

NRP Green Transition I AS

Investor Report 4Q-2024

Date of report: 28 March 2024

Disclaimer

This fund update has been prepared by NRP Zero AS (the "Manager"). The update solely aims to provide guidance and information. Under no circumstances is this update meant to be considered as a tool in financial or investment advising, hereunder recommendations of purchase or sale, with or without compensation, of financial instruments or other forms of financial assets.

The information contained herein has been obtained from sources believed to be reliable and in good faith. Manager can however not guarantee or be held financially or legally responsible for the accuracy, completeness or correctness of the information contained in this fund update. We underline that investing in venture companies in the cleantech space are associated with high risk. All investors must be prepared that such investments might result in monetary losses. Anyone who uses this update as a basis for purchasing shares at a later time must make sure that all relevant and updated information is obtained. The information in this fund update is only valid per date of preparation.

Investors are encouraged to seek advice in any type of financial investments made in private or as a corporation. Investors must comply that any statements or comments on future predictions made in this update might not occur. Hereunder, investors must understand and accept that present gains is not a guarantee for future gains. Any investment described or mentioned in this update is risk sensitive with the possibility of losses occurring.

Confidential and privileged information

Please note that the information in this document, including any information regarding our portfolio companies and their financial status, is strictly confidential. The information may not be copied or circulated to anyone but the addressed recipients without the prior written consent of the Manager. You are also reminded of the duty of confidentiality you have undertaken by signing the Fund Shareholder Agreement.

Executive Summary

Fund Overview

NRP Green Transition I AS is a closed-end late stage venture capital fund dedicated to building a portfolio of Nordic industrial cleantech investment positions primarily through investments in shares and other equity and equity-like instruments (the "**Fund**"). The Fund is managed by EnvisionTech AS (the "**Manager**").

The investment objective of the Fund is to achieve long term capital appreciation through making sustainable investments within the meaning of SFDR Article 2 (17) and build a diversified portfolio with an attractive risk/return profile, targeting a return on invested capital of 4.0x.

Through investing in capital light companies with moderate technical risk, the Fund aims to deliver positive impact and enhance long-term returns through a robust strategy and approach to active ownership.

Fund Economics & Performance

Capital calls & deployment

- In Q4-24, NOK 10.7 million capital called from shareholders to fund, amongst others, the follow-on investments in C-Leanship (5.0m) and Futurehome (3.5m).
- Total paid-in-capital reached NOK 376.1 million, corresponding to 84.2% of total commitments.

Net Asset Value & Multiple on invested capital

- No significant change on a per share basis in Q4-24 vs. Q3-24.
- The NAV, adjusted for foreign exchange, is set to NOK 481.1 per share (vs. NOK 475.1 in Q3-24), equivalent to NOK 361.86 million and corresponding to a 3.8% discount on the average cost price of the shares.
- The gross multiple of invested capital in portfolio companies is set to 1.04x (vs. 1.02x in Q3-24).

Market Comment & Deal Pipeline

Key highlights on cleantech deal flow and relevant transactions in Q4 2024

- Based on the briefing from Cleantech for Nordics, the Nordics reported +€700m of cleantech equity investments in Q4-24, +79% from recorded volumes of cleantech equity in Q3-24, a strong quarterly performance to year end.¹
- Further market comments on 2024 year in review are provided on p.5.

- Notable growth equity transactions this quarter include Polarium, a Swedish energy storage manufacturer (raised \$50m), Hycamite, a Finnish player engaging in methane splitting to produce low carbon hydrogen and carbon black (raised €44m), and Aira, Swedish heat pump manufacturer and installations company (raised €63m).
- Relevant exit this quarter include the acquisition of Sensorfact, a Dutch company delivering energy management solutions for industrial applications to ABB's Smart Power division.²

Regulatory / Policy developments

- The European Hydrogen Bank (launched in 2022) opened the second domestic auction for renewable hydrogen production to, in part, limit sourcing of electrolyser stacks from China and foster the development of a European hydrogen value chain.
- The European Investment Bank announced plans to launch a €500 million counter-guarantee instrument for cleantech, which will focus on providing advance payments and technical performance guarantees for the sale of innovative equipment in the cleantech space. Eligibility limited to companies that have previously received EIB funding.

Deal flow

The below figure exhibits the development of EnvisionTech's deal flow from Q3-2024 to Q4-2024, split on industry, capital phase and country.

Key Events in Q4 2024

Convertible loan issue to Futurehome AS

Following the Fund's issuance of a convertible loan note of NOK 4.7m in June 2024 in connection with a restructuring process to reduce debt and implement necessary organizational changes within Futurehome, the Fund executed a follow-on injection through a convertible loan of NOK 3.5 million to Futurehome AS, equal to the Fund's pro-rata share of the total loan issue (NOK 16.9m). The other participants were the largest existing shareholders and MP Pensjon as new investor.

Convertible loan issue to C-Leanship A/S

Following the Fund's issuance of a convertible loan note of NOK 5.5m in June 2024, the Fund executed a follow-up injection of c. NOK 4.9m (USD 0.4m) into the company to fund operational cash flows. The loan was issued on the same terms as the previous participation with 12 months maturity and 42.9% effective p.a interest rate, divided among participating shareholders (SAAB Ventures, Wallenius Water, and the Fund pro rata).

Key Events after the Reporting Period

Reconstruction of Futurehome AS

As communicated via written notice to the Fund shareholders on March 4th 2025, EnvisionTech is participating with a capital commitment of NOK 3.3m to support Futurehome through its Reconstruction and to assist in attracting new equity. The commitment will be structured in two tranches in the form of i) a NOK 2.0m participation in a super senior loan of NOK 8.0m; and ii) a NOK 1.3m participation of a total NOK 13.0m equity issue, subject to a successful Reconstruction - whereof NOK 8.0m of the Equity Issue proceeds can be used to repay the Super Senior or converted into ordinary shares.

Planned execution of Tranche II commitment into Heimdall Power AS

The Fund committed NOK 40m into Heimdall Power AS in July 2024, the Norwegian company delivering dynamic line rating products and services to power utilities globally, enabling real-time operational insights and analysis to optimize grid capacity.

Following the Fund's execution of the first tranche (NOK 30m), the Fund will proceed with executing on the second tranche of its remaining commitments (NOK 10m) during 1H 25. This will increase the Fund's fully-diluted ownership stake from 7.8% to 8.9% and non-diluted ownership stake from 8.8% to 10.0%.

Fund Manager Developments

The Manager has conducted a rebranding from NRP Zero AS to EnvisionTech AS ('Envision') to reflect our underlying investment vision of building tomorrow's sustainable energy system today.

The rebranding has been successfully completed with warm reception and feedback from our networks. The new identity is conducted in parallel with the Manager's launch of Envision Green Transition II AS and the commencement of the capital raise in 1H-25.

The updated website and vision statement to EnvisionTech can be found here: <https://www.envisiontech.no/>

2024: Year in Review³

European Cleantech: State of Union

- Overall, 2024 saw €8.8 billion invested into the European cleantech equity landscape, down from €11.6 billion in 2023 (-24%) as per figure 1.
- The decline in equity was however offset by more debt rounds for high capex, first-of-a-kind cleantech projects, whereby €23.4 billion of debt-funded cleantech investment was recorded in 2024 (+196% compared to 2023). Not shown in figure 1. These companies such as Northvolt, Stegra, Morrow Batteries have received international attention.
- The majority of transactions recorded by deal count remains with companies at 'Seed' and 'Series A' stages. However, recorded Series B rounds grew in 2024, indicating need for further growth equity to scale the 'winners' to expand production and market share, or optimize operations.
- Within the Series B/growth equity rounds, the most well-funded sectors centered on electrification (EV charging technologies, energy storage) to transition acceleration technologies (hydrogen, solar, sustainable fuels) and technologies decarbonizing the built environment.

Nordics Cleantech: State of Union

- The Nordics saw € 2.5 billion in cleantech equity invested in 2024, down from € 3.8 billion in 2023 (-34%).
- The most well-funded industry segments have an energy focus, respectively across the energy generation, energy efficiency, storage and manufacturing/industrial related applications.

EnvisionTech's key takeaways

- Despite global macroeconomic pressures and geopolitical instability, Envision sees continued strong development in innovation and competency clusters around industrial energy efficiency tech in the Nordic region and wider Europe based on both the quality and quantity of our deal flow.
- The underinvestment into growth scaleups to bring winners from the Nordics and Europe to global scalability remain a critical challenge that national governments and private markets seek to address. Envision capitalizes on these opportunities and will seek to utilize our active ownership and value creation playbook to back the frontrunners who are shaping tomorrow's energy system.

(1) NOK 20.0 million by Founder and NOK 356.1 million by Fund investors.

Fund Net Asset Value (NAV)¹

NAV vs Drawdowns (NOKm)

NAV per share (NOK/Share)

(1) Net Asset Value (NAV) = Fund Assets – Fund Liabilities. The Valuation Committee approved the NAV on 17. March 2025, and agrees that the procedures, principles and methodologies of valuation is in accordance with the Valuation Policy, and thus in-line with acceptable accounting practices and market practice; and the pricing information, the calculation and conclusions related to the valuation were sufficiently documented. Fund Assets = FMV of Investments + Cash & Cash Equivalents. Fund Liabilities = Short-Term Liabilities + Long-Term Liabilities. See section "Periodic reporting obligations" for further details.

Fund Return Multiples

	Q3-2024 (reference)		Q4-2024	
	NOK-denominated	Local Currency	NOK-denominated	Local Currency
DPI (Distribution to Paid-in Capital)	0.00x	0.00x	0.00x	0.00x
RVPI (Residual Value ¹ to Paid-in Capital)	0.95x	0.95x	0.96x	0.94x
TVPI ² (Total Value to Paid-in Capital)	0.95x	0.95x	0.96x	0.94x

(1) Residual value or NAV (= Fund assets - Fund liabilities) is the fair market value of the Fund's investment positions plus other fund assets (e.g. cash) less fund liabilities (e.g. account payables).

(2) TVPI = DPI + RVPI

Gross multiple on invested capital in PortCos

(1) Considers the FX-adjusted value of each portfolio investment, i.e. "NOK-denominated"

(1) Ownership includes all equity instruments held by the Fund, i.e. ordinary shares, preference shares and convertible debt instruments (excl. however compensation warrants held to protect against breach of representation & warranties). (2) The fund committed to a NOK 40 million investment in Heimdall Power, whereby the first closing (NOK 30 million) was completed as of 30 June 2024. The remaining (NOK 10 million) will be executed during 1H 2025.

Portfolio Companies

Alva Industries ("Alva")

Alva was founded with a vision of electrifying the world through a unique production technology for electric motors. Alva designs and manufactures high-performance electric frameless motors for industrial & defense applications, using its patented stator production technology (FiberPrinting™).

The unique production technology revolutionizes the way electric motors can be designed & produced, introducing a new benchmark for custom motor development & time-to-market in small & high lot sizes alike. As an added benefit, the FiberPrinting™ production process also allows Alva to pack more power into ironless motors than any current alternatives, enabling the company to offer its clients electric drive systems with competitive technical performance & energy efficiency characteristics, without compromising longevity or reliability.

The Fund has in total invested NOK 60.3m since the initial investment of NOK 10 million⁴ that was concluded in April-2022.

Quarter in brief

- Recruitment of new CEO Oliver Skisland, with Jørgen Selnes, founder and former CEO transitioning to a Chief Business Development role.
- 26x customers (up from 17x in Q3-24) are part of Alva's qualification program having bought customer evaluation units (CEU). 2x customers have proceeded to pre-series stage (separate orders of 60 units and 25 units). 2026 FY weighted funnel is at EUR 2.7 million.

Customer Evaluation Units Sold (Accum.)

- Commercial team expanded from 1x (Chief Commercial Officer) to 6x, all 5 employees starting during 1H-25.

Key milestones to be achieved in the next quarter(s)

- Increase total number of clients in qualification funnel and advance existing leads.
- Delivery of products to customers in accordance with PO and specs.
- Scaling sales & operational resources to facilitate stronger positioning.

⁴ In accordance with the Fund Shareholder Agreement, Alva was transferred to the Fund at cost price plus 8% p.a. interest from the date it was acquired until it was transferred.

- Onboarding of Oliver Skisland.

SDGs alignment: 9 and 12

C-Leanship ("CLS")

CLS is a leading provider of underwater vessel inspection and cleaning services using state of the art remotely operating vehicles ("ROV's"). The company is headquartered in Køge, Denmark, with two operating hubs in Singapore and Busan. The game plan is focused on geographical expansion through rolling out existing product offering, expanding the product offering and entering into new customer segments.

The Fund has in total invested NOK 73.3m (USD 7.03m) in CLS since the initial investment of NOK 50.75m (USD 5m)⁵ was concluded in July 2022.

Quarter in brief

- During Q4-24, CLS conducted 70 hull cleanings, equivalent to a 6% increase compared to Q3-24 and an all-time-high record.

Invoiced hull cleanings per quarter

- New CEO Sanjay Vasudevan signed and starting 1st Feb 2025.
- Antwerp site shut down and ship shiner unit moved to Singapore to be operational Feb. 2025
- Workboat for new ship shiner unit in SGP secured
- The underlying market for ROV hull cleaning remains strong as a key enabler for shipping decarbonization. The implementation of the EU ETS scheme will further accelerate the demand for decarbonization solutions in shipping. Operational efficiency and scale will increase share of ROV hull cleaning market as % of the total hull cleaning market with ROV hull cleaning is gaining competitiveness against diver alternatives.

Key milestone to be achieved in the next quarter(s)

- Reach EBITDA break-even
- Broaden customer base within container liners, opportunistic approach to bulk/tank

- Improve technical and operational excellence to reduce # of partial cleanings
- Launch online customer portal.
- Initiate 2025-2026 strategy plan.
- Initiate partnership agreements with major port services suppliers.

Technology and differentiation

- Based on ROV technology from SAAB, CLS has developed a 2nd generation ROV hull cleaner with a closed loop filtration system
- Superior in terms of speed, reliability and accuracy, the ability to clean during port operation/bunkering and meet future environmental requirements, makes CLS's solution a game changer in biofouling management

ESG drivers and impact

CLS's state of the art ROVs reduce air and water pollution in the shipping sector. Effective cleaning of the hull also reduces a vessel's fuel consumption by ~5%

SDGs alignment: 13 and 14

⁵ In accordance with the Fund Shareholder Agreement, CLS was transferred to the Fund at cost price plus 8% p.a. interest from the date it was acquired until it was transferred.

Umoe Advanced Composites (“UAC”)

UAC develops and manufactures advanced type IV glass fibre pressure vessels, offering lightweight and cost-efficient solutions for containment, storage and distribution of large volumes industrial gases such as hydrogen and methane (CBG/CNG).

Glass fibre is significantly less costly than for example carbon fibre. Moreover, due to its weight advantage, glass fibre can transport 2-3 times more hydrogen compared to similar-sized tanks in steel, representing major cost and environmental benefits. The game plan is catered around production scale-up in Norway, geographical expansion through the Chinese JV facility, technological innovation and considering vertical/horizontal growth avenues.

The Fund has in total invested NOK 77.5m since the initial investment was concluded in January 2023.

Quarter in brief

- Secured EN-12245-2022 certification for UAC's cylinders.
- In Q4-24, UAC Norway produced 598 cylinders (250-bar equivalent), a 31% increase in cylinders wound from last quarter (Q3-24).

Key milestone to be achieved in the next quarter(s)

- Secure KIWA certification for E8 cylinders.
- Secure export certification for the Chinese J/V plant's cylinder production.
- Continue expansion of global market position in target geographies, diversification of compressed gas applications and entry into the maritime segment.
- Continue product development to reach higher pressure and lower weight cylinders.
- Continue Deep Purple™ development for subsea storage of H₂ together with project consortium.

- Continue organisational build-up in the J/V factory in China for operational and sales excellence.

Key customers

Technology and differentiation

- UAC has since inception in 2006 developed and refined glass fibre weaving to develop cylinders that can hold compressed gases at >425 bar at half the price of competing (carbon fibre) solutions.

ESG drivers and impact

By developing cost effective standardized containers for the transportation of hydrogen, UAC accelerates the adoption to clean hydrogen and enables the energy transition.

SDGs alignment: 7 and 11

Futurehome ("FH")

Futurehome is a hardware enabled SAAS company offering smart energy management systems that help consumers centralise, automate, and monitor household appliances' power consumption, offering greater flexibility and visibility in energy consumption and costs.

The company's core product is a smart hub ("Smarthub II") that allows users to connect and control a wide range of energy consuming devices in their homes, including thermostats, water boiler relays, rotary dimmers, smart plugs, Home Area Network devices ("HAN"), mode switches, EV chargers, smoke detectors, motion cameras and locks. The hub can connect to both Futurehome products and third-party devices. The game plan is to introduce a subscription based revenue model, expand into Nordic and European markets, and positioning for the flexibility market.

The Fund has in total invested NOK 65.7m since the initial investment of NOK 50.0m was concluded in May 2023.

Quarter in brief

- Completed Phase I of restructuring of the company, inter alia management and organisational changes, additional costs cuts and strengthening of the balance sheet.
- Changes to the C-level management with recruitment of new CFO.
- Implement OKRs throughout the organization
- Revision of sales initiatives to partners and installers, including establishment of direct sales capabilities.

Key milestone to be achieved in the next quarter(s)

- Implementation of revised strategy, hereunder partnership volume distribution and implementation of recurring revenue model
- Conclude on additional changes to the organisation
- Revise strategy for entering international markets
- Conclude on sale of non-core assets
- Reach positive EBITDA
- Successfully exist reconstruction period

Company information

About Futurehome

(1) EV Charger market in Europe, # of units sold. Source: EY

Product portfolio

Key customers

Technology and differentiation

- Futurehome's energy management solution is centered around a smart centralized hub that offers household energy management solutions in a safe and secure way
- Unique ability to sell flexibility to local and national grid owners (with incentives to household)

ESG drivers and impact

By offering substantial energy savings to households through lower energy consumption, Futurehome will enable the transition to sustainable cities and urban communities through building smarter homes.

SDGs alignment: 7, 9 and 11

Heimdall Power (“HP”)

Heimdall Power offers dynamic line rating (“DLR”) and ambient adjusted rating services to utilities across the globe. The company has a global customer base across Europe, North America and Asia.

To enable real-time operational insights for grid operators, HP combines hardware and software by delivering sphere-shared sensors powered by advanced software that collect data and enable increased grid capacity and improved grid operations and planning. The company has also developed a proprietary drone installation technique on high voltage lines, enabling a seamless experience for its customers even in challenging terrains.

In June 2024, the Fund concluded a NOK 40m investment in Heimdall Power (conducted across two tranches NOK 30m + 10m)⁶, corresponding to a fully-diluted ownership stake of ca. 9% in the company.

Quarter in brief

- During this quarter, 70 neurons installed on customers’ lines (down from 74 in Q3-24), 3% of the installations via drone tool.
- Growing base of total number of neurons installed, with 662 physical neurons in operations to date (13% growth from Q2-24).
- Won contract with N-ERGIE (German DSO), Kystnett (Norwegian DSO), Portland General Electric (US DSO) and AST (Latvian DSO).
- Successful de-installation of neuron via drone tool at customer’s site.

Key milestone to be achieved in the next quarter(s)

- Adding satellite connectivity to v4 neuron.
- Adapting DLR solution for the US market, including conductor size, temperature capabilities, and on-premise software).
- Respond to and win major RFPs for DLR contracts in the European and North American markets to be awarded in 2025.

Unaudited EBITDA (2024)	NOK (34.6) million

About Heimdall Power

Product portfolio

Key customers

Technology and differentiation

- Heimdall uses a combination of hardware sensors and software monitoring by deploying physical and virtual neurons onto customer’s grids.
- Accurate sensors that detect temperature, icing, sagging, and faults on the line.
- Autonomous drone installations of sensors (neurons) without need to turn off the power grid.

ESG drivers and impact

• Accelerates the energy transition by improving capacity of and optimizing the utilization of power grids. • Enabling safer and more efficient operations with HSE benefits	SDGs alignment: 9, 11 and 12
---	--

⁶ The Fund committed to a NOK 40 million investment, whereby the first tranche (NOK 30 million) was completed as of 30 June 2024. The remaining (NOK 10 million) will be executed in 1H 2025.

Maritime Robotics (“MR”)

Maritime Robotics is a global provider of turnkey sea drones and autonomous navigation systems to third party vessels, serving customers across maritime applications in the civil hydrography, defense & security, offshore energy, fishery and transportation & logistics segments.

By leveraging an innovative product portfolio and technology that enables remote onshore control and monitoring of unmanned sea drones, Maritime Robotics disrupts the future of maritime operations by enhancing operational, energy and cost efficiencies for customers in the form of HSE advantages for its workforce, cost-savings from increased operational efficiency, reduced fuel consumption and lower emissions, as well as enhanced operational capabilities.

In August 2024, the Fund concluded a NOK 35m investment in Maritime Robotics.

Quarter in brief

- Ended Q4-24 strong, achieving FY 2024 sales of ca. NOK 150m and de-risked 2025 growth plan through having built up meaningful order book.
- Re-organization of C-level and commercial team, incl. recruitment of Geir Solem as Chief Sales Officer.
- Won Dagens Næringsliv's (Norway's Financial Times) special gazelle for the most innovative fast-growing company in Norway.⁷
- Several successful product sales, deliveries and project announcements was picked up by the media, e.g. DeepOcean, Jan De Nul, DEME, Smaug Project.⁸

Key milestone to be achieved in the next quarter(s)

- Execution on secured order book, e.g. delivery of turn-key sea drones and autonomous navigation system projects to third-party vessels.
- Continued outsourcing of non-core manufacturing.

Fund Overview

General Information

Fund name	NRP Green Transition I AS
Fund manager	EnvisionTech AS
Founder	NRP GT I AS
First close date	14 July 2022
Final close date	01 July 2024
First investment date	26 August 2022
Investment Period	Four (4) years from the original final closing date (14 July 2023)
Ordinary fund term	Ten (10) years from the original final closing date (14 July 2023)
Committed capital	NOK 446.6 million incl. founder commitment (as of final close)
Shareholder structure	One Founder and 41 Fund investors (as of final close)
Fund leverage	Not permitted
Fund currency	NOK
Financial year-end	31 December
Legal incorporation	Norwegian limited liability company ("Aksjeselskap")
Accounting principles	Norwegian GAAP
Valuation principles	In accordance with IPEV Valuation Guidelines and Norwegian GAAP guidelines, and otherwise as stipulated in the Fund Shareholder Agreement (see Appendix 4 – Valuation Policy)
ESG principles	In accordance with Article 9 under the Sustainable Finance Disclosure Regulation ("SFDR")
Fund Board	Jonas Myklebost (Chairperson), Emil Sebastian Harberg, Lars Gjørvad

Investment Mandate

Nature of investments	Long-term capital appreciation through equity and equity-related investments in small to medium sized industrial cleantech companies
Stage	Venture
Sector / Themes	Energy transition and resource efficiency
Geography	Nordic

Key Economic Terms of the Manager and Founder

Management fees	1.75%
Equity profit split	20%, subject to a return of 100% of paid-in capital plus an 8% hurdle. 50% catch-up.
Founder commitment	NOK 20 million (2% of total target commitments of NOK 1,000 million)

Service Providers

Auditor	Deloitte AS
Business Management	NRP Business Management AS
Depository	View Procurator AS
Legal counsel	Wikborg Rein Advokatfirma AS and Advokatfirmaet Selmer AS

Committees

Investment Committee	Adele Christensen Os (Head), Andrew Robbins, Carl Hall, Oscar Spieler
Compliance Committee	Hilde Høksnes (Head), Andreas Marø, Charmaine Lee
Valuation Committee	Jonas Myklebost (Head), Emil Sebastian Harberg, Andreas Marø

Investment Strategy

The Fund seeks to build a diverse portfolio of industrial cleantech companies in the Nordics that delivers a positive impact on environmental, social and governance matters and provides the Fund investors with long-term capital appreciation with best-in-class risk-adjusted returns. To achieve this, the Fund is looking for businesses with the following common features:

- Entrepreneurial management team with execution capabilities and track-record;
- Business model that contributes to resource efficiency and/or accelerates the energy transition;
- Proven technology, product or service on the brink of commercialization or having reached the commercialization phase with moderate technical risk;
- Asset-light business model with a clear competitive advantage that enables a scalable growth potential;
- Ownership plan that can be successfully effectuated with limited reliance on government or public institutions (i.e. in relation to subsidies, framework amendments, licenses/permits);
- More than one revenue stream, hereunder the potential of selling multiple products, services or technologies to multiple markets; and
- Businesses that can be positioned for divestment to industrial buyers.

An important part of the Manager's investment philosophy is the "1x/4x" principle: in every investment the Manager makes, we strive to protect the invested capital (1x) and at the same time achieve 4x on invested capital. Through privately negotiated transactions, the Manager seeks to ensure the execution of rigorous and detail-oriented due diligence processes, agreement with existing shareholders and management on an ownership plan, and regulation of material terms and conditions in the shareholders' agreement and subscription/investment agreement that provides the Fund with stronger control and economic rights relative to the shareholding in the company. Throughout the ownership period, the Manager aims to actively accelerate the growth potential of the business through board representation (directly or indirectly), participation in shareholder meetings and strategy meetings, and informal interaction with the management.

Sustainable Finance Disclosure Regulation (SFDR)

As the law "Offentliggjøringsforordningen", the SFDR in Norwegian and the taxonomy ("taksonomien") entered into force in Norway on 1 January 2023, the Board of EnvisionTech AS in the Board meeting on 22 March 2023 officially approved of the Manager's operation of NRP Green Transition I as an "Article 9" fund, pursuant to (EU) 2019/2088 (SFDR) Article 9.

The Board thereby confirms the Fund's commitment to making sustainable investments as its objective pursuant cf. SFDR Article 2 (17), designating that the investments of the Fund, as set forth in the SFDR, shall follow good governance practices, contribute to an environmental objective, and/or social objective, and not significantly harm other environmental objective or social objectives.

Based on the above, the Board approved relevant amendments made to the Fund's SFDR disclosure documents and marketing materials, so that they are in coherence with the regulatory changes as of 1 January 2023.

This information is not, and does not purport to be, complete. Please refer to the Fund's Shareholder Agreement.

Periodic Reporting Obligations

Annual Audited Accounts: The 2024 annual audited accounts of NRP Green Transition I AS (Fund) and VIOS 224 AS (100% owned by the Fund) will be delivered to the shareholders in the Fund by 30. April 2025.

Tax Share Value: The taxable value per share will be disclosed to the shareholders in the Fund during May 2025.

Annual ESG report: In accordance with regulatory requirements, the report will be delivered to the Fund investors by 30 June 2025.

Drawdown #9: Please note that Drawdown #9 – that was sent out to the shareholders on 26th November 2024 – was registered in Brønnøysund during January 2025. Thus, the shares subscribed for will be considered in the 2025 shareholder register, due by 31st January 2026.

Assets subject to special arrangements due to illiquidity (AIF § 4-3(1.a)): None of the Fund's assets are subject to special arrangements arising from their illiquid nature.

Liquidity Management (AIF § 4-3(1.b)): The Fund is an unleveraged closed-ended AIF and thus this disclosure is not applicable.

Risk Management (AIF § 4-3(1.c)):

Risk profile: An investment in the Fund carries a high degree of risk. For more information on risk factors, please see section 5.3, 8 and 10.2.3 in the information memorandum of the Fund.

The assessment of risk will be an integral part of the due diligence process carried out in conjunction with each investment in the portfolio. The Manager has the overall responsibility for risk management following duties pursuant to the AIFM Act and as further described in the Fund Shareholder Agreement, the Fund Management Agreement and the Information Memorandum. The Manager seeks to identify and mitigate risk factors to reduce risk, increase value, and lower transaction costs. Further, the Manager has integrated sustainability risks into the investment decision-making process as further described in section 10.2.3 of the IM.

Risk Management Systems: In the Alternative Investment Funds Act (AIFM Act) § 3-7 it is stated that the AIF manager shall have a risk management function that is functionally and hierarchically separated from the manager's operational activities, including portfolio management. In EnvisionTech this is, among other things, carried out by having separate leaders for the Portfolio Management and the Risk Management functions. The Risk Management function shall not perform any tasks that may be in conflict with the operational activities. The Board of EnvisionTech has also adopted instructions and a routine collection in accordance with AIF act of 20 June 2014 no. 28, regulations to the AIFM act of 26 June 2014 no. 877, EU directive 2011/61/EU on AIFMD and AIFMD's associated regulation 231/2013.

The Risk management function's main task is to identify, manage and monitor all relevant and potential risks associated with the portfolio management of the funds that the Company manages. Central to this work is to facilitate, follow up and control the manager's due diligence process in the implementation of new investments. With due diligence means review, evaluation and control of the investment object's legal, technical, financial and other essential elements before the investment decision.

The Risk Management function's aim is also to support the management team in the identification and reduction of risk.

The Board of EnvisionTech has established a Risk Policy for the Fund. Central to the Risk Policy is the AIF's investment mandate, and in addition the Risk Policy contains other qualitative and quantitative management frameworks (as presented in the disclosed investor material).

Given the entry of force of the SFDR into Norway, the risk management function ensures that the Company considers sustainability risks when complying with the general requirements of the duties it performs under AIFMD Article 57.

It will work with the Company's management to integrate sustainability risks into its activities and investment strategies, and ensure that the necessary procedures and processes are in place to enable the Company to effectively manage the exposure of sustainability risks for each of the funds managed.

The Fund has its own depositary who will check the Fund's cash flows, that payments from investors in connection with subscriptions for shares have been received and that all liquid funds are booked in accounts opened in the Fund's name, amongst others.

Reporting: Ongoing reporting to the responsible functions is a key part of the Risk Management function. The purpose of these reports is to document compliance to the relevant commitments and mandates, to document non-compliance and to establish reporting lines for handling exceptions. The Risk Management function reports as follows (non-exhaustive list):

- To the compliance function of the Manager (monthly)
- To the portfolio manager of the Manager (monthly)
- To investors in the AIF (quarterly through this report)
- To the Board of the AIF (quarterly through this report and otherwise semi-annually)
- To the Board of the Manager (quarterly through this report and otherwise semi-annually)
- To the depositary (quarterly through this report and otherwise semi-annually)
- To the Financial Supervisory Authority (quarterly)

In addition, the Risk Management function is reporting continuously to the management team of the Manager and to the Depositary. The routines contain rules for escalation of the issues that the Risk Management

function may uncover, including breach of an AIF's investment mandate and risk policy. The risk policy is reviewed on an annual basis.

Conflicts of Interest: AIF management entails several potential conflicts of interest that require transparency and information according to the AIF framework. The Fund shareholder agreement, adherence agreement, fund management agreement and information memorandum describe such conflicts of interest and the management of these. All entities in the NRP Group have guidelines for managing conflicts of interest in their rules and procedures. All agreements involving the Fund and agreements between entities in the NRP Group are entered into on an arm's length principle.

Given the Company's investment mandate as an Article 9 Fund manager, the Risk Management function does not currently anticipate any conflicts of interest that may arise as a result of the integration of sustainability risks into the risk management processes, systems, and internal controls.

Borrowings and guarantees (AIF § 4-3(2)): In accordance with clause 7.4.1 in the Fund SHA, the Fund shall not borrow monies or in other ways deploy financial gearing. However, the Fund may establish short-term credit lines and other short-term loan facilities or bridging facilities to, among other things, cover ongoing operating cost and make investments between drawdowns, subject to any drawdown or utilisation of such credit lines, short-term loan facilities and bridging facilities being repaid within twelve (12) months after each relevant drawdown and utilisation. As of the end of the reporting period, the Fund has not established such short-term debt facilities.

Valuation / NAV Q4-24:

See section "*Fund Performance*" in this report for financial details.

The Valuation Committee approved the NAV on 17. March 2025, and agreed that the procedures, principles and methodologies of valuation are in accordance with the Valuation Policy, and thus in-line with acceptable accounting practices and market practice; and the pricing information, the calculation and conclusions related to the valuation were sufficiently documented.

The equity value of each investment position is determined on a stand-alone basis by using and combining latest share issue pricing levels and generally accepted valuation methods (incl. DCF, peer review, etc) without applying any discount for lack of liquidity, lack of control, size, the existence of any shareholders agreement or similar circumstances nor any premium for

potential synergies from a combination with another business.

Equity values are based on the fully diluted approach, where ordinary shares, preferred shares, convertible debt, options/warrants and other equity instruments are considered on an as-converted basis to determine the NAV or FMV per share. The NAV per share and NAV considers the FX adjusted value of each portfolio investment.

Fund Assets

Cash & Cash Eq. (incl. current assets) is valued in accordance with Norwegian GAAP and as presented through the quarterly financial statements prepared by the Fund's Business Manager (NRP Business Management AS).

The fair market value (FMV) of the Fund's ownership in:

- Alva Industries AS: Set to the Fund's cost price through considering the valuation methodology recent transaction in the company's equity with a qualitative assessment of 2024 performance and 2025 plans.
- C-Leanship A/S: Set to the Fund's cost price, adjusted for USD/NOK FX impact, through considering recent transaction in the company's equity and DCF analysis.
- Umoe Advanced Composites AS: FMV is set based on a valuation framework recommended by a third-party valuation advisor⁹.
- Futurehome AS: Set to the subscription / conversion share price in the most recent transaction that was concluded in February 2025. Please note that Futurehome is undergoing a judicial restructuring (cf. information disclosed in the executive summary), and the Fund's investment position may be written down to zero.
- Heimdall Power AS: Set to the subscription price (per share) in the most recent transaction that was concluded in June 2024.
- Maritime Robotics AS: Set to the subscription price (per share) in the most recent transaction that was concluded in August 2024.

Fund liabilities:

Short-term liabilities are valued in accordance with Norwegian GAAP and as presented through the quarterly financial statements prepared by the Fund's Business Manager (NRP Business Management AS). The Fund (incl. affiliated entities) does not have any long-term liabilities.

⁹ For the avoidance of doubt, the third-party valuation advisor was not solely appointed by UAC, but by UAC and an unaffiliated party. The third-party

valuation advisor delivered the valuation report to both parties in December-23.
