in Heimdall Power (conducted across two tranches NOK 30m + 10m)⁷, corresponding to a fully-diluted ownership stake of ca. 9% in the company.

Quarter in brief

- During the quarter, 73 additional neurons were installed on customers’ lines (down from 74 in Q2-25), 86% of the installations via drone (up from 67% in Q2-25).
- Growing installed base of neurons, with 831 physical neurons (sensors) in operations to date (up 10% from Q2-25).

- New management team onboarded, including CFO, COO and CPO.
- Finalized and tested v4 satellite neuron, ready for shipment to customers.

Key milestone to be achieved in the next quarter(s)

- Finalize and launch non-Chinese drone-based installation solution.
- Launch facility rating software module integrating high-voltage components such as transformers.
- Adapting DLR solution for the US market, including conductor size, temperature capabilities.
- Continue to respond to and win major RFPs for DLR contracts in the European and North American markets in 2H 2025.

Company information

About Heimdall Power

Product portfolio

Key customers

Technology and differentiation

- Heimdall uses a combination of hardware sensors and software monitoring by deploying physical and virtual neurons onto customer’s grids.
- Accurate sensors that detect temperature, icing, sagging, and faults on the line.
- Autonomous drone installations of sensors (neurons) without need to turn off the power grid.

ESG drivers and impact

- Accelerates the energy transition by improving capacity of and optimizing the utilization of power grids.
- Enabling safer and more efficient operations with HSE benefits

SDGs alignment: 9, 11 and 12

⁷ The Fund committed to a NOK 40 million investment, whereby the first tranche (NOK 30 million) was completed in June 2024. The remaining tranche (NOK 10 million) was executed in June 2025.

Maritime Robotics (“MR”)

Maritime Robotics is a global provider of turnkey sea drones and autonomous navigation systems to third party vessels, serving customers across maritime applications in the civil hydrography, defense & security, offshore energy, fishery and transportation & logistics segments.

Maritime Robotics is reshaping the future of maritime operations through an innovative product portfolio and technology that enables remote, onshore control and monitoring of unmanned sea drones. Its solutions deliver significant operational, energy, and cost efficiencies - offering customers improved HSE outcomes, cost savings from increased efficiency, reduced fuel consumption and emissions, and enhanced operational capabilities.

In August 2024, the Fund made its initial NOK 35m investment in Maritime Robotics, corresponding to a fully diluted ownership stake of 9.5%.

Quarter in brief

- YTD sales are exceeding budget, and order intake remains on track with plan.
- Demonstrated its industry-leading sea drone capabilities during NATO's naval exercise in Portugal (REPMUS), supporting missions ranging from seabed mapping to mine countermeasures and critical infrastructure surveillance.⁸
- Successful delivery of its autonomous navigation system to the Orca sea drone, designed for maritime domain awareness and critical underwater infrastructure surveillance.⁹

Key milestone to be achieved in the next quarter(s)

- Positioning manufacturing, product development and sales capabilities to support and enable significant growth.
- Secure expansion capital.

Investment Committee Advisory	Adele Christensen Os (Head), Andrew Robbins, Carl Hall, Oscar Spieler
Compliance Committee	Hilde Høksnes (Head), Andreas Marø, Charmaine Lee
Valuation Committee	Jonas Myklebost (Head), Emil Sebastian Harberg, Andreas Marø

Investment Strategy

The Fund seeks to build a diverse portfolio of industrial cleantech companies in the Nordics that delivers a positive impact on environmental, social and governance matters and provides the Fund investors with long-term capital appreciation with best-in-class risk-adjusted returns. To achieve this, the Fund is looking for businesses with the following common features:

- Entrepreneurial management team with execution capabilities and track-record;
- Business model that contributes to resource efficiency and/or accelerates the energy transition;
- Proven technology, product or service on the brink of commercialization or having reached the commercialization phase with moderate technical risk;
- Asset-light business model with a clear competitive advantage that enables a scalable growth potential;
- Ownership plan that can be successfully effectuated with limited reliance on government or public institutions (i.e. in relation to subsidies, framework amendments, licenses/permits);
- More than one revenue stream, hereunder the potential of selling multiple products, services or technologies to multiple markets; and
- Businesses that can be positioned for divestment to industrial buyers.

An important part of the Manager's investment philosophy is the "1x/4x" principle: in every investment the Manager makes, we strive to protect the invested capital (1x) and at the same time achieve 4x on invested capital. Through privately negotiated transactions, the Manager seeks to ensure the execution of rigorous and detail-oriented due diligence processes, agreement with existing shareholders and management on an ownership plan, and regulation of material terms and conditions in the shareholders' agreement and subscription/investment agreement that provides the Fund with stronger control and economic rights relative to the shareholding in the company. Throughout the ownership period, the Manager aims to actively accelerate the growth potential of the business through board representation (directly or indirectly), participation in shareholder meetings and strategy meetings, and informal interaction with the management.

Sustainable Finance Disclosure Regulation (SFDR)

As the law "Offentliggjøringsforordningen", the SFDR in Norwegian and the taxonomy ("taksonomien") entered into force in Norway on 1 January 2023, the Board of EnvisionTech AS in the Board meeting on 22 March 2023 officially approved of the Manager's operation of NRP Green Transition I as an "Article 9" fund, pursuant to (EU) 2019/2088 (SFDR) Article 9.

The Board thereby confirms the Fund's commitment to making sustainable investments as its objective pursuant cf. SFDR Article 2 (17), designating that the investments of the Fund, as set forth in the SFDR, shall follow good governance practices, contribute to an environmental objective, and/or social objective, and not significantly harm other environmental objective or social objectives.

Based on the above, the Board approved relevant amendments made to the Fund's SFDR disclosure documents and marketing materials, so that they are in coherence with the regulatory changes as of 1 January 2023.

This information is not, and does not purport to be, complete. Please refer to the Fund's Shareholder Agreement.

Periodic Reporting Obligations

Assets subject to special arrangements due to illiquidity (AIF § 4-3(1.a)): None of the Fund's assets are subject to special arrangements arising from their illiquid nature.

Liquidity Management (AIF § 4-3(1.b)): The Fund is an unleveraged closed-ended AIF and thus this disclosure is not applicable.

Risk Management (AIF § 4-3(1.c)):

Risk profile: An investment in the Fund carries a high degree of risk. For more information on risk factors, please see section 5.3, 8 and 10.2.3 in the information memorandum of the Fund.

The assessment of risk will be an integral part of the due diligence process carried out in conjunction with each investment in the portfolio. The Manager has the overall responsibility for risk management following duties pursuant to the AIFM Act and as further described in the Fund Shareholder Agreement, the Fund Management Agreement and the Information Memorandum. The Manager seeks to identify and mitigate risk factors to reduce risk, increase value, and lower transaction costs. Further, the Manager has integrated sustainability risks into the investment decision-making process as further described in section 10.2.3 of the IM.

Risk Management Systems: In the Alternative Investment Funds Act (AIFM Act) § 3-7 it is stated that the AIF manager shall have a risk management function that is functionally and hierarchically separated from the manager's operational activities, including portfolio management. In EnvisionTech this is, among other things, carried out by having separate leaders for the Portfolio Management and the Risk Management functions. The Risk Management function shall not perform any tasks that may be in conflict with the operational activities. The Board of EnvisionTech has also adopted instructions and a routine collection in accordance with AIF act of 20 June 2014 no. 28, regulations to the AIFM act of 26 June 2014 no. 877, EU directive 2011/61/EU on AIFMD and AIFMD's associated regulation 231/2013.

The Risk management function's main task is to identify, manage and monitor all relevant and potential risks associated with the portfolio management of the funds that the Company manages. Central to this work is to facilitate, follow up and control the manager's due diligence process in the implementation of new investments. With due diligence means review, evaluation and control of the investment object's legal, technical, financial and other essential elements before the investment decision.

The Risk Management function's aim is also to support the management team in the identification and reduction of risk.

The Board of EnvisionTech has established a Risk Policy for the Fund. Central to the Risk Policy is the AIF's investment mandate, and in addition the Risk Policy contains other qualitative and quantitative management frameworks (as presented in the disclosed investor material).

Given the entry of force of the SFDR into Norway, the risk management function ensures that the Company considers sustainability risks when complying with the general requirements of the duties it performs under AIFMD Article 57.

It will work with the Company's management to integrate sustainability risks into its activities and investment strategies, and ensure that the necessary procedures and processes are in place to enable the Company to effectively manage the exposure of sustainability risks for each of the funds managed.

The Fund has its own depositary who will check the Fund's cash flows, that payments from investors in connection with subscriptions for shares have been received and that all liquid funds are booked in accounts opened in the Fund's name, amongst others.

Reporting: Ongoing reporting to the responsible functions is a key part of the Risk Management function. The purpose of these reports is to document compliance to the relevant commitments and mandates, to document non-compliance and to establish reporting lines for handling exceptions. The Risk Management function reports as follows (non-exhaustive list):

- To the compliance function of the Manager (monthly)
- To the portfolio manager of the Manager (monthly)
- To investors in the AIF (quarterly through this report)
- To the Board of the AIF (quarterly through this report and otherwise semi-annually)
- To the Board of the Manager (quarterly through this report and otherwise semi-annually)
- To the depositary (quarterly through this report and otherwise semi-annually)
- To the Financial Supervisory Authority (quarterly)

In addition, the Risk Management function is reporting continuously to the management team of the Manager and to the Depositary. The routines contain rules for escalation of the issues that the Risk Management function may uncover, including breach of an AIF's investment mandate and risk policy. The risk policy is reviewed on an annual basis.

Conflicts of Interest: AIF management entails several potential conflicts of interest that require transparency and information according to the AIF framework. The Fund shareholder agreement, adherence agreement, fund management agreement and information memorandum describe such conflicts of interest and the management of these. All entities in the NRP Group have guidelines for managing conflicts of interest in their rules and procedures. All agreements involving the Fund and agreements between entities in the NRP Group are entered into on an arm's length principle.

Given the Company's investment mandate as an Article 9 Fund manager, the Risk Management function does not currently anticipate any conflicts of interest that may arise as a result of the integration of sustainability risks into the risk management processes, systems, and internal controls.

Borrowings and guarantees (AIF § 4-3(2)): In accordance with clause 7.4.1 in the Fund SHA, the Fund shall not borrow monies or in other ways deploy financial gearing. However, the Fund may establish short-term credit lines and other short-term loan facilities or bridging facilities to, among other things, cover ongoing operating cost and make investments between drawdowns, subject to any drawdown or utilisation of such credit lines, short-term loan facilities and bridging facilities being repaid within twelve (12) months after each relevant drawdown and utilisation. As of the end of the reporting period, the Fund has not established such short-term debt facilities.

Valuation / NAV Q3-25:

See section "*Fund Performance*" in this report for financial details.

The Valuation Committee approved the NAV on 12 November 2025, and agreed that the procedures, principles and methodologies of valuation are in accordance with the Valuation Policy, and thus in-line with acceptable accounting practices and market practice; and the pricing information, the calculation and conclusions related to the valuation were sufficiently documented.

The equity value of each investment position is determined on a stand-alone basis by using and combining latest share issue pricing levels and generally accepted valuation methods (incl. DCF, peer review, etc) without applying any discount for lack of liquidity, lack of control, size, the existence of any shareholders agreement or similar circumstances nor any premium for potential synergies from a combination with another business.

Equity values are based on the fully diluted approach, where ordinary shares, preferred shares, convertible debt, options/warrants and other equity instruments are considered on an as-converted basis to determine the NAV or FMV per share. The NAV per share and NAV considers the FX adjusted value of each portfolio investment.

Fund Assets

Cash & Cash Eq. (incl. current assets) is valued in accordance with Norwegian GAAP and as presented through the quarterly financial statements prepared by the Fund's Business Manager (NRP Business Management AS).

The fair market value (FMV) of the Fund's ownership in:

- Alva Industries AS: Set to the Fund's cost price through considering the valuation methodology recent transaction in the company's equity with a qualitative assessment of LTM performance and NTM plans.
- C-Leanship A/S: Set to the Fund's cost price, adjusted for USD/NOK FX impact.
- Umoe Advanced Composites AS: Set based on a valuation framework recommended by a third-party valuation advisor¹⁰.
- FHSD Connect AS (formerly Futurehome AS): Set to the value of the equity and loan commitment (excl. accrued interest).
- Heimdall Power AS: Set to the subscription price (per share) in the most recent transaction that was concluded in June 2024.
- Maritime Robotics AS: Set to the subscription price (per share) in the most recent transaction that was concluded in August 2024.

Fund liabilities:

Short-term liabilities are valued in accordance with Norwegian GAAP and as presented through the quarterly financial statements prepared by the Fund's Business Manager (NRP Business Management AS). The Fund (incl. affiliated entities) does not have any long-term liabilities.

¹⁰ For the avoidance of doubt, the third-party valuation advisor was not solely appointed by UAC, but by UAC and an unaffiliated party. The third-party valuation advisor delivered the valuation report to both parties in December-23.
