

NRP Green Transition I AS

Investor Report 4Q-2025

Date of report: 31 March 2026

Disclaimer

This fund update has been prepared by EnvisionTech AS (the “Manager”). The update solely aims to provide guidance and information. Under no circumstances is this update meant to be considered as a tool in financial or investment advising, hereunder recommendations of purchase or sale, with or without compensation, of financial instruments or other forms of financial assets.

The information contained herein has been obtained from sources believed to be reliable and in good faith. Manager can however not guarantee or be held financially or legally responsible for the accuracy, completeness or correctness of the information contained in this fund update. We underline that investing in venture companies in the cleantech space are associated with high risk. All investors must be prepared that such investments might result in monetary losses. Anyone who uses this update as a basis for purchasing shares at a later time must make sure that all relevant and updated information is obtained. The information in this fund update is only valid per date of preparation.

Investors are encouraged to seek advice in any type of financial investments made in private or as a corporation. Investors must comply that any statements or comments on future predictions made in this update might not occur. Hereunder, investors must understand and accept that present gains is not a guarantee for future gains. Any investment described or mentioned in this update is risk sensitive with the possibility of losses occurring.

Confidential and privileged information

Please note that the information in this document, including any information regarding our portfolio companies and their financial status, is strictly confidential. The information may not be copied or circulated to anyone but the addressed recipients without the prior written consent of the Manager. You are also reminded of the duty of confidentiality you have undertaken by signing the Fund Shareholder Agreement.

Executive Summary

Fund Overview

NRP Green Transition I AS is a closed-end late stage venture capital fund dedicated to building a portfolio of Nordic industrial cleantech investment positions primarily through investments in shares and other equity and equity-like instruments (the "**Fund**"). The Fund is managed by EnvisionTech AS (the "**Manager**").

The investment objective of the Fund is to achieve long term capital appreciation through making sustainable investments within the meaning of SFDR Article 2 (17) and build a diversified portfolio with an attractive risk/return profile, targeting a return on invested capital of 4.0x.

Through investing in capital light companies with moderate technical risk, the Fund aims to deliver positive impact and enhance long-term returns through a robust strategy and approach to active ownership.

Fund Economics & Performance

Capital calls & deployment

- In Q4-25, no capital calls or capital deployments were made.
- Total paid-in-capital stands at NOK 392.8 million, corresponding to 87.9% of total commitments.

Net Asset Value & Multiple on invested capital

- The NAV, adjusted for foreign exchange rates, is set to NOK 485.7 per share (vs. NOK 440.2 in Q3-25), equivalent to NOK 381.6 million and corresponding to a 2.9% discount on the average cost price of the shares.
- The gross multiple of invested capital in portfolio companies is set to 1.07x (vs. 0.97x in Q3-25).

Market Comment & Deal Pipeline

Key highlights on relevant deal flow and transactions in Q4 2025 and YTD:

- Based on the briefing from Cleantech for Europe, European cleantech venture and growth capital investments in 2025 were recorded at €8.2bn (down from €8.7bn in 2024).¹
- Total deal volume fell sharply to 450 deals (down from 675 in 2024), with Series B investment weakening - deal volume dropping from 74 to 43 deals and total Series B investment falling to €1.8bn (from €2.9bn in 2024), tightening funding at the critical scale-up stage.
- European defence tech VC funding continues to rise with global geopolitical volatility, with

c.\$1.5bn invested in 2025 across sizeable transactions, with more energy/cleantech companies expanding into dual-use strategies.

- Notable capital rounds this quarter include VATN Systems, US developer of autonomous underwater vehicles (AUVs) (raised \$60m Series A), Bound4Blue, Spanish wind-assisted propulsion company (raised €44m Series B), and Hullbot, Australian underwater hull-cleaning robotics company (raised A\$16m Series A).
- Notable exits this quarter is the acquisition of FERNRIDE, a German autonomous ground vehicle company, by Quantum Systems, AI-powered unmanned systems provider, expanding from aerial to multi-domain autonomous systems.

Regulatory / Policy developments

- The European Commission announced the Scaleup Europe Fund in October 2025, a €5bn market-driven vehicle backed by the EC, EIB and institutional investors to bridge the late-stage equity gap across the deep tech and cleantech space and foster European competitiveness.

Deal flow

The below table exhibits the development of EnvisionTech's deal flow from Q3-2025 to Q4-2025, split on industry, capital phase and country.

Key Events in Q4 2025

Samsung invests in Alva Industries

Samsung Electro-Mechanics, via Samsung Ventures (the strategic investment arm of Samsung Electronics), has made a €3m convertible investment in Alva Industries.

The investment provides Samsung with no exclusivity or control and ensures that Alva remains an independent supplier of frameless motors. Samsung's investment acts as a validation of Alva as a leading global electric motor technology company, whilst enabling accelerated scaling in, inter alia the global robotics and humanoids industry. With this backing, Alva is now working on several avenues to secure additional equity capital in a priced round to support its strong momentum.

FHSD (formerly Futurehome) merges into Sikom Connect AS

FHSD (formerly Futurehome) merged into Sikom Connect AS, a Norwegian energy management player with a strong position in the cabin market in December 2025.

The company has transitioned to a software-first business model with a subscription model and is scaling its customer base rapidly.

Ongoing portfolio value enhancing initiatives

The EnvisionTech team is finalizing one other separate value enhancing initiative in the portfolio that will strengthen the growth journey of the company and substantiate the values of Fund I portfolio going forward.

We aim to be able to share news on this initiative in the upcoming quarterly report for Q1-25.

Key Events after the Reporting Period

No key events to note.

Fund Manager Developments

The Manager conducted a rebranding from NRP Zero AS to EnvisionTech AS ('Envision') in Q1-25 to reflect our underlying investment vision of building tomorrow's sustainable energy system today.

The updated website and vision statement to EnvisionTech can be found here: <https://www.envisiontech.no/>

Launch of Envision SPV I AS

EnvisionTech launched Envision SPV I AS ('SPV') to invest in the three Fund I portfolio companies; Alva Industries AS; Maritime Robotics AS; and Heimdall Power AS.

On the back of solid commercial traction in these three companies, EnvisionTech's Fund I has limited available capital to deploy follow-on capital to increase exposure. To capitalize on the over-allocation available to EnvisionTech as lead investor, the Manager is structuring this opportunity through an SPV with the purpose of investing in the available over-allocation in upcoming funding rounds of these three companies, The SPV will be offered to existing and a selected group of new investors.

The target fund size is NOK 100m.

Fund Performance

Fund Cash Flows

(1) NOK 20.0 million by Founder and NOK 372.8 million by Fund investors.

Fund Net Asset Value (NAV)¹

NAV per share (NOK/Share)

(1) Net Asset Value (NAV) = Fund Assets – Fund Liabilities. The Valuation Committee approved the NAV on 23 February 2026, and agrees that the procedures, principles and methodologies of valuation is in accordance with the Valuation Policy, and thus in-line with acceptable accounting practices and market practice; and the pricing information, the calculation and conclusions related to the valuation were sufficiently documented. Fund Assets = FMV of Investments + Cash & Cash Equivalents. Fund Liabilities = Short-Term Liabilities + Long-Term Liabilities. See section "Periodic reporting obligations" for further details.

Fund Return Multiples

	Q3-2025 (reference)		Q4-2025	
	NOK-denominated	Local Currency	NOK-denominated	Local Currency
DPI (Distribution to Paid-in Capital)	0.00x	0.00x	0.00x	0.00x
RVPI (Residual Value ¹ to Paid-in Capital)	0.89x	0.89x	0.97x	0.97x
TVPI² (Total Value to Paid-in Capital)	0.89x	0.89x	0.97x	0.97x

(1) Residual value or NAV (= Fund assets - Fund liabilities) is the fair market value of the Fund's investment positions plus other fund assets (e.g. cash) less fund liabilities (e.g. account payables).

(2) TVPI = DPI + RVPI

Gross multiple on invested capital in PortCos

(1) Considers the FX-adjusted value of each portfolio investment, i.e. "NOK-denominated"

(1) Ownership includes all equity instruments held by the Fund, i.e. ordinary shares, preference shares and convertible debt instruments (excl. however compensation warrants held to protect against breach of representation & warranties).

Portfolio Companies

Alva Industries ("Alva")

Alva was founded with a vision of electrifying the world through a unique production technology for electric motors. Alva designs and manufactures high-performance electric frameless motors for industrial & defense applications, using its patented stator production technology (FiberPrinting™).

The unique production technology revolutionizes the way electric motors can be designed & produced, introducing a new benchmark for custom motor development & time-to-market in small & high lot sizes alike. As an added benefit, the FiberPrinting™ production process also allows Alva to pack more power into ironless motors than any current alternatives, enabling the company to offer its clients electric drive systems with competitive technical performance & energy efficiency characteristics, without compromising longevity or reliability.

The Fund has in total invested NOK 60.3m since the initial investment of NOK 10 million² that was concluded in April-2022.

Quarter in brief

- Alva received a €3m convertible investment from Samsung to accelerate its growth in the industrial robotics and humanoids industry, a strong validation of its core technology.
- New Chief Operating Officer (CCO) in place.
- 124x customers are part of Alva's qualification program having bought customer evaluation units (up from 89x in Q3-25). 22x customers have proceeded to pre-series stage (up from 16x in Q3-25). 4x customers have proceeded to first commercial production order stage (up from 3x in Q3-25).

Key milestones to be achieved in the next quarter(s)

- Increase total number of clients in qualification funnel and advance existing leads.
- Delivery of products to customers in accordance with PO and specs.

- Scale production capacity to meet growth targets.
- Secure further expansion capital

ESG drivers and impact

Alva's iron-less frameless motors helps industrial customers improve its energy efficiency and energy & material use

SDGs alignment: 9 and 12

² In accordance with the Fund Shareholder Agreement, Alva was transferred to the Fund at cost price plus 8% p.a. interest from the date it was acquired until it was transferred.

C-Leanship (“CLS”)

CLS is a leading provider of underwater vessel inspection and cleaning services using state of the art remotely operating vehicles (“ROV’s”). The company is headquartered in Køge, Denmark, with two operating hubs in Singapore and Busan. The game plan is focused on expansion by scaling existing services, diversifying the revenue base and targeting new customer segments.

The Fund has in total invested NOK 73.3m (USD 7.09m) in CLS since the initial investment of NOK 50.75m (USD 5m)³ was concluded in July 2022.

Quarter in brief

- In Q4 2025, CLS completed 73 hull cleanings, a 43% growth from Q3 2025.
- The quarter was defined by strong operational excellence and commercial breakthroughs.
- Operational excellence: The overhauled unit was fully operational during the quarter. The company has implemented significant measures to improve technical and operational performance across all hubs resulting in only one partial cleaning during the quarter (down from 16 in Q3)
- Commercial breakthroughs: Since September, the company has started to cater to the bulk/tanker market on anchorage in Singapore and completed 10 such hull cleanings during the quarter. Moreover, a frame agreement with a new container liner customer was signed in December increasing terminal cleaning volumes.

- During Q4, the Propellor cleaner was recommissioned after an overhaul of the system. The commercial traction for propellor cleanings picked up towards the end of the quarter with 15 cleanings in December adding up to 33 in total for the quarter,

Key milestone to be achieved in the next quarter(s)

- Reach EBITDA break-even.
- Upgrade existing hull cleaning units to handle higher currents to increase operational envelope.
- Digital transformation: Launch online customer portal to enable fleet-wide visibility, automated documentation and AI insights to elevate customer experience in order to enable new revenue stream and drive customer loyalty.
- Remote operations pilot test.
- Initiate partnership agreements with major port services suppliers.

⁴ FX rate (USD/NOK) as of 31. Dec. 2025.

Umoe Advanced Composites (“UAC”)

UAC develops and manufactures advanced type IV glass fibre pressure vessels, offering lightweight and cost-efficient solutions for containment, storage and distribution of large volumes of industrial gases such as hydrogen and methane (CBG/CNG).

Glass fibre is significantly less costly than for example carbon fibre. Moreover, due to its weight advantage, glass fibre can transport 2-3 times more hydrogen compared to similar-sized tanks in steel, representing major cost and environmental benefits. The game plan encompasses production scale-up in Norway, geographical expansion through the Chinese JV facility, technological innovation and assessing vertical/horizontal growth avenues.

The Fund has in total invested NOK 77.5m since the initial investment was concluded in January 2023.

Quarter in brief

- Secured highest order intake to date of NOK 440m (+32% compared to last year).
- Signing of new CEO, Lars Erik Lundøe.
- In 4Q-25, UAC Norway produced 493 cylinders (250-bar equivalent), in line with the production plan for the quarter.
- Secured type approvals for E8 250b and 450b cylinders.
- Secured export certification for the Chinese J/V plant's cylinder to serve APAC markets, with commercial production to commence in Q1 2026.
- Secured first order for the Chinese factory.
- Certain orders anticipated for delivery in 4Q were pushed out due to delayed certification approvals.

Key milestone to be achieved in the next quarter(s)

- Continue expansion of global market position in target geographies, diversification of compressed gas applications beyond H₂ (incl. biogas, CNG) and entry into the maritime segment.

- Strengthening and reorganisation of the sales division.
- Continue organisational build-up in the J/V factory in China for operational, technical and sales excellence.
- Secure domestic license for delivery to the Chinese market.

Company information

Business model

Game plan

Market size

Product portfolio

Storage and transport solutions for hydrogen, CNG, biogas

Key customers

Technology and differentiation

- UAC has since inception in 2006 developed and refined glass fibre weaving to develop cylinders that can hold compressed gases at >425 bar at half the price of competing (carbon fibre) solutions.

ESG drivers and impact

By developing cost effective standardized containers for the transportation of hydrogen, UAC accelerates the adoption to clean hydrogen and enables the energy transition.

SDGs alignment: 7 and 11

Sikom Connect AS (“Sikom”) (formerly Futurehome)

FHSD acquired the Futurehome AS bankruptcy estate in June 2025, and is a hardware enabled SAAS company offering smart energy management systems that help consumers centralise, automate, and monitor household appliances’ power consumption, offering greater flexibility and visibility in energy consumption and costs.

The company’s core product is a power management application (“Strømkontroll”) controlling a smart hub that connects to and controls a wide range of energy consuming devices in customers’ homes, including thermostats, water boiler relays, rotary dimmers, smart plugs, and EV chargers. The hub can connect to both FHSD products and third-party devices. The game plan is to execute and grow a subscription-based revenue model, expand into Nordic and European markets, and position FHSD for the flexibility market.

The Fund invested NOK 67.8m in Futurehome and post its bankruptcy, transported its stake in the convertible super senior loan of NOK 2m and NOK 1.3m in new equity into FHSD. The Fund seeks to recoup value through the merger of FHSD with Sikom Connect AS and continued growth of the customer subscription base. Post merger with Sikom Connect, the Fund has a stake of 5.04% in the combined entity.

Quarter in brief

- Conversion of customers to subscription model reached more than 14,000 subscribers in total.
- Merger completed and merger plan approved.

Key milestone to be achieved in the next quarter(s)

- Execute on merger plan, including extraction of synergies.
- Revise strategy for entering international markets, hereunder inorganic growth initiatives.

Company information

Website:	https://www.futurehome.io/en/
HQ:	Oslo / Trondheim Norway
No. of employees (EOY-25):	17
Sector:	Electrification
Phase:	Venture (Series B)
Unaudited Revenues (2025)	NOK 59 million
Unaudited EBITDA (2025)	NOK (2.3) million

About Sikom

Product portfolio

Key customers

Technology and differentiation

- Sikom’s energy management solution is centered around a smart centralized hub that offers household energy management solutions in a safe and secure way
- Unique positioned to sell flexibility to local and national grid owners (with incentives to household)

ESG drivers and impact

By offering substantial energy savings to households through lower energy consumption, Futurehome will enable the transition to sustainable cities and urban communities through building smarter homes.

SDGs alignment: 7, 9 and 11

Heimdall Power (“HP”)

Heimdall Power offers dynamic line rating (“DLR”) and ambient adjusted rating services to utilities across the globe. The company has a global customer base across Europe, North America and Asia.

To enable real-time operational insights for grid operators, HP combines hardware and software by delivering sphere-shaped sensors (“neurons”) powered by advanced software that collect data and enable increased grid capacity and improved grid operations and planning. The company has also developed a proprietary automated drone installation technique, enabling safe and efficient deployment even in challenging terrains.

In June 2024, the Fund concluded a NOK 40m investment in Heimdall Power (conducted across two tranches NOK 30m + 10m)⁵, corresponding to a fully-diluted ownership stake of ca. 9% in the company.

Quarter in brief

- During the quarter, 195 additional neurons were installed on customers’ lines (up from 73 in Q3-25). 86% of the installations via drone (same as Q3-25).
- Growing installed base of neurons, with 1026 physical neurons (sensors) in operation to date (up 23% from Q3-25).

- Won tender for National Grid (UK) with total frame agreement value of £10M (subject to call-offs)

Key milestone to be achieved in the next quarter(s)

- Finalize on-prem software solution for non-cloud customers
- Continue to respond to and win major RFPs for DLR contracts in the European and North American markets in 1H 2026.
- Launch facility rating software module integrating high-voltage components such as transformers.

Company information

Product sales Software subscription	Dual track Scale up business and software sales Expand to target geographies (US)	2023 2030 ~16% CAGR \$34b \$96b

Product portfolio

Key customers

Technology and differentiation

- Heimdall uses a combination of hardware sensors and software monitoring by deploying physical and virtual neurons onto customer’s grids.
- Accurate sensors that detect temperature, icing, sagging, and faults on the line.
- Autonomous drone installations of neurons without need to turn off the power grid.

ESG drivers and impact

- Accelerates the energy transition by improving capacity of and optimizing the utilization of power grids. - Enabling safer and more efficient operations with HSE benefits	SDGs alignment: 9, 11 and 12
---	--

⁵ The Fund committed to a NOK 40 million investment, whereby the first tranche (NOK 30 million) was completed in June 2024. The remaining tranche (NOK 10 million) was executed in June 2025.

Maritime Robotics (“MR”)

Maritime Robotics is a global provider of turnkey sea drones and autonomous navigation systems to third party vessels, serving customers across maritime applications in the civil hydrography, defense & security, offshore energy, fishery and transportation & logistics segments.

Maritime Robotics is reshaping the future of maritime operations through an innovative product portfolio and technology that enables remote, onshore control and monitoring of unmanned sea drones. Its solutions deliver significant operational, energy, and cost efficiencies - offering customers improved HSE outcomes, cost savings from increased efficiency, reduced fuel consumption and emissions, and enhanced operational capabilities.

In August 2024, the Fund made its initial NOK 35m investment in Maritime Robotics, corresponding to a fully diluted ownership stake of 9.5%.

Quarter in brief

- Strong order intake drove FY revenues to NOK 259m, representing 25% outperformance versus the FY25 budget (NOK 207m) and 72% growth compared to 2024 (NOK 151m).
- Further deliveries of autonomous navigation systems to the Orca sea drone portfolio this quarter, designed for maritime domain awareness and critical underwater infrastructure surveillance following first successful delivery in Q3.⁶

Key milestone to be achieved in the next quarter(s)

- Positioning manufacturing, product development and sales capabilities to support and enable significant growth.
- Secure expansion capital.

Investor Committee	Ragnvald Risan, Andreas Wold-Olsen, Carl Petter Finne
Investment Committee Advisory	Adele Christensen Os (Head), Andrew Robbins, Carl Hall, Oscar Spieler
Compliance Committee	Hilde Høksnes (Head), Andreas Marø, Charmaine Lee
Valuation Committee	Jonas Myklebost (Head), Andreas Marø ⁸

Investment Strategy

The Fund seeks to build a diverse portfolio of industrial cleantech companies in the Nordics that delivers a positive impact on environmental, social and governance matters and provides the Fund investors with long-term capital appreciation with best-in-class risk-adjusted returns. To achieve this, the Fund is looking for businesses with the following common features:

- Entrepreneurial management team with execution capabilities and track-record;
- Business model that contributes to resource efficiency and/or accelerates the energy transition;
- Proven technology, product or service on the brink of commercialization or having reached the commercialization phase with moderate technical risk;
- Asset-light business model with a clear competitive advantage that enables a scalable growth potential;
- Ownership plan that can be successfully effectuated with limited reliance on government or public institutions (i.e. in relation to subsidies, framework amendments, licenses/permits);
- More than one revenue stream, hereunder the potential of selling multiple products, services or technologies to multiple markets; and
- Businesses that can be positioned for divestment to industrial buyers.

An important part of the Manager's investment philosophy is the "1x/4x" principle: in every investment the Manager makes, we strive to protect the invested capital (1x) and at the same time achieve 4x on invested capital. Through privately negotiated transactions, the Manager seeks to ensure the execution of rigorous and detail-oriented due diligence processes, agreement with existing shareholders and management on an ownership plan, and regulation of material terms and conditions in the shareholders' agreement and subscription/investment agreement that provides the Fund with stronger control and economic rights relative to the shareholding in the company. Throughout the ownership period, the Manager aims to actively accelerate the growth potential of the business through board representation (directly or indirectly), participation in shareholder meetings and strategy meetings, and informal interaction with the management.

Sustainable Finance Disclosure Regulation (SFDR)

As the law "Offentliggjøringsforordningen", the SFDR in Norwegian and the taxonomy ("taksonomien") entered into force in Norway on 1 January 2023, the Board of the SFDRTech AS in the Board meeting on 22 March 2023 officially approved of the Manager's operation of NRP Green Transition I as an "Article 9" fund, pursuant to (EU) 2019/2088 (SFDR) Article 9.

The Board thereby confirms the Fund's commitment to making sustainable investments as its objective pursuant cf. SFDR Article 2 (17), designating that the investments of the Fund, as set forth in the SFDR, shall follow good governance practices, contribute to an environmental objective, and/or social objective, and not significantly harm other environmental objective or social objectives.

Based on the above, the Board approved relevant amendments made to the Fund's SFDR disclosure documents and marketing materials, so that they are in coherence with the regulatory changes as of 1 January 2023.

This information is not, and does not purport to be, complete. Please refer to the Fund's Shareholder Agreement.

⁸ Valuation Committee changes effective as of 31 December 2025. The Manager thereafter amended the Valuation Policy to better reflect the valuation conduct and principles applied to maintain independence and integrity in accordance with the Fund's size, nature, and complexity and applicable international guidelines, approved by the Manager's Board on 12 March 2026.

Periodic Reporting Obligations

Annual Audited Accounts: The 2025 annual audited accounts of NRP Green Transition I AS (Fund) and VIOS 224 AS (100% owned by the Fund) will be delivered to the shareholders in the Fund by 30 April 2026.

Tax Share Value: The taxable value per share will be disclosed to the shareholders in the Fund during May 2026.

Annual ESG report: In accordance with regulatory requirements, the report will be delivered to the Fund investors by 30 June 2026.

Assets subject to special arrangements due to illiquidity (AIF § 4-3(1.a)): None of the Fund's assets are subject to special arrangements arising from their illiquid nature.

Liquidity Management (AIF § 4-3(1.b)): The Fund is an unleveraged closed-ended AIF and thus this disclosure is not applicable.

Risk Management (AIF § 4-3(1.c)):

Risk profile: An investment in the Fund carries a high degree of risk. For more information on risk factors, please see section 5.3, 8 and 10.2.3 in the information memorandum of the Fund.

The assessment of risk will be an integral part of the due diligence process carried out in conjunction with each investment in the portfolio. The Manager has the overall responsibility for risk management following duties pursuant to the AIFM Act and as further described in the Fund Shareholder Agreement, the Fund Management Agreement and the Information Memorandum. The Manager seeks to identify and mitigate risk factors to reduce risk, increase value, and lower transaction costs. Further, the Manager has integrated sustainability risks into the investment decision-making process as further described in section 10.2.3 of the IM.

Risk Management Systems: In the Alternative Investment Funds Act (AIFM Act) § 3-7 it is stated that the AIF manager shall have a risk management function that is functionally and hierarchically separated from the manager's operational activities, including portfolio management. In EnvisionTech this is, among other things, carried out by having separate leaders for the Portfolio Management and the Risk Management functions. The Risk Management function shall not perform any tasks that may be in conflict with the operational activities. The Board of EnvisionTech has also adopted instructions and a routine collection in accordance with AIF act of 20 June 2014 no. 28, regulations to the AIFM act of 26 June 2014 no. 877, EU directive 2011/61/EU on AIFMD and AIFMD's associated regulation 231/2013.

The Risk management function's main task is to identify, manage and monitor all relevant and potential risks associated with the portfolio management of the funds that the Company manages. Central to this work is to facilitate, follow up and control the manager's due diligence process in the implementation of new investments. With due diligence means review, evaluation and control of the investment object's legal, technical, financial and other essential elements before the investment decision.

The Risk Management function's aim is also to support the management team in the identification and reduction of risk.

The Board of EnvisionTech has established a Risk Policy for the Fund. Central to the Risk Policy is the AIF's investment mandate, and in addition the Risk Policy contains other qualitative and quantitative management frameworks (as presented in the disclosed investor material).

Given the entry of force of the SFDR into Norway, the risk management function ensures that the Company considers sustainability risks when complying with the general requirements of the duties it performs under AIFMD Article 57.

It will work with the Company's management to integrate sustainability risks into its activities and investment strategies, and ensure that the necessary procedures and processes are in place to enable the Company to effectively manage the exposure of sustainability risks for each of the funds managed.

The Fund has its own depositary who will check the Fund's cash flows, that payments from investors in connection with subscriptions for shares have been received and that all liquid funds are booked in accounts opened in the Fund's name, amongst others.

Reporting: Ongoing reporting to the responsible functions is a key part of the Risk Management function. The purpose of these reports is to document compliance to the relevant commitments and mandates, to document non-compliance and to establish reporting lines for handling exceptions. The Risk Management function reports as follows (non-exhaustive list):

- To the compliance function of the Manager (monthly)
- To the portfolio manager of the Manager (monthly)
- To investors in the AIF (quarterly through this report)
- To the Board of the AIF (quarterly through this report and otherwise semi-annually)
- To the Board of the Manager (quarterly through this report and otherwise semi-annually)
- To the depositary (quarterly through this report and otherwise semi-annually)

- To the Financial Supervisory Authority (quarterly)

In addition, the Risk Management function is reporting continuously to the management team of the Manager and to the Depositary. The routines contain rules for escalation of the issues that the Risk Management function may uncover, including breach of an AIF's investment mandate and risk policy. The risk policy is reviewed on an annual basis.

Conflicts of Interest: AIF management entails several potential conflicts of interest that require transparency and information according to the AIF framework. The Fund shareholder agreement, adherence agreement, fund management agreement and information memorandum describe such conflicts of interest and the management of these. All entities in the NRP Group have guidelines for managing conflicts of interest in their rules and procedures. All agreements involving the Fund and agreements between entities in the NRP Group are entered into on an arm's length principle.

Given the Company's investment mandate as an Article 9 Fund manager, the Risk Management function does not currently anticipate any conflicts of interest that may arise as a result of the integration of sustainability risks into the risk management processes, systems, and internal controls.

Borrowings and guarantees (AIF § 4-3(2)): In accordance with clause 7.4.1 in the Fund SHA, the Fund shall not borrow monies or in other ways deploy financial gearing. However, the Fund may establish short-term credit lines and other short-term loan facilities or bridging facilities to, among other things, cover ongoing operating cost and make investments between drawdowns, subject to any drawdown or utilisation of such credit lines, short-term loan facilities and bridging facilities being repaid within twelve (12) months after each relevant drawdown and utilisation. As of the end of the reporting period, the Fund has not established such short-term debt facilities.

Valuation / NAV Q4-25:

See section "*Fund Performance*" in this report for financial details.

The Valuation Committee approved the NAV on 23 February 2026, and agreed that the procedures, principles and methodologies of valuation are in accordance with the Valuation Policy, and thus in-line with acceptable accounting practices and market practice; and the pricing information, the calculation and conclusions related to the valuation were sufficiently documented.

The equity value of each investment position is determined on a stand-alone basis by using and combining latest share issue pricing levels and generally accepted valuation methods (incl. DCF, peer review, etc) without applying any discount for lack of liquidity, lack of control, size, the existence of any shareholders agreement or similar circumstances nor any premium for potential synergies from a combination with another business.

Equity values are based on the fully diluted approach, where ordinary shares, preferred shares, convertible debt, options/warrants and other equity instruments are considered on an as-converted basis to determine the NAV or FMV per share. The NAV per share and NAV considers the FX adjusted value of each portfolio investment.

Fund Assets

Cash & Cash Eq. (incl. current assets) is valued in accordance with Norwegian GAAP and as presented through the quarterly financial statements prepared by the Fund's Business Manager (NRP Business Management AS).

The fair market value (FMV) of the Fund's ownership in:

- Alva Industries AS: Set based on head of terms received from external investors, adjusted for a discount to reflect transaction risk.
- C-Leanship A/S: Set based on latest share issue price, adjusted for assessment on LTM performance and NTM plans and USD/NOK FX impact.
- Umoe Advanced Composites AS: Set based on a valuation framework recommended by a third-party valuation advisor⁹.
- Sikom Connect AS (formerly Futurehome AS): Set based on two third-party valuation assessments prepared in connection with the merger between Sikom Connect AS and FHSD Connect AS.
- Heimdall Power AS: Set based on latest share issue pricing in connection with an internal bridge round, with reference to third-party term sheets received from external investors in 2H-25
- Maritime Robotics AS: Set based on term sheets received from external investors in 2H-25 for an ongoing capital round, adjusted for discount to reflect transaction risk.

⁹ For the avoidance of doubt, the third-party valuation advisor was not solely appointed by UAC, but by UAC and an unaffiliated party. The third-party valuation advisor delivered the valuation report to both parties in December-23.

Fund liabilities:

Short-term liabilities are valued in accordance with Norwegian GAAP and as presented through the quarterly financial statements prepared by the Fund's Business Manager (NRP Business Management AS). The Fund (incl. affiliated entities) does not have any long-term liabilities.
