Executive Summary

Fund Overview

Envision SPV I AS (the "SPV" or "Fund") is a closed-end special purpose vehicle established by EnvisionTech AS (the "Manager") to invest in three portfolio companies from NRP Green Transition I AS: Alva Industries AS, Heimdall Power AS, and Maritime Robotics AS (together, the "Target Companies").

The Fund was launched to capitalize on the over-allocation available to EnvisionTech as lead investor in the upcoming funding rounds of the three Target Companies. The SPV is structured as a Norwegian limited liability company (*aksjeselskap*) and classified as an Alternative Investment Fund under the Norwegian AIFM Act.

The sustainable investment objective of the Fund is to contribute towards the transition to a low carbon, climate-resistant and more resource-efficient and circular economy, in compliance with Article 9 of SFDR (EU 2019/2088) and the EU Taxonomy (EU 2020/852).

Envision SPV I AS

- In Q2-26, NOK 13.90m was called from shareholders to fund investments in Maritime Robotics AS and Heimdall Power AS.
- With the second close of the SPV, total committed capital in Q2-26 stands at NOK 49.50m.
- Total paid-in-capital in Q2-26 stands at NOK 46.66m, corresponding to 94.3% of total commitments.

Key Events in Q2 2026

Envision SPV I AS completes second close

Envision SPV I AS completes a second close of NOK 10.50m on 23rd June 2026 to execute on follow-on investments in Maritime Robotics, Alva Industries and Heimdall Power.

On the back of solid commercial traction in these three companies, the SPV has the purpose of investing in the available over-allocation in upcoming funding rounds of these three companies from NRP Green Transition I AS.

The target fund size is NOK 100m.

Maritime Robotics raises NOK 287 million growth capital as autonomous sea drones move into large-scale adoption

Maritime Robotics closed a NOK 287 million growth investment round led by London-based MS+PARTNERS in June, with existing investors EnvisionTech, Nysnø and Umoe doubling down to scale autonomous sea drones across commercial and defense markets globally with fresh capital. The company will further announce details of a new investor joining in Q3-26 report.

Heimdall Power completes an internal bridge round with NOK 79.2m from major shareholders

Heimdall Power completed an internal bridge round of 83.1m, whereby NOK 79.2m was committed from existing major shareholders and the remainder from employees and other shareholders. Proceeds will be used to execute on the business plan and take the company to cash-positive operations.

Alva Industries raises EUR 16.0m from new investors

Alva Industries raised €16m in June, led by Nysnø Climate Investments, Sandwater and Emerald Technology Ventures, with Samsung Ventures' multi-million euro investment from December 2025 converting into the round, to scale manufacturing and international growth across robotics, aerospace, medical and defense applications.

Key Events after the Reporting Period

Envision SPV I AS completes the third close

Envision SPV I AS completes a third close of NOK 25.0m on 16th July 2026 to execute on follow-on investments in Maritime Robotics, Alva Industries and Heimdall Power, bringing the total fund commitments to NOK 74.50m.

The target fund size is NOK 100m.

Maritime Robotics closes follow-on investment from a reputable European investor

Maritime Robotics closes a follow-on investment from a reputable European investment fund within the dual use space, enabling further growth and validation of their sea drone platforms.

Total distributions	-	-	-	-

(1) The Manager completed a third close of the SPV subsequent to end of the quarter, which will be reflected in the next quarterly report.

Fund Net Asset Value (NAV)¹

In Q2-2026, the net asset value of the SPV is set to **NOK 0.5507 per share**, equivalent to **NOK 45.9 million**, and corresponding to a **1.7% discount** to the average cost of the shares (NOK 0.5600 per share).

(1) Net Asset Value (NAV) = Fund Assets – Fund Liabilities. The Valuation Committee approved the NAV on 14 August 2026 and agrees that the procedures, principles and methodologies of valuation is in accordance with the Valuation Policy, and thus in-line with acceptable accounting practices and market practice; and the pricing information, the calculation and conclusions related to the valuation were sufficiently documented. Fund Assets = FMV of Investments + Cash & Cash Equivalents. Fund Liabilities = Short-Term Liabilities + Long-Term Liabilities. See section "Periodic reporting obligations" for further details.

Fund Return Multiples

	Q2-2026
	NOK-denominated
DPI (Distribution to Paid-in Capital)	0.00x
RVPI (Residual Value ¹ to Paid-in Capital)	0.98x
TVPI² (Total Value to Paid-in Capital)	0.98x

(1) Residual value or NAV (= Fund assets - Fund liabilities) is the fair market value of the Fund's investment positions plus other fund assets (e.g. cash) less fund liabilities (e.g. account payables).

(2) TVPI = DPI + RVPI

Portfolio Overview

Company	HQ	Initial Investment	Total Investment by the Fund (NOKm)	Total Value (NOKm)	Ownership (non-diluted)	Ownership (fully-diluted)	Main co-investors / shareholders	Fund board rights ²
Alva Industries AS	NO	Jun-26	9.00	9.00	2.02%	1.70%	Founders/Mgmt; Samsung; Sandwater; Emerald/Nabtesco; Nysnø; Statkraft Ventures; Drone Fund	N/A

(1) Ownership includes all equity instruments held by the Fund (excl. however compensation warrants held to protect against breach of representation & warranties). (2) Governance rights (via board representation) in each portfolio company are exercised by the Manager as per a coordination agreement entered between the Manager, Fund I and the SPV.

Portfolio Companies

Alva Industries (“Alva”)

Alva was founded with a vision of electrifying the world through a unique production technology for electric motors. Alva designs and manufactures high-performance electric frameless motors for industrial & defense applications, using its patented stator production technology (FiberPrinting™).

The unique production technology revolutionizes the way electric motors can be designed & produced, introducing a new benchmark for custom motor development & time-to-market in small & high lot sizes alike. As an added benefit, the FiberPrinting™ production process also allows Alva to pack more power into ironless motors than any current alternatives, enabling the company to offer its clients electric drive systems with competitive technical performance & energy efficiency characteristics, without compromising longevity or reliability.

The Fund has in total invested NOK 9.00m since the initial investment that was concluded in June 2026, corresponding to a fully-diluted ownership stake of ca. 1.70% in the company.

Quarter in brief

- Strong commercial results with the company exceeding quarterly targets in new customer evaluation units acquisition. 181x customers are part of Alva's qualification program having bought customer evaluation units (up from 158x in Q1-26). 42x customers have proceeded to pre-series stage (up from 31x in Q1-26). 6x customers have proceeded to first commercial production order stage (6x in Q1-26).

- Concluded the EUR 16 million equity raise, bringing in a strong consortium of investors and fresh capital to fuel the company's next phase of growth.

Key milestones to be achieved in the next quarter(s)

- Reach the FY26 budget of clients in qualification funnel and advance existing leads.
- Delivery of products to customers in accordance with PO and specs.
- Scale production capacity to meet growth targets.

Alva's iron-less frameless motors helps industrial customers improve its energy efficiency and energy & material use

SDGs alignment: 9 and 12

Heimdall Power (“HP”)

Heimdall Power offers dynamic line rating (“DLR”) and ambient adjusted rating services to utilities across the globe. The company has a global customer base across Europe, North America and Asia.

To enable real-time operational insights for grid operators, HP combines hardware and software by delivering sphere-shaped sensors (“neurons”) powered by advanced software that collect data and enable increased grid capacity and improved grid operations and planning. The company has also developed a proprietary automated drone installation technique, enabling safe and efficient deployment even in challenging terrains.

In June 2026, the Fund concluded a NOK 15.00m investment in Heimdall Power¹, corresponding to a fully-diluted ownership stake of ca. 2.26% in the company.

Quarter in brief

- During the quarter, 150 additional neurons were installed on customers’ lines (down from 170 in Q1-26).
- The company grew the installed base of physical neurons (sensors) in operation to 1346 (up 13% from Q1-26).

- Recognized revenues during the quarter were NOK 13.1m, while order intake was NOK 12.7m.
- Up-sell to N-ergie and Statnett during the quarter.
- New customers during the quarter include Tennessee Valley (US).

Key milestone to be achieved in the next quarter(s)

- Finalize on-prem software solution for non-cloud customers
- Secure call-offs from major frame agreements won over the past quarters.
- Secure projects with customers in the US eligible for SPARK funding to upgrade power grids using advanced transmission technologies (\$1.9b US federal grant)

Key customers

Technology and differentiation

- Heimdall uses a combination of hardware sensors and software monitoring by deploying physical and virtual neurons onto customer’s grids.
- Accurate sensors that detect temperature, icing, sagging, and faults on the line.
- Autonomous drone installations of neurons without need to turn off the power grid.

ESG drivers and impact

- Accelerates the energy transition by improving capacity of and optimizing the utilization of power grids. - Enabling safer and more efficient operations with HSE benefits	SDGs alignment: 9, 11 and 12
---	--

Maritime Robotics (“MR”)

Maritime Robotics is a global provider of turnkey sea drones and autonomous navigation systems to third party vessels, serving customers across maritime applications in the civil hydrography, defense & security, offshore energy, fishery and transportation & logistics segments.

Maritime Robotics is reshaping the future of maritime operations through an innovative product portfolio and technology that enables remote, onshore control and monitoring of unmanned sea drones. Its solutions deliver significant operational, energy, and cost efficiencies - offering customers improved HSE outcomes, cost savings from increased efficiency, reduced fuel consumption and emissions, and enhanced operational capabilities.

In April 2026, the Fund made its initial NOK 15.00m investment in Maritime Robotics, corresponding to a fully diluted ownership stake of 1.40%.

Quarter in brief

- Closing of NOK 287 million growth equity round led by Mustard Seed + Partners, a UK-based investor, with participation from existing major shareholders to fuel the company's expansion.
- Performance is on track to meet the full-year budget.
- 1H-26 delivering 49% revenue growth compared with 1H-25.

Key milestone to be achieved in the next quarter(s)

- Closing of a follow-on investment from a reputable European investor in the dual use space.
- Positioning manufacturing, product development and sales capabilities to support and enable significant growth.
- Explore adjacent markets and operational domains which the company's core autonomous navigation technology platform can be used.

Investment Strategy

The Fund's investment objective is to achieve long-term capital appreciation by investing in the three Target Companies: Alva Industries AS, Heimdall Power AS and Maritime Robotics AS.

The sustainable investment objective of the Fund is to contribute towards the transition to a low carbon, climate-resistant and more resource-efficient and circular economy, in compliance with Article 9 of SFDR (EU 2019/2088) and the EU Taxonomy (EU 2020/852).

Sustainable Finance Disclosure Regulation (SFDR)

As the law "Offentliggjøringsforordningen", the SFDR in Norwegian and the taxonomy ("taksonomien") entered into force in Norway on 1 January 2023, the Board of EnvisionTech AS in the Board meeting on 13 March 2026 officially approved of the Manager's operation of Envision SPV I AS as an "Article 9" fund, pursuant to (EU) 2019/2088 (SFDR) Article 9.

The Board thereby confirms the Fund's commitment to making sustainable investments as its objective pursuant cf. SFDR Article 2 (17), designating that the investments of the Fund, as set forth in the SFDR, shall follow good governance practices, contribute to an environmental objective, and/or social objective, and not significantly harm other environmental objective or social objectives.

This information is not, and does not purport to be, complete. Please refer to the Fund's Shareholder Agreement.

Periodic Reporting Obligations

Annual ESG report: In accordance with regulatory requirements, the first report will be delivered to the Fund investors by 30 June 2027.

Assets subject to special arrangements due to illiquidity (AIF § 4-3(1.a)): None of the Fund's assets are subject to special arrangements arising from their illiquid nature.

Liquidity Management (AIF § 4-3(1.b)): The Fund is an unleveraged closed-ended AIF and thus this disclosure is not applicable.

Risk Management (AIF § 4-3(1.c)):

Risk profile: An investment in the Fund carries a high degree of risk.

The assessment of risk will be an integral part of the due diligence process carried out in conjunction with each investment in the portfolio. The Manager has the overall responsibility for risk management following duties pursuant to the AIFM Act and as further described in the Fund Shareholder Agreement, the Fund Management Agreement and the Information Memorandum. The Manager seeks to identify and mitigate risk factors to reduce risk, increase value, and lower transaction costs.

Risk Management Systems: In the Alternative Investment Funds Act (AIFM Act) § 3-7 it is stated that the AIF manager shall have a risk management function that is functionally and hierarchically separated from the manager's operational activities, including portfolio management. In EnvisionTech this is, among other things, carried out by having separate leaders for the Portfolio Management and the Risk Management functions. The Risk Management function shall not perform any tasks that may be in conflict with the operational activities. The Board of EnvisionTech has also adopted instructions and a routine collection in accordance with AIF act of 20 June 2014 no. 28, regulations to the AIFM act of 26 June 2014 no. 877, EU directive 2011/61/EU on AIFMD and AIFMD's associated regulation 231/2013.

The Risk management function's main task is to identify, manage and monitor all relevant and potential risks associated with the portfolio management of the funds that the Company manages. Central to this work is to facilitate, follow up and control the manager's due diligence process in the implementation of new investments. With due diligence means review, evaluation and control of the investment object's legal, technical, financial and other essential elements before the investment decision.

The Risk Management function's aim is also to support the management team in the identification and reduction of risk.

The Board of EnvisionTech has established a Risk Policy for the Fund. Central to the Risk Policy is the AIF's investment mandate, and in addition the Risk Policy contains other qualitative and quantitative management frameworks (as presented in the disclosed investor material).

Given the entry of force of the SFDR into Norway, the risk management function ensures that the Company considers sustainability risks when complying with the general requirements of the duties it performs under AIFMD Article 57.

It will work with the Company's management to integrate sustainability risks into its activities and investment strategies, and ensure that the necessary procedures and processes are in place to enable the Company to effectively manage the exposure of sustainability risks for each of the funds managed.

The Fund has its own depositary who will check the Fund's cash flows, that payments from investors in connection with subscriptions for shares have been received and that all liquid funds are booked in accounts opened in the Fund's name, amongst others.

Reporting: Ongoing reporting to the responsible functions is a key part of the Risk Management function. The purpose of these reports is to document compliance to the relevant commitments and mandates, to document non-compliance and to establish reporting lines for handling exceptions. The Risk Management function reports as follows (non-exhaustive list):

- To the compliance function of the Manager (monthly)
- To the portfolio manager of the Manager (monthly)
- To investors in the AIF (quarterly through this report)
- To the Board of the AIF (quarterly through this report and otherwise semi-annually)
- To the Board of the Manager (quarterly through this report and otherwise semi-annually)
- To the depositary (quarterly through this report and otherwise semi-annually)
- To the Financial Supervisory Authority (quarterly)

In addition, the Risk Management function is reporting continuously to the management team of the Manager and to the Depositary. The routines contain rules for escalation of the issues that the Risk Management function may uncover, including breach of an AIF's investment mandate and risk policy. The risk policy is reviewed on an annual basis.

Conflicts of Interest: AIF management entails several potential conflicts of interest that require transparency and information according to the AIF framework. The Fund shareholder agreement, adherence agreement, fund management agreement and information memorandum describe such conflicts of interest and the management of these. Furthermore, a coordination agreement (dated 9th March 2026) has been entered into between the Manager as per a coordination agreement entered between the Manager, NRP Green Transition I AS and Envision SPV I AS to regulate, mitigate and resolve conflicts of interests.

Given the Company's investment mandate as an Article 9 Fund manager, the Risk Management function does not currently anticipate any conflicts of interest that may arise as a result of the integration of sustainability risks into the risk management processes, systems, and internal controls.

Borrowings and guarantees (AIF § 4-3(2)): In accordance with clause 6.3.1 in the Fund SHA, the Fund shall not borrow monies or in other ways deploy financial gearing. However, the Fund may establish short-term credit lines and other short-term loan facilities or bridging facilities to, among other things, cover ongoing operating cost and make investments between drawdowns, subject to any drawdown or utilisation of such credit lines, short-term loan facilities and bridging facilities being repaid within twelve (12) months after each relevant drawdown and utilisation. As of the end of the reporting period, the Fund has not established such short-term debt facilities.

Valuation / NAV Q2-26:

See section "*Fund Performance*" in this report for financial details.

The Valuation Committee approved the NAV on 14 August 2026, and agreed that the procedures, principles and methodologies of valuation are in accordance with the Valuation Policy, and thus in-line with acceptable accounting practices and market practice; and the pricing information, the calculation and conclusions related to the valuation were sufficiently documented.

The equity value of each investment position is determined on a stand-alone basis by using and combining latest share issue pricing levels and generally accepted valuation methods (incl. DCF, peer review, etc) without applying any discount for lack of liquidity, lack of control, size, the existence of any shareholders agreement or similar circumstances nor any premium for potential synergies from a combination with another business.

Equity values are based on the fully diluted approach, where ordinary shares, preferred shares, convertible debt, options/warrants and other equity instruments are considered on an as-converted basis to determine the NAV or FMV per share. The NAV per share and NAV considers the FX adjusted value of each portfolio investment.

Fund Assets

Cash & Cash Eq. (incl. current assets) is valued in accordance with Norwegian GAAP and as presented through the quarterly financial statements prepared by the Fund's Business Manager (NRP Business Management AS).

The fair market value (FMV) of the Fund's ownership in:

- Alva Industries AS: FMV set equal to acquisition cost, with no unrealised gain (loss) in the current reporting period.
- Heimdall Power AS: FMV set equal to acquisition cost, with no unrealised gain (loss) in the current reporting period.
- Maritime Robotics AS: FMV set equal to acquisition cost, with no unrealised gain (loss) in the current reporting period.

Fund liabilities:

Short-term liabilities are valued in accordance with Norwegian GAAP and as presented through the quarterly financial statements prepared by the Fund's Business Manager (NRP Business Management AS). The Fund (incl. affiliated entities) does not have any long-term liabilities.
